QPL-55433
NOTICE 1
23 JUNE 1967

QUALIFIED PRODUCTS LIST

FSC 5930

OF

PRODUCTS QUALIFIED UNDER MILITARY SPECIFICATION

MIL-S-55433

SWITCH CAPSULES, DRY REED TYPE,

GENERAL SPECIFICATION FOR

GOVERNMENT DESIGNATION	MANUFACTURER'S DESIGNATION	TEST OR QUALIFICATION REFERENCE	MANUFACTURER'S NAME & ADDRESS

As of 23 June 1967, no switch capsules have been tested and qualified under MIL-S-55433. Pending the establishment of a Qualified Products List or the approval of a product for inclusion on the Qualified Products List, or for those products which have not been approved for listing after a Qualified Products List has been established, the qualification requirements (paragraphs 3.2 and 6.3) of MIL-S-55433 shall be waived for Military Procurements. However, switch capsules furnished under MIL-S-55433 shall be capable of meeting the qualification tests, and procuring agencies should require contractors to furnish preproduction samples, along with test data, of switch capsules that they propose to supply for Government inspection and contractual approval.

When a Qualified Products List is established for all products under MIL-S-55433, this Notice should be destroyed.

If a supplier desires to have his preproduction test data also considered for qualification, he must notify DESC-EQ immediately upon award of contract and prior to the start of any testing. The activity responsible for the establishment of QPL-55433 is the U. S. Army Electronics Command, Fort Monmouth, New Jersey 07703; however, information pertaining to qualification of products may be obtained from the Defense Electronics Supply Center (DESC-EQ), Dayton, Ohio 45401.
