MIL-S-20568
7 January 1952

MILITARY SPECIFICATION

SHELL, HEAT, 57MM., M307A1,
METAL PARTS FOR

This specification was approved by the Departments of the Army, the Navy, and the Air Force for use of procurement services of the respective Departments, and supersedes the following specification:

Army PXS-1130
24 July 1944

This specification consists of this cover sheet and Specification PXS-1130, dated 24 July 1944, together with Amendment 2, dated 26 October 1951, attached hereto, without modification.

When a request for this specification is received by a supplying activity it will be necessary to attach this cover sheet to the pertinent specification before issue.

Copies of specifications required by contractors in connection with specific procurement functions should be obtained from the procuring agency or as directed by the contracting officer.

Picatinny Arsenal
Tentative Specification

PXS-1130
24 July 1944

SHELL, H.E.A.T., 57 MM., T20E2, METAL PARTS FOR.

A. APPLICABLE SPECIFICATIONS.

A-1. The Ordnance Department drawing, No. 75-2-353, and all drawings and specifications listed or referred to thereon, together with the following specifications form a part of this specification:

U.S.A. Specification No. 50-0-1 - General Specification for Ammunition Except Small Arms Ammunition.
Federal Specification QQ-M-151 - Metals; General Specification for Inspection of.
U.S.A. Specification No. 100-2 - Standard Specifications for Marking Shipments.
U.S.A. Specification No. 50-30-1 - Shell, Steel, Manufactured from Forgings.

A-2. All drawings and specifications shall be of the issue in effect on the date of invitation for bids.

B. TYPE

B-1. This specification covers metal parts for one type of shell.

C. MATERIAL AND WORKMANSHIP.

C-1. Materials and parts shall be in accordance with applicable specifications and drawings.

C-2. All parts shall be free from chips, dirt, grease, and other foreign material. When cleaning is necessary, the method used shall not be injurious to any of the parts nor shall the parts be contaminated by the cleaning agents used.

C-3. The liner shall be smooth and free from scores, pits, and other surface imperfections which affect the serviceability of the liner. Slight evidence of the successive draws (draw rings) on the exterior surface of the cone is not an objectionable imperfection. After crimping the liner into the shell the liner shall be smooth and free from splits or cracks.

D. GENERAL REQUIREMENTS.

D-1. See Section E.

E. DETAIL REQUIREMENTS.

E-1. The shell shall meet all requirements prescribed on the drawings and in applicable specifications.

Check the source to verify that this is the current version before use.

F. METHODS OF SAMPLING, INSPECTION, AND TESTS.

F-1. Inspection.-Inspection shall be as specified in United States Army General Specification for Ammunition Except Small Arms Ammunition, No. 50-0-1.

F-2. Size of lots.-Parts for 20,000 shell, maximum. A smaller quantity may constitute a lot at the discretion of the contracting officer. Parts for 5,000 plus or minus 500 shell shall constitute the first lot manufactured on any contract except when a new contract immediately follows the manufacture of satisfactory material of the same character.

G. PACKAGING, PACKING, AND MARKING.

G-1. Packing.-

G-1a. Unless otherwise specified by the contracting officer, the shell parts shall be delivered in standard commercial containers so constructed as to insure acceptance by common or other carrier for safe transportation, at the lowest rate, to the point of delivery. The packing container shall be sufficiently rigid to withstand transportation and permit storing in tiers at least 10 feet high without damage to the containers or contents. The gross weight of each container and the parts to be packed therein shall be specified in the contract. Lot number of contents shall be marked plainly on each container.

G-1b. Data cards.-Data cards, 5 x 8 inches, made of commercial manila tag board, approximately 200 pounds ream weight, shall be prepared for each lot of accepted shell in accordance with the form specified below. Two of these cards completely filled out for each lot shall accompany each shipping ticket, and six cards completely filled out shall be furnished the inspector.

DATA CARD

Kind: Lot No. _____
Quantity in Lot _____
Drg. No. _____ Rev. _____ Spec. No. _____ Rev. _____
Manufactured by _____ Date _____
Contract No. _____ Order No. _____
Packed _____ in a box.
Remarks: _____

Certified to by _____, Inspector.
Print here name of inspector, district, arsenal, or loading plant, and subdistrict where applicable.

G-2. Marking.-The marking for shipment shall be in accordance with U. S. Army Standard Specifications for Marking Shipments, No. 100-2.

Note.-Copies of this specification may be obtained from Commanding Officer, Picatinny Arsenal, Dover, New Jersey.
