This drawing is provided by the Department of Defense and is
mandatory for all activities. Suggestions for all new engineering and design
improvements, and for engineering use shall be made from this document.

NOTICE — When Government drawings, specifications, or other data are used for any purpose other than in connection with a definitely related Government procurement
operation, the United States Government thereby incurs no responsibility, nor any obligation whatsoever; and the fact that the Government may have formulated, furnished,
or in any way supplied the said drawings, specifications, or other data is not to be regarded by implication or otherwise as in any manner licensing the holder or any other
person or corporation, or conveying any rights or permission to manufacture, use or sell any patented invention that may in any way be related thereto.

This military standard is approved by the Department of Defense and is mandatory for all conditions. Comments for all correspondence and design applications shall be made from this document.

NOTICE — When Government drawings, specifications, or other data are used for any purpose other than in connection with a definitely related Government procurement operation, the United States Government thereby incurs no responsibility, nor any obligation whatsoever; and the fact that the Government may have formulated, furnished, or in any way supplied the said drawings, specifications, or other data is not to be regarded by implication or otherwise as in any manner licensing the holder or any other person or corporation, or conveying any rights or permission to manufacture, use, or sell any patented invention that may in any way be related thereto.

DD FORM 672-1

FSC 5305

MILITARY STANDARD

MS 24679

SUPERSEDING

SCREW, CAP, SOCKET HEAD, KNURLED, MS SERIES, ALLOY STEEL, UNC-3A (INCH-POUND)

*Alignment Plug shall pass completely through the head without deflection.

**Based on 160,000 PSI minimum tensile strength. Breaking strengths are determined by the stress areas indicated in Screw-Thread Standards for Federal Services Handbook H-28.

MATERIAL: Steel, Alloy; Federal Standard 66.

HARDNESS: Rockwell, C36-43

PROTECTIVE COATING: Uncoated.

THREADS: The threads shall be in accordance with Specification MIL-S-7742

THREAD LENGTH-R: Screws which have a body length less than the minimum thread length shall be threaded within two thread pitches of the head.

LENGTH TOLERANCE:

LENGTH	DIAMETER	TOLERANCE
1/4 thru 1.000	#4 thru 1.000	±1/64
1-1/4 thru 2.000	#4 thru 1.000	+1/32 -1/64
2-1/4 thru 6.000	#4 thru 1.000	±1/32

DRILLED HOLE DATA:

(a) Screw sizes No. 4 and No. 6 shall have two (2) drilled holes spaced 180° and size No. 8 and above shall have six (6) drilled holes spaced 60°
(b) Edges of the holes on the outside of the head shall be chamfered 45° by .010 to .020 deep.
(c) On screw sizes below No. 8 the drilled hole shall be centered as close as practicable on the flat of the hexagon socket.
(d) On screw sizes No. 8 and above the drilled holes shall be within the flats of the hexagon socket and shall not break through the corners of the hexagon socket.

HEAD: Plain or knurled heads are optional.

DIMENSIONS: In inches unless otherwise specified.

NOTES:

(a) This Standard takes precedence over documents referenced herein.
(b) Reference documents shall be of the issue in effect on date of invitations for bids.

PART NUMBER = (MS Number) - (Screw dash number)
EXAMPLE = MS 24679 -1 is the part number for a screw #4-40NC-3A by 1/4 long Alloy Steel uncoated.

(S) CANCELLED

AFTER 7 JULY 1976 USE MS 24677

INTERCHANGEABILITY RELATIONSHIP — MS 24677 SCREWS CAN REPLACE THE CANCELLED SCREWS OF THE SAME DASH NUMBERS FOR MOST APPLICATIONS, EXCEPT THOSE IN WHICH CADMIUM PLATED STEEL SCREWS ARE UNACCEPTABLE DUE TO TEMPERATURE, CORROSION, OR TOXICITY CONSIDERATIONS. THE CANCELLED MS 24679 SCREWS CANNOT ALWAYS REPLACE MS 24677 SCREWS AND SHOULD BE USED UNTIL EXISTING STOCK IS DEPLETED. USE ONLY SUPERSEDING MS SCREWS OF THE SAME DASH NUMBERS FOR DESIGN AND REPLACEMENT.
