DEFENSE STANDARDIZATION PROGRAM GUIDE FOR PARTS REQUIREMENTS AND APPLICATION

The Defense Standardization Program Office (DSPO) changed the status of SD-18 from active to legacy. This means the SD-18 will not be updated, but remains accessible on a website located at: https://www.navsea.navy.mil/Home/WarfareCenters/NSWCCrane/Resources/SD18.aspx. Please be cognizant of this status change when using SD-18.

The SD-18 is a guide that offers extensive information for the selection, design, procurement, and assessment of parts used in military systems. It was last updated in 2018.
