INTERIM FEDERAL SPECIFICATION

HOLDER, DESK MEMORANDUM PAPER, ROLL TYPE

This Interim Federal Specifications was developed by Standardization Division, Federal Supply Service, General Services Administration, Washington, D. C. 20406, based upon currently available technical information. It is recommended that Federal agencies use it in procurement and forward recommendations for changes to the preparing activity at the address shown above.

1. SCOPE

1.1 This specification covers a desk or counter-top holder designed for use with a roll of paper tape.

2. APPLICABLE DOCUMENTS

2.1 The following documents of the issue in effect on date of invitation for bids or request for proposal, form a part of this specification to the extent specified herein.

Federal Specifications:

L-P-396 - Plastic Molding Material and Plastic Extrusion Material, Polystyrene.
L-P-1183 - Plastic Molding Material, Acrylonitrile-Butadiene-Styrene (ABS) Rigid.
UU-T-110 - Tape, Paper, Computing-machine.
PPP-B-566 - Boxes, Folding, Paperboard.
PPP-B-636 - Box, Fiberboard.

Federal Standards:

Fed. Std. No. 123 - Marking for Domestic Shipment (civilian agencies).

(Activities outside the Federal Government may obtain copies of Federal Specifications, Standards, and Handbooks as outlined under General Information in the Index of Federal Specifications and Standards and at the prices indicated in the Index. The Index, which includes cumulative monthly supplements as issued, is for sale on a subscription basis by the Superintendent of Documents, U. S. Government Printing Office, Washington, D. C. 20402.

(Single copies of this specification and other Federal Specifications required by activities outside the Federal Government for bidding purposes are available without charge from Business Service Centers at the General Services Administration Regional Offices in Boston, New York, Washington, D. C., Atlanta, Chicago, Kansas City, Mo., Fort Worth, Denver, San Francisco, Los Angeles, and Seattle, Washington.

(Federal Government activities may obtain copies of Federal Specifications, Standards, and Handbooks and the Index of Federal Specifications and Standards from established distribution points in their agencies.)

Military Specification:

MIL-P-116 - Preservation, Methods of.

Military Standards:

MIL-STD-105 - Sampling Procedures and Tables for Inspection by Attributes.
MIL-STD-129 - Marking for Shipment and Storage.

(Copies of Military Specifications and Standards required by contractors in connection with specification procurement functions should be obtained from the procuring activity or as directed by the contracting officer.)

2.2 Other publications. The following documents form a part of this specification to the extent specified herein. Unless a specific issue is identified, the issue in effect on date of invitation for bids or request for proposal shall apply.

National Classification Board:

National Motor Freight Classification.

(Application for copies should be addressed to the American Trucking Association, Inc., Attention: Tariff Order Section, 1616 P Street, N. W., Washington, D. C. 20036.)

Uniform Classification Committee:

Uniform Freight Classification.

(Application for copies should be addressed to the Uniform Classification Committee, 202 Union Station, Chicago, Illinois 60606.)

Technical society and technical association specifications and standards are generally available for reference from libraries. They are also distributed among technical groups and using Federal agencies.

3. REQUIREMENTS

3.1 Material. The holder shall be fabricated from cold or hot rolled steel, or plastic which meets or exceeds the property values established for type III of L-P-396, or type I or IV of L-P-1183. Steel shall be not less than 0.021 inch in thickness, and plastic shall be not less than 0.070 inch in thickness. Rubber used for protective feet shall be natural, synthetic, or a suitable combination thereof. Rubber shall not produce dark marks on furniture.

3.2 Design and construction. The holder shall be open or closed style, and shall accommodate a 225 foot roll of 3-7/16 inch wide paper tape conforming to UU-T-110, type II. The holder shall be designed with a writing table at a convenient angle not exceeding 25 degrees from the horizontal, and the paper tape shall feed smoothly over the table by the user manually pulling the paper. At the option of the manufacturer, the holder may have a feed mechanism consisting of a shaft, rollers, and knob(s). The paper tape shall cross the writing table through two hold down bars which shall also function as paper entry and exit slots. The hold down bar at the exit slot shall function as a tear-off edge for expended paper. Each holder shall have four rubber feet to protect the surface on which the holder will rest. The rubber feet shall be designed to compress into insert holes on the bottom of the holder and retain their position without gluing. The feet may be assembled or packaged separately as specified in section 5.

3.3 Dimensions. The holder shall not exceed 10-1/2 inches in length, 4-3/4 inches in width, and 4 inches in height. The writing table shall be not less than 3-7/16 inches wide, and 3-3/4 inches in length.

3.4 Components or accessories. Holders fabricated from plastic shall have a pen or pencil holder. A pen or pencil, and paper tape are not component requirements of this specification.

3.5 Color and finish. Any solid color is acceptable, provided the color furnished is uniform within each lot offered for shipment. Steel holders shall be enameled, and shall be free from runs, wrinkles or thin spots. Hardware components of the metal holder (axle or spindle, etc.) not susceptible to enameling, shall be of corrosion resisting steel or shall have an electrodeposit coating.

3.6 Identification marking. The holder shall be marked with the manufacturer's name or trademark.

3.7 Workmanship. Holders fabricated from metal shall be free from burrs and rough or sharp edges. Plastic holders shall be free from warpage, scratches, tears or punctures. Workmanship shall be such as to preclude defects which might adversely affect appearance or impair serviceability.

4. QUALITY ASSURANCE PROVISIONS

4.1 Responsibility for inspection. Unless otherwise specified in the contract or purchase order, the supplier is responsible for the performance of all inspections as specified herein. Except as otherwise specified, the supplier may utilize his own facilities or any commercial laboratory acceptable to the Government. The Government reserves the right to perform any of the inspections set forth in the specification where such inspections are deemed necessary to assure that supplies and services conform to prescribed requirements.

4.2 Sampling.

4.2.1 Lot. A lot shall consist of all holders offered for inspection at one time.

4.2.2 Sampling of end item for visual examination. A random sample of holders shall be taken from each lot in accordance with MIL-STD-105, inspection level S-4. The acceptable quality level (AQL) shall not exceed 4.0 percent defective. The sample unit shall be one holder.

4.2.3 Sampling for preparation for delivery requirements. For examination of interior packages the sample unit shall be one shipping container fully prepared for delivery, and selected at random just prior to the closing operations. Sampling shall be in accordance with MIL-STD-105. Closure defects shall be examined on shipping containers fully prepared for delivery. The lot size shall be the number of shipping containers in the end item inspection lot. The inspection level shall be S-2 with an AQL of 4.0 defects per hundred units.

4.2.4 Sampling of end item for operational examination. A random sample of holders shall be taken from each lot in accordance with MIL-STD-105, inspection level S-1. The AQL shall not exceed 4.0 percent defective. The sample unit shall be one holder.

4.3 Examination.

4.3.1 Visual examination of end item. Samples taken in accordance with 4.2.2 shall be examined for defects listed in table I. Any sample containing one or more defects shall be rejected. The Government reserves the right to classify as a defect any departure from the specification not listed in table I.

TABLE I. Classification of holder defects

Examine	Defects
Writing table	Writing angle exceeds 25 degrees from horizontal. Incorrect number of paper hold down bars.
Dimensions	Dimensions of holder or writing table not as specified.
Rubber feet	Missing, or less than specified.
Finish (metal only)	Runs, wrinkles, or thin spots in finish.
Identification Marking	Marking missing, incomplete or not as specified.
Workmanship	Defects which adversely affect appearance or impair serviceability.

4.3.2 Examination of preparation for delivery. Samples selected in accordance with 4.2.3 shall be examined to determine that packaging, packing, and marking requirements of section 5 of this specification are complied with. Defects shall be scored in accordance with table II.

TABLE II. Classification of preparation for delivery defects

Examine	Defects
Markings (exterior and interior	Omitted; incorrect; illegible; improper size, location, sequence, or method of application.
Material	Any component missing or damaged.
Workmanship	Inadequate application of components such as incomplete closure of container flaps, loose strapping, inadequate stapling, or distortion of container.
Contents (exterior) container	Number per container is more or less than required; net weight exceeds requirements.

4.4 Performance test of the end item. Samples taken in accordance with 4.2.4 shall be examined for defects listed in table III. Each holder to be examined shall have the four rubber feet put in place, and filled with a full 225 foot roll of 3-7/16 inch wide paper tape conforming to type II, UU-T-110. A 12 to 15 inch portion of the tape shall be drawn across the writing table.

Check the source to verify that this is the current version before use.

TABLE III. Performance test defects

Examine	Defects
Installation of paper tape	Holder or writing table unable to accommodate the tape.
Feed	Paper tape becomes tangled, ripped, marked, or does not feed properly.
Feet	Not designed to compress into insert holes on the bottom of the holder and retain their position without gluing.

5. PREPARATION FOR DELIVERY

5.1 Packaging. Packaging shall be level A, B, or C, as specified (see 6.2).

5.1.1 Level A. Each holder, with rubber feet assembled or packaged in a paper envelope or polyethylene bag and closed in accordance with normal commercial practice, shall be packaged in a folding paperboard box conforming to Federal Specification PPP-B-566, style II, type A, class a. Each box shall be waterproofed in accordance with MIL-P-116, Method 1C-2.

5.1.2 Level B. Each holder shall be packaged in boxes specified in 5.1.1 except that waterproofing shall not be required.

5.1.3 Level C. Each holder, with rubber feet assembled or packaged in a paper envelope or plastic bag shall be packaged in a box of the type normally used for this item. The box shall be secured to prevent accidental opening.

5.2 Packing. Packing shall be level A, B, or C, as specified (see 6.2).

5.2.1 Level A. Twelve holders packaged as specified in 5.1.1, shall be packed in a snug-fitting fiberboard box conforming to Federal Specification PPP-B-636, class weather-resistant, grade V3c or V3s, style RSC. Closure and strapping shall be in accordance with the appendix of the container specification.

5.2.2 Level B. Twelve holders, packaged as specified in 5.1.2, shall be packed in a snug-fitting fiberboard box conforming to Federal Specification PPP-B-636, class domestic, grade 200 minimum. Sealing and closures shall be in accordance with the box specification.

5.2.3 Level C. Holders packaged as specified in 5.1.3 shall be packed in a manner to insure carrier acceptance and safe arrival at destination in compliance with Uniform Freight Classification or National Motor Freight Classification.

5.3 Marking (see 6.2).

5.3.1 Civil agencies. In addition to markings required by the contract or order, the unit and shipping containers shall be marked in accordance with Fed. Std. No. 123.

5.3.2 Military activities. In addition to markings required by the contract or order, the unit and shipping containers shall be marked in accordance with MIL-STD-129.

6. NOTES

6.1 Intended use. The holder covered by this specification is intended for desktop use in the recording of memoranda and notes.

6.2 Ordering data. Purchasers should select the preferred options permitted herein and include the following information in procurement documents.

(a) Title, number, and date of this specification.
(b) Applicable levels of packaging and packing, and applicable marking requirements (see 5.1, 5.2, and 5.3).
