MILITARY SPECIFICATION

GRENADE, HAND, OFFENSIVE, MK3A2
PARTS FOR

Paragraph 2.1, SPECIFICATIONS, MILITARY: Delete "MIL-P-10025" in its entirety.

Paragraph 2.1, STANDARDS, MILITARY: Add "MIL-STD-1169 - Packaging, Packing and Marking for Shipment of Inert Ammunition Components".

Paragraph 2.1, DRAWINGS: Delete
"ORDNANCE CORPS
9215459 - Grenade, Hand, Offensive, MK3A2, Loading Assembly"
and substitute
"U. S. ARMY MUNITIONS COMMAND
9215464 - Body Arrangement".

Paragraph 2.1, PUBLICATIONS: Delete
"ORDNANCE CORPS
ET - 7153240 - Equipment Tabulation Number".
and substitute
"U. S. ARMY MUNITIONS COMMAND
ET - 9215464 - Equipment Tabulation Number".

Section 3. REQUIREMENTS: Add paragraph 3.4: "3.4 First article sample.- This specification makes provision for first article inspection. Requirements for the submission of first article samples by the contractor shall be as specified in the contract."

Paragraph 4.2: Delete "Initial production" and substitute "First article".

Paragraph 4.2.1: Delete "initial production" and substitute "first article" wherever it appears, then delete the word "an" when it precedes "first article" and substitute "a".

Check the source to verify that this is the current version before use.

Paragraph 4.2.3: Delete "initial production" and substitute "first article" wherever it appears, then delete the word "an" when it precedes "first article" and substitute "a".

Paragraph 4.3.2: Add at end of paragraph: "Contractor's sampling plans, if used, shall be approved by the Government and shall provide as a minimum, the protection afforded the Government by the sampling plans in MIL-STD-105."

Paragraph 4.3.2.3, delete "assembly" and substitute "arrangement".

Paragraph 4.3.2.4: Delete in its entirety.

Paragraph 4.3.3, delete "7153240" and substitute "9215464".

Paragraph 5.1.1, delete "Specification MIL-P-10025" and substitute "MIL-STD-1169".

Paragraphs 6.3, 6.3.1, 6.3.2, 6.3.3, 6.3.4, 6.3.5, 6.3.6, and 6.3.7: Delete and substitute as follows:

"6.3 Inspection equipment.-The contractor shall design inspection equipment as required by the referenced Equipment Lists (EL) in accordance with the instructions of paragraphs 6.3.1 through 6.3.7.

6.3.1 Equipment Lists.-Equipment part or identifying lists indicate the availability of inspection equipment designs by showing in the "number" column of the list of inspection equipment (SMUPA Form 1010) the numbers of drawings of existing equipment designs or codes as indicated in paragraph 6.3.2. Design action required of the contractor with respect to the different types of drawings that may be listed is described in paragraphs 6.3.3 through 6.3.6. Action required by the contractor with respect to commercial inspection equipment is described in 6.3.5. The contractor will be required to prepare detailed drawings in accordance with 6.3.6 for all the equipment coded as "Contractor Design" in the number column. These contractor designs must be approved by the Government prior to fabrication or procuring of the equipment. Designs shall be submitted for approval as specified in 6.3.7.

6.3.2 Inspection equipment list codes.-The inspection equipment as defined in 6.3.3, 6.3.5 and 6.3.6 will be designated in the EL by the following codes. Other inspection equipment listed on the EL and not coded are defined in 6.3.4.

MU - Army design, mandatory for use.
CD - Contractor design and/or commercial equipment on contractor format. (Requires submission for Government approval as specified in 6.3.7).

6.3.3 Army designs.-Army designs are reflected on detailed drawings which completely depict all the information necessary for the fabrication of the item of inspection equipment. The contractor need provide no design when an Army design is listed for an item of inspection equipment. Army designs fall into two basic classifications, mandatory and non-mandatory. When an equipment list references mandatory Army designs, the contractor shall comply with, and use these designs accordingly. The contractor may, however, in connection with non-mandatory designs and with the approval of the Government, design alternate inspection equipment or use comparable commercial equipment to facilitate his operations. Such contractor prepared designs (see 6.3.6) or commercial equipment selections (see 6.3.5) must be approved by the Government prior to fabrication or procuring of the equipment. Designs shall be submitted for approval as specified in 6.3.7.

6.3.4 Envelope drawing.-Envelope drawings depict the minimum equipment requirements in outline, descriptive, diagrammatic or pictorial form only and specify the required performance or other characteristics. Contractors must prepare detailed drawings (see 6.3.6) of their designs in support of envelope drawings. These contractor prepared designs must be approved by the Government prior to the fabrication or procuring of the equipment. Commercial equipment meeting the requirements of envelope drawings must be described in sufficient detail to permit identification and evaluation by the Government (see 6.3.5). Designs shall be submitted for approval as specified in 6.3.7.

6.3.5 Commercial equipment.-Commercial equipment is inspection equipment that has universal application for a specific function. It is comprised of items commonly used by industry and Government. Contractors normally are nottt reequired to furnish drawings of commercial inspection equipment, but a list of such equipment must be approved by the Government. When commercial inspection equipment requires the use of special fixturing, the design of this fixturing shall be considered as part of tne total design, and 6.3.6 shall apply. In the latter case, only those portions of the commercial equipment need be detailed in the designs as are necessary to completely fabricate, calibrate, and operate the total item of inspection equipment. Lists and fixturing designs shall be submitted for approval as specified in 6.3.7.

6.3.6 Contractor designs.-Contractor designs are designs of inspection equipment for which the Government has assigned design responsibility to the contractor. Contractor designs shall be supported by detailed drawings which depict all information necessary to completely fabricate, calibrate and operate an item of inspection equipment. This requires that the necessary views, dimensions, materials, finishes, notes, and operating and calibration instructions be properly depicted in accordance with approved practices to the extent that further calculation or clarification will not be required. Unless otherwise specified, contractor designs may be developed on the format the contractor normally employs in his equipment design procedure provided such format reflects the detail and information specified above, subject to the following controls: All submitted contractor designs shall conform to Specification MIL-D-1000, Category E, Form 2. Legibility and reproducibility shall permit conventional making of clearly understandable, high contrast reproductions. Contractors shall submit one copy of final designs as a rolled set. Designs shall be submitted for approval as specified in 6.3.7.

6.3.7 Submission of contractor designs.-Unless otherwise specified on the EL, all designs of equipment for inspection of defects classified as critical and major shall be submitted for approval to the Commanding Officer, Picatinny Arsenal, ATTN: SMUPA-ND. All other designs of inspection equipment shall be approved by the inspection element of the agency administering the contract; submission shall be as directed by the Contracting

Officer. All submitted designs shall contain a reference to the applicable five digit Code Number contained in Section 4 of this specification and the appropriate component or assembly drawing number and revision letter to which the specific design applies. Partial submission of inspection equipment designs is permissible and encouraged. However, the Arsenal completion date for design review will be based on the date of the final submission of designs. Picatinny Arsenal design review will be accomplished normally within one month after receipt."

Paragraph 6.4: Delete and substitute: "6.4 Submission of ammunition data cards.- In addition to the normal distribution of records, one copy of all ammunition data cards shall be forwarded to each of the following:

Commanding Officer
Picatinny Arsenal
Dover, New Jersey 07801
ATTN: (1) SMUPA-ND5
(2) SMUPA-DC."

Custodian:
Army-MU

Preparing activity:
Army-MU

Project Number: 1330-A-107
