MILITARY SPECIFICATION

VALVES, INLET, LIFE RAFT

This amendment forms a part of Military Specification MIL-V-8883B dated 10 June 1965, and is approved for use by all Departments and Agencies of the Department of Defense.

Page 1

2.1 SPECIFICATIONS, under "Federal", add the following:

"MMM-A-139 Adhesive, Natural or Synthetic - Natural Rubber"

2.1 SPECIFICATIONS, under "Military", delete the following:

"MIL-A-5539 Adhesive, Natural Rubber or Synthetic Natural Rubber

MIL-V-25492 Valve, Inflation, One-Man Life Raft"

Page 2

3.1 Delete the paragraph and substitute the following:

"3.1 First article. Unless otherwise specified, the life raft inlet valves furnished under this specification shall be a product which has been inspected and has passed the first article inspection specified in 4.3 through 4.3.2."

4.1 through 4.3.1 inclusive, delete in their entireties and substitute the following:

"4.1 Responsibility for inspection. Unless otherwise specified in the contract or purchase order, the supplier is responsible for the performance of all inspection requirements as specified herein. Except as otherwise specified in the contract or order, the supplier may use his own or any other facilities suitable for the performance of the inspection requirements specified herein, unless disapproved by the Government. The Government reserves the right to perform any of the inspections set forth in the specification where such inspections are deemed necessary to assure supplies and services conform to prescribed requirements.

"4.2 Classification of inspection. The examination and testing of the life raft inlet valves shall be classified as follows:

a. First article inspection. First article inspection consists of examinations and tests performed on samples which are representative of the production item after award of a contract to determine that the production item meets the requirements of this specification (see 4.3 through 4.3.2).

b. Quality conformance inspection. Quality conformance inspection consists of examinations and tests performed on individual products or lots to determine conformance of the products or lots to the requirements set forth in this specification (see 4.4 through 4.4.1.2).

"4.3 First article.

"4.3.1 First article samples. Unless otherwise specified, as soon as practicable after the award of the contract or order, the manufacturer shall submit five inlet valves. The samples shall be representative of the construction, workmanship, components, and materials to be used during production. When a contractor is in continuous production of these inlet valves from contract to contract, submission of further first article samples on the new contract may be waived at
