MILITARY SPECIFICATION SHEET

FIXTURES, LIGHTING; BALLAST, FOR ONE 20-WATT T-12 FLUORESCENT LAMP

This specification sheet is approved for use by the Naval Sea Systems Command and is available for use by all Departments and Agencies of the Department of Defense.

The complete requirements for acquiring the fixtures described herein shall consist of this document and the latest issue of MIL-F-16377(SHIPS).

(A) FIGURE 1. Ballast for one 20-watt T-12 fluorescent lamp.

TABLE I. Ballast rating and general information.

Military Part Number MI6377/44	Rating Volts	Amperes	Hertz	National Stock Number (NSN)	Remarks
001 1/	118	0.38	60	6250-00-569-9502	Standard
002	118	0.38	60		Heat Resistant
003	118	0.38	400		Standard
004	118	0.38	400		Heat Resistant

1/ Previously covered by MS16571

All dimensions in inches.
For tolerances, other than specified herein, see paragraph 3.5.2 of MIL-F-16377.

REQUIREMENTS:

DESIGN:

Dimension and configurations: See figure 1.

(A) Assembly: The ballast shall consist of a laminated iron core and coil, integrally assembled and conforming to the dimensions and requirements shown herein. The ballast shall have a standard rating. Commercial U. L. approved ballast may be furnished if it conforms to the dimensions and requirements specified herein.

Slot: Slot shall be added when part is furnished as a repair part, otherwise, slot is optional. This is required only when cover is even with end of laminations.

[illegible] rating: The assembled ballast shall be submerged in coil varnish for sufficient time to insure [illegible] and baked. Impregnation is not required if nylon coated magnet [illegible] coated laminations, and prepainted covers are used.

Marking: Ballast shall conform to marking requirements and color coding of leads as specified in the applicable paragraph of American Standards Association (ASA) standard for "fluorescent lamp ballasts, number C82.1."

Label: Label shall be in accordance with type I except as specified herein.

[illegible]

Quality assurance shall be as specified in MIL-F-16377 and as follows:

First article inspection:	See table II
Quality conformance:	
Comparison inspection:	Same as the first article inspection
Inspection of product for delivery:	(See table II for test procedures)
Examination:	See MIL-F-16377
Examination for preparation of delivery:	See MIL-F-16377

Quality conformance tests:

(a) Power output (except ratio peak current to r.m.s. current).
(b) Dielectric withstanding voltage.
(c) Insulation resistance.
(d) Voltage drop across ballast.

GENERAL INFORMATION:

Assignment of Military part numbers and general information is shown in table I.

TABLE II. First article and comparison inspection.

Tests	Requirement paragraph	Test paragraph	Remarks
Examination	3.13	4.5	3/
Performance	1/	2/	3/
(a) Power output			
(b) Regulation			
(c) Noise			
(d) Voltage drop across ballast			
Dielectric withstanding voltage	3.6.15	4.8.2	3/
Insulation resistance	3.6.16	4.8.3	3/

1/ The performance of the ballasts shall be in conformance with the requirements listed in the applicable paragraph of ASA standard for "fluorescent lamp ballasts, number C82.1" except that the voltage drop across the ballast shall be not less than 84 volts.

2/ Test procedure for performance shall be as follows:
(a) Performance tests shall be made in accordance with ASA standard "methods of measurement of fluorescent lamp ballast, number C82.2."
(b) Fluorescent lamp reference ballasts shall be in conformance with ASA standard for "fluorescent lamp reference ballasts, number C82.3."
(c) Lamps shall conform with approved ASA standard "dimensional and electrical characteristics of preheat start fluorescent lamps, number C78.406."
(d) Voltage across starter terminals and across ballast, when supplying a reference lamp, shall be measured.

3/ Sample lot size for inspection shall consist of five ballasts.

INSTRUCTIONS: In a continuing effort to make our standardization documents better, the DoD provides this form for use in submitting comments and suggestions for improvements. All users of military standardization documents are invited to provide suggestions. This form may be detached, folded along the lines indicated, taped along the loose edge *(DO NOT STAPLE)*, and mailed. In block 5, be as specific as possible about particular problem areas such as wording which required interpretation, was too rigid, restrictive, loose, ambiguous, or was incompatible, and give proposed wording changes which would alleviate the problems. Enter in block 6 any remarks not related to a specific paragraph of the document. If block 7 is filled out, an acknowledgement will be mailed to you within 30 days to let you know that your comments were received and are being considered.

NOTE: This form may not be used to request copies of documents, nor to request waivers, deviations, or clarification of specification requirements on current contracts. Comments submitted on this form do not constitute or imply authorization to waive any portion of the referenced document*(s)* or to amend contractual requirements.
