INCH-POUND

MIL-P-20486A(AR)
AMENDMENT 1
22 August 1990

MILITARY SPECIFICATION

PRIMER ELEMENTS, DETONATORS AND RELAYS
METAL PARTS FOR

This amendment forms a part of Military Specification MIL-P-20486A, dated 21 May 1953, and is approved for use by the U.S. Army Armament, Munitions and Chemical Command and is available for use by all Departments and Agencies of the Department of Defense.

PAGE 2

Add paragraph 3.6.1 as follows:

3.6.1 Combined cleaning and brightening of components (Alternate method). The metal pats shall be thoroughly cleaned by a tumbling process which will leave them free of chips, dirt, grease, drawing compound, and other foreign material. The exterior and interior surfaces of the metal parts shall be free of stains and other evidence of attack by the cleaning agents used. Immediately following the cleaning operation, the parts shall be rinsed. This rinse shall be followed by a brightening operation where the parts are tumbled in a solution of 5 percent nominal commercial sulphuric acid, rinsed, inspected for cleanliness and brightness, then dried.
