MILITARY SPECIFICATION

INDICATORS, AIR-CLEANER, INTAKE, RESTRICTION

MECHANICAL TYPE

This amendment forms a part of MIL-I-52487B(ME), dated 24 January 1983, and is approved for use within the USA Belvoir Research, Development, and Engineering Center, Department of the Army and is available for use by all Departments and Agencies of the Department of Defense.

PAGE 2

2.1.1, under STANDARDS, MILITARY, delete "MIL-STD-1188" in its entirety.

Insert the following new paragraph :

"2.2 Other publications. The following document forms a part of this specification to the extent specified herein. Unless otherwise specified, the issues of the documents which are DOD adopted shall be those listed in the issue of the DoDISS specified in the solicitation. Unless otherwise specified, the issues of documents not listed in the DoDISS shall be the issue of the nongovernment documents which is current on the date of the solicitation.

AMERICAN SOCIETY FOR TESTING AND MATERIAIS (ASTM)

D 3951 - Standard Practice for Commercial Packaging.

(Application for copies should be addressed to the American Society for Testing and Materials, 1916 Race Street, Philadelphia, PA 19103.)

(Nongovernment standards and other publications are normally available from the organizations which prepare or which distribute the documents. These documents also may be available in or through libraries or other informational services.)"

PAGE 3

3.5.2, delete in its entirety and substitute:

"3.5.2 Warning signal. The warning signal shall be bright red in color and shall be activated directly by an increase in suction pressure. The warning signal shall become visible only when the suction pressure has reached the "maximum signal point" as defined in table I. The warning signal shall lock in place at the "maximum signal point". The indicator shall be provided with a manual reset button which will return the warning signal to the starting position when suction is removed."

DISTRIBUTION STATEMENT A. Approved for public release; distribution is unlimited
