INCH-POUND

OO-M-0038K
INT. AMENDMENT 2(SH)
3 JUNE 1992
USED IN LIEU OF
AMENDMENT 1
12 FEBRUARY 1988

FEDERAL SPECIFICATION

MIXING MACHINES, FOOD, ELECTRIC
(VERTICAL, COMMERCIAL TYPE, BAKERY AND KITCHEN)

This interim amendment was developed by the Naval Sea Systems Command, Washington, DC 20362-5101 based upon currently available technical information. It is recommended that Federal agencies use it in procurement and forward recommendations for changes to the preparing activity at the address shown above.

The General Services Administration has authorized the use of this interim amendment as a valid exception to OO-M-0038K, dated 25 October 1985.

PAGE 3

2.1, under "Military Standards", add the following:

"MIL-STD-167/1 - Mechanical Vibration of Shipboard Equipment (Type I - Environmental and Type II - Internally Excited)
MIL-STD-1472 - Human Engineering Design Criteria for Military Systems, Equipment and Facilities."

Add the following new paragraph:

"3.4.2 Human Factors Criteria (for Navy use only). Human factors engineering criteria, principles and practices, as defined in MIL-STD-1472, shall be incorporated into the design of the mixing machines. The equipment shall be designed such that all maintenance and operational activities shall permit safe and efficient performance by the 5th percentile female to the 95th percentile male as specified in 5.6 and 5.9 of MIL-STD-1472. Sufficient clearance or free area shall be provided around an item so that an individual with applicable body dimensions and physical capabilities can safely operate, maintain, remove or replace that item. When establishing accessibility requirements, both physical and visual access must be provided, along with access for any tools or test equipment. All controls or switches needed for operation or maintenance shall be selected and integrated into the machines so as to meet the applicable requirements as specified in 5.4 of MIL-STD-1472. When inspecting for defects and performing tests (see section 4), the equipment shall adhere to the human factors engineering considerations listed herein."

3.6.5, at the end of paragraph, add:

"When specified, requirements and test limits of class A4 for surface ships and class A5 for submarines of MIL-STD-461 apply. Shipboard equipment shall meet the emission and susceptibility requirements for CE01, CE03 and RE02."

Add the following new paragraphs:

"3.11.3 Environmental suitability. When specified for shipboard use (see 6.2), mixers shall withstand ships vibration. Controls, switches, moving parts and electrical circuits shall operate under shipboard conditions without malfunction, binding, excessive looseness, or damage when tested as specified in 4.4.10.

3.11.4 High voltage labels. When specified for shipboard use (see 6.2), a Danger High Voltage label shall be affixed to the equipments outer case assembly, on or adjacent to each service access cover and adjacent to one of the fasteners which secures the cover. A high voltage warning label shall also be placed near the high voltage components inside the equipment. The label shall include but is not limited to the following warnings:

a. A warning of high voltage.
b. Power supply must be disconnected before using.
c. Access covers must be in place during use.
d. Servicing shall be done by authorized individuals."

PAGE 19

4.2.4.1, line 2, delete "4.4.9" and substitute "4.4.10".

PAGE 22

4.4.5, after the first sentence, add: "For shipboard mixing machines, test in accordance with test method CE01, CE03 and RE02 of MIL-STD-462."

Add the following new paragraph:

"4.4.10 Shipboard environmental test. The mixer, under normal operating conditions, shall be tested in accordance with MIL-STD-167/1, Type I equipment. The oven shall be secured to the test machine in the same manner that it will be secured on shipboard (see 3.11.1). Failure of the mixer to perform its function during and after testing, or meeting requirements of 3.11.3 shall constitute failure of this test."

PAGE 26

6.2 (u), delete "3.11" and substitute "3.6.6 and 3.11".

PAGE 27

"6.2.2 Technical manuals. The requirement for technical manuals should be considered when this document is cited on a contract. If technical manuals are required, a contract exhibit must be prepared to fully describe statement of work criteria and delivery instructions, and cite the applicable technical manual. The technical manuals must be acquired by separate Contract Line Item Number (CLIN) in the contract."

NOTE: The margins of this amendment are marked with an asterisk or vertical lines to indicate where changes (additions, modifications, corrections, deletions) from the previous amendment were made. This was done as a convenience only and the Government assumes no liability whatsoever for any inaccuracies in these notations. Bidders and contractors are cautioned to evaluate the requirements of this document based on the entire content irrespective of the marginal notations and relationship to the last previous amendment.
