SUPERSEDING
Int. Fed. Spec. U-P-00560(DSA-DM)
March 29, 1965

FEDERAL SPECIFICATION

BACITRACIN ZINC, NEOMYCIN SULFATE AND POLYMYXIN B SULFATE OPHTHALMIC OINTMENT

This specification was approved by the Commissioner, Federal Supply Services, General Services Administration, for use of all Federal agencies.

1. SCOPE

1.1 Scope. This specification covers Bacitracin Zinc, Neomycin Sulfate, and Polymyxin B Sulfate Ophthalmic Ointment (See 6.2).

2. APPLICABLE DOCUMENTS

2.1 The following documents of the issues in effect on date of invitation for bids or request for porposals form a part of this specification to the extent specified herein:

Federal Specifications:

PPP-C-186 - Containers, Packaging and Packing for Drugs, Chemicals, and Pharmaceuticals.

Federal Standard:

Fed. Std. No. 123 - Marking for Shipment (Civil Agencies).

(Activities outside the Federal Government may obtain copies of Federal Specifications, Standards, and Handbooks as outlined under General Information in the Index of Federal Specifications and Standards and at the prices indicated in the Index. The Index, which includes cumulative monthly supplements as issued, is for sale on a subscription basis by the Superintendent of Documents, US Government Printing Office, Washington, DC 20402.

(Single copies of this specification and other Federal Specifications required by activities outside the Federal Government for bidding purposes are available without charge from Business Service Centers at the General Services Administration Regional Offices in Boston, New York, Washington, DC, Atlanta, Chicago, Kansas City, MO, Fort Worth, Denver, San Francisco, Los Angeles, and Seattle, WA.

Check the source to verify that this is the current version before use.

(Federal Government activities may obtain copies of Federal Specifications, Standards, and Handbooks and the I[illegible] of Federal Specifications and Standards from established distribution points in their agencies.)

Military Standards:

MIL-STD-105	- Sampling Procedures and Tables for Inspection by Attributes.
MIL-STD-129	- Marking for Shipment and Storage.

(Copies of Military Specifications and Standards required by suppliers in connection with specific procurement functions should be obtained from procuring activity or as directed by the contracting officer.)

Laws and Regulations:

U.S. Department of Health, Education, and Welfare
Food and Drug Administration:

Federal Food, Drug, and Cosmetic Act and Regulations Promulgated Thereunder.

(Applications for copies should be addressed to the Food and Drug Administration, Washington, DC 20204.)

2.2 Other publications. The following documents form a [illegible] of this specification to the extent specified herein. Unless otherwise indicated the issue in effect on date of invitation for bids or request for proposals shall apply.

U.S. Pharmacopeial Convention, Inc.:

The U.S. Pharmacopeia.
National Formulary.

(Application for copies should be addressed to the Mack Publishing Company, Easton, PA 18042.)

3. REQUIREMENTS

3.1 Material. Shall be a soft homogeneous, faintly yellow unctuous mass, smooth and free of grittiness, lumps or other unincorporated material and containing in each gram 5000 units of Polymyxin B as the Sulfate; Bacitracin Zinc equivalent to 400 units of Bacitracin, 5 mg of Neomycin Sulfate, (equivalent to 3.5 mg of Neomycin Base) in a low melting point petrolatum base.

Source: https://assist.dla.mil -- Downloaded: 2026-10-26T11:20Z
Check the source to verify that this is the current version before use.

3.1.1 The Polymyxin B Sulfate, Bacitracin Zinc, and Neomycin Sulfate shall be thoroughly mixed and suspended as finely divided particles in a base consisting of petrolatum.

3.2 Certification. Each lot of each antibiotic shall be certified by the Food and Drug Administration (F.D.A.). The finished Ointment shall conform to pertinent provisions of the General Regulations for the Certification of Antibiotics and Antibiotic-Containing Drugs, Title 21.

3.3 Ingredients. All ingredients used in the manufacture of the product shall be of U.S.P. or N.F. quality or, if not included in either of these compendia, the ingredients shall be suitable for use in the ophthalmic ointment.

3.4 Particle size. Particle size of the ointment, when determined microscopically, shall comply with the following ranges:

90 percent of the particles shall not exceed 20 microns in any maximum dimension.

99 percent of the particles shall not exceed 35 microns in any maximum dimension.

No particle shall exceed 80 microns in any maximum dimension.

3.5 Sterility. The ophthalmic ointment shall be sterile.

3.6 Melting range. Melting range for the finished ointment shall be 42°C. ± 2°C., when determined by the U.S.P. procedure for class II.

3.7 Metal particles. The ointment shall comply with the metal particles test and limits of the FDA for ophthalmic ointments.

3.8 Expiration dating period. The expiration dating period shall be not less than 24 months. Not more than 3 months of the expiration dating period shall have elapsed at the time of delivery of the product to the Government.

3.9 Workmanship. The material and its containers shall be free of defects which detract from their appearance or may impair their serviceability.

4. QUALITY ASSURANCE PROVISIONS

4.1 Responsibility for inspection. Unless otherwise specified in the contract or purchase order, the supplier is responsible for the performance of all inspection requirements as specified herein. Except as otherwise specified in the contract or order, the supplier may use his own or any other facilities suitable for the performance of the inspection requirements specified

Check the source to verify that this is the current version before use.

herein, unless disapproved by the Government. The Government reserves the right to perform any of the inspections set forth in the specification where such inspections are deemed necessary to assure supplies and services conform to prescribed requirements.

4.1.1 Records of examinations and tests performed by or for the contractor shall be maintained by the contractor and made available to the Government, upon the Government's request, at any time, or from time to time, during the performance of the contract and, (i) as to any expiration dated item, for the expiration dating period (potency period) specified by the contractor for such item, or such longer period as may be required by regulation of any federal agency; or (ii) as to non-dated items, for not less than 3 years after delivery of the items to the Government.

4.1.2 No company supplying any ingredient(s) to the contractor will be considered an acceptable facility for the performance of any inspection requirements specified herein.

4.1.3 Lot. For purposes of this specification, a lot, batch, or control is that single, uniform, and homogeneous quantity of ointment, produced from one formulation, subjected to the same compounding and manufacturing operation, and filled into final containers.

4.2 Sampling. Sampling shall be conducted in accordance with MIL-STD-105.

TABLE I. Sampling

For visual examination	Inspection level	AQL (percent defective)	Unit of product
Major	S-2	1.0	Filled immediate container
Minor	II	2.5	Unit package

4.2.1 Classification of defects. Examination will be conducted in accordance with the following classification of defects:

TABLE II. Classification of defects.

Categories	Defects 1/
Major	
101	Ointment not homogeneous, not free from separation.
102	Ointment not smooth.
103	Ointment not free from grit.
104	Ointment not free from foreign matter.
105	Ointment not faintly yellow.

Source: https://assist.dla.mil -- Downloaded: 2026-10-26T11:20Z
Check the source to verify that this is the current version before use.

TABLE II. Classification of defects (cont'd)

Categories	Defects 1/
Minor	
201	Exterior of immediate container not free from contents and foreign matter.
202	Label not free from defacing marks and tears.

1/ Inspection is not restricted to the classified possible defects listed above.

4.3 Tests. Tests shall be performed to determine compliance with all requirements of this document and all referenced documents.

4.4 Examination of preparation for delivery. An examination shall be made to determine whether the packaging, packing, and marking comply with the requirements of Section 5. Defects shall be scored as specified in table III. Sampling shall be in accordance with MIL-STD-105. The sample unit shall be one container fully prepared for delivery. The lot shall be the number of containers offered for inspection at one time. The inspection level shall be S-2 and the acceptable quality level shall be 4.0 expressed in terms of percent defective.

TABLE III. Examination of preparation for delivery 1/

Examination	Defect
Containers	Not as specified.
Quantity	Quantity in interior packages and shipping containers not as specified.
Packaging and Packing Materials	Any component missing or damaged.
Workmanship	Inadequate application of components such as incomplete closure of container flaps, tape improperly applied, or containers distorted.
Markings	Omitted, incorrect, illegible, improper size, location, sequence, or method of application.

1/ The above examination is only applicable to the intermediate and exterior containers and is not applicable to Veterans Administration contracts.

5. PREPARATION FOR DELIVERY

5.1 Packaging requirement. The requirements for packaging shall be in accordance with all applicable requirements of PPP-C-186 and as specified herein.

Source: https://assist.dla.mil -- Downloaded: 2026-10-26T11:20Z
Check the source to verify that this is the current version before use.

5.2 Packaging. Packaging shall be Level A or C as specified (see 6.1).

5.2.1 Unit of issue. (For military use only). One box containing twelve (12) 1/8 oz (3.5 Grams) tubes as specified, constitutes one unit of issue.

5.2.2 Level A.

5.2.2.1 Immediate container. Immediate container shall be a commercially available ointment tube with ophthalmic tip considered acceptable by the Food and Drug Administration (FDA) for the product contained therein and shall be of such compatibility that neither the contents nor the container are altered in any way by each other.

5.2.2.2 Unit package. Each unit shall be packaged as specified in PPP-B-186.

5.2.2.3 Intermediate package. Twelve units shall be packaged as specified for procedure code 15 in PPP-C-186.

5.2.3 Level C. Units shall be packaged in standard commercial containers of the size and kind commonly used, which will afford the degree of protection required for shipment and use of the product for its intended purpose.

5.3 Packing. Packing shall be level A, B or C as specified (see 6.1).

5.3.1 Level A. One hundred forty-four units shall be packaged as specified for procedure code 15 in PPP-C-186.

5.3.2 Level B. One hundred forty-four units shall be packed as specified for procedure code 15 in PPP-C-186.

5.3.3 Level C. The subject commodity shall be packed in substantial commercial containers of the type, size, and kind commonly used for the purpose, so constructed as to insure acceptance and safe delivery by common or other carriers, at the lowest rate, to point of delivery called for in the contract or purchase order.

5.4 Marking.

5.4.1 Civil agencies. Marking for shipment shall be in accordance with Fed. Std. No. 123.

5.4.2 Military activities.

5.4.2.1 Labeling. Labeling shall be in accordance with the requirements of the Federal Food, Drug and Cosmetic Act, and shall include the information required below:

Source: https://assist.dla.mil -- Downloaded: 2026l0-26T11:20Z
Check the source to verify that this is the currentversion before use.

5.4.2.1.1 Immediate container. Each immediate container label shall bear the following information:

(a) label information in accordance with commercial practice.
(b) the expiration date.

5.4.2.1.2 Unit package. Each unit package label shall bear the following:

(a) labeling information in accordance with commercial practice.
(b) the national stock number.
(c) extended potency lines.

Notes: (1) The national stock number shall not be preceded by any prefix.
(2) Strip labeling may be used.
(3) Label adhesion test shall not apply.

5.4.2.3 Intermediate package. Each intermediate package shall be marked as specified in PPP-C-186. Type II shelf life marking shall be shown as specified in MIL-STD-129. Marking shall include the legend: "STORE AT CONTROLLED ROOM TEMPERATURE (59°F - 86°F.)"

5.4.2.4 Exterior container. Exterior container shall be marked as specified in PPP-C-186. Type II shelf life marking shall be shown as specified in MIL-STD-129. Marking shall include the legend: "STORE AT CONTROLLED ROOM TEMPERATURE (59°F. - 86°F.)'

6. NOTES

6.1 Ordering data. Purchasers should select the preferred options permitted herein and include the following information in procurement documents:

(a) Title, number and date of this specification.
(b) the National Stock Number.
(c) Selection of applicable levels of packaging and packing (See 5.2 and 5.3).

6.2 This specification covers the following item appearing in the Federal Supply Catalog:

National Stock Number	Item Identification
6505-00-530-6469	BACITRACIN ZINC, NEOMYCIN SULFATE, AND POLYMYXIN B SULFATE OPHTHALMIC OINTMENT, 1/8 oz (3.5 Gram), 12s

STANDARDIZATION DOCUMENT IMPROVEMENT PROPOSAL

OMB Approval
No. 22-R255

INSTRUCTIONS: The purpose of this form is to solicit beneficial comments which will help achieve procurement of suitable products at reasonable cost and minimum delay, or will otherwise enhance use of the document. DoD contractors, government activities, or manufacturers/vendors who are prospective suppliers of the product are invited to submit comments to the government. Fold on lines on reverse side, staple in corner, and send to preparing activity. Comments submitted on this form do not constitute or imply authorization to waive any portion of the referenced document(s) or to amend contractual requirements. Attach any pertinent data which may be of use in improving this document. If there are additional papers, attach to form and place both in an envelope addressed to preparing activity.
