TIER I ADOPTION NOTICE

OMG-SYSML-V2.0, "OMG Systems Modeling Language (SysML) Version 2.0", "Part 1: Language Specification" and "Part 2: SysML v1 to SysML v2 Transformation" were adopted on April 1, 2026, for use by the Department of War (DoW).

SysML is a general-purpose modeling language that facilitates model-based systems engineering. It provides the capability to create and visualize models that represent many different aspects of a system. This includes representing the requirements, structure, and behavior of the system, and the specification of analysis cases and verification cases used to analyze and verify the system. The language is intended to support multiple systems engineering methods and practices. The specific methods and practices may impose additional constraints on how the language is used.

The SysML v2.0 Part 1 specification defines the language used to construct models of systems (whether they are real, planned or imagined). SysML v2.0 based models shall be conformant to this standard. SysML v2 Part 2 describes a transformation for a semantic translation from SysML v1 to SysML v2.0 in a precise way and provides the rules on which automated conversions of SysML v1 models to the SysML v2.0 standard can be developed. SysML v2.0 modeling tool software purchased shall be conformant with these standards to the extent possible.

This SysML v2 standard was prepared by the Object Management Group Standards Development Organization and published in September 2025. A no cost download is available from https://www.omg.org/spec/SysML.

Proposed changes by DoD activities must be submitted to the DoD Adopting Activity at OUSW(R&E), Systems Engineering and Architecture, Digital Engineering, Modeling, and Simulation, 4800 Mark Center Drive, Suite 16F0902, Alexandria, VA 22308 or via email to osd.pentagon.ousd-r-e.mbx.sea@mail.mil with the subject line Attn: DEM&S.

Custodians:
OUSW(R&E) - SE
Army – AM
Navy – NM
Air Force – 01
DLA - DH

Adopting Activity:
OUSW(R&E) - SE
(Project MSSM-2026-002)

Area: MSSM

DISTRIBUTION STATEMENT A. Approved for public release: distribution is unlimited.
