INTERIM FEDERAL SPECIFICATION

MIXING MACHINES, FOOD, ELECTRIC

(VERTICAL, COMMERCIAL TYPE, BAKERY AND KITCHEN)

This amendment was developed by the U.S. Army Natick Research, Development and Engineering Center (GL), Natick, MA 01760-5014, based upon currently available technical information. The General Services Administration has authorized this amendment as part of OO-M-0038K(Army-GL), dated October 25, 1985.

PAGE 3

2.1, under "Military Standards": Add the following:

"MIL-STD-167/1 - Mechanical Vibrations of Shipboard Equipment (Type I - Environmental and Type II - Internally Excited).

"MIL-STD-1472 - Human Engineering Design Criteria for Military Systems, Equipment and Facilities."

PAGE 6

Add the following new paragraph:

"3.4.2 Human Factors Criteria (for Navy use only). Human factors engineering criteria, principles and practices, as defined in MIL-STD-1472, shall be incorporated into the design of the mixing machines. The equipment shall be designed such that all maintenance and operational activities shall permit safe and efficient performance by the 5th percentile female to the 95th percentile male as defined in MIL-STD-1472. Sufficient clearance or free area shall be provided around an item so that an individual with applicable body dimensions and physical capabilities can safely operate, maintain, remove or replace that item. When establishing accessibility requirements, both physical and visual access must be provided along with access for any tools or test equipment. All controls or switches needed for operation or maintenance shall be selected and integrated into the machines so as to meet the applicable requirements of MIL-STD-1472. When inspecting for defects and performing tests (see section 4), the equipment shall adhere to the human factors engineering considerations listed herein."

AMSC N/A FSC 7320

DISTRIBUTION STATEMENT A. Approved for public release; distribution is unlimited.

PAGE 8

3.6.5, after last sentence: Add "When specified for shipboard use, requirements and test limits of class A4 for surface ships and class A5 for submarines of MIL-STD-461 apply. Shipboard equipment shall meet the emission and susceptibility requirements for CE01, CE03 and RE02."

PAGE 15

Add the following new paragraph:

"3.11.3 Environmental suitability. When specified for shipboard use (see 6.2), mixers shall be capable of withstanding ship vibration. Controls, switches, moving parts and electrical circuits shall operate under shipboard conditions without malfunction, binding, excessive looseness, or damage when tested as specified in 4.4.10."

PAGE 19

4.2.4.1, line 2: Delete "4.4.9" and substitute "4.4.10".

PAGE 22

4.4.5, after the first sentence: Add "For shipboard mixing machines test in accordance with test method CE01, CE03 and RE02 of MIL-STD-462."

Add the following new paragraph:

"4.4.10 Shipboard environmental test. The mixer under normal operating conditions, shall be tested in accordance with MIL-STD-167/1, type I equipment. The mixer shall be secured to the test machine in the same manner that it will be secured on shipboard (see 3.11.1). Failure of the mixer to perform its function during and after testing, or to meet the requirements of 3.11.3 shall constitute failure of this test."

PAGE 26

6.2u., line 2: Delete "3.11" and substitute "3.6.6 and 3.11".

PAGE 27

Add the following new paragraph:

"6.5 Technical manuals. The requirement for technical manuals should be considered when this document is cited in a contract. If technical manuals are required, a contract exhibit must be prepared to fully describe statement of work criteria and delivery instructions, and cite the applicable technical manual requirements. The technical manual must be acquired by separate Contract Line Item (CLIN) in the contract."
