42	10 7	1 706	43 33

NOTES

1. Dimensions are inches
2. Metric equivalents are given for general information only
3. Unless otherwise specified, tolerance is ±.020 (0 51 mm) for two place decimals and ± 005 (0.13 mm) for three place decimals
4. For hardware detail specifications, see appendix of MIL-S-3950
5. Contact installing/removal tool in accordance with M81969/14-03
6. Grommet sealing plug in accordance with MS27488A16
7. Sealing grommet shall seal on a smooth wire insulation of .068 (1 73 mm) to .103 (2.62 mm) diameters
8. Terminal shall adequately accept a wire contact within dimensional limits of M39029/1-102.
9. The terminal end of switch shall be color coded blue to indicate contact size
10. Direction of internal mechanism movement is opposite to the direction of the toggle movement.
11. Sealing plugs may be used in nonfunctional grommet holes
12. Maximum weight is .227 pound
13. Locking arrangement Positive locking shall be accomplished and shall prevent motion of the toggle lever until the locking mechanism is manually released
14. The force required to release the locking mechanism shall be 3 to 5 pounds
15. The locking means at the top of the toggle bushing shall be capable of withstanding a torque of 20 inch-pounds applied in both directions immediately following the humidity test.
16. Part number example MS27783-21A (locking combination 'A')
17. In the event of a conflict between the text of this standard and the reference cited herein, the text of this standard shall take precedence
18. Referenced Government documents of the issue listed in that issue of the Department of Defense Index of Specifications and Standards (DODISS) specified in the solicitation form a part of this standard to the extent specified herein

Test requirements

Test shall be performed in accordance with MIL-S-3950 except

a. During all tests, switches shall be fully wired with appropriate wire and terminal contacts
b. Contact voltage drop - the contact voltage drop with two terminals and the switch contact in series shall not exceed 8 millivolts measured from one wire contact through the contacts to the other wire contacts
