OFFICE OF THE ASSISTANT SECRETARY OF DEFENSE WASHINGTON 25, D. C.

3 September 1954

Supply and Logistics

Architectural Symbols

MIL-STD-14A

1. This standard has been approved by the Department of Defense for use by the Departments of the Army, the Navy, and the Air Force.

2. In accordance with established procedure, the Standardization Division has designated the Corps of Engineers, Bureau of Yards and Docks and the Air Force, respectively, as Army-Navy-Air Force custodians of this standard.

3. This standard is mandatory for use effective 3 November 1954 by the Departments of the Army, the Navy, and the Air Force.

4. Recommended corrections, additions, or deletions should be addressed to the Standardization Division, Office of the Assistant Secretary of Defense (Supply and Logistic), Washington 25, D. C.

1. SCOPE

1.1 *Coverage.*—This standard establishes a listing of architectural symbols that shall be used in the preparation of architectural working drawings. The symbols are those most commonly employed. Additional symbols may be used wherever necessary, and the listed symbols may be modified to fit specific structural conditions.

1.2 *Limitation.*—Representation of a symbol under a certain structural condition does not mean that the symbol is limited to use under this structural condition. When there is no change in symbol because of structural conditions, it is shown under only one structural condition.

2. REFERENCE DOCUMENTS

Not applicable.

3. DEFINITIONS

Not applicable.

4. GENERAL REQUIREMENTS

4.1 *Notation.*—When there is any doubt as to the meaning of a symbol, always notate.

4.2 *Scale.*—Symbols for windows, doors, louvers, etc., are illustrated as used in drawings of scale $\frac{1}{8}'' = 1' - 0''$ When drawings are made smaller than this scale, the symbols may be simplified as long as the basic idea is retained. When drawings are made larger than this scale, the symbols should be presented in greater detail.

4.3 *Mechanical symbols.* — For mechanical symbols used on architectural drawings, see MIL-STD-17, Military Standard for Mechanical Symbols.

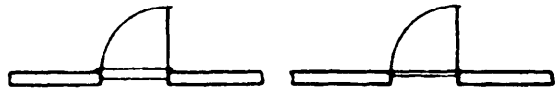

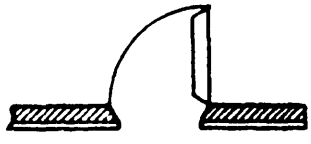

4.4 *Electrical symbols.*—For electrical symbols used on architectural drawings, see MIL-STD-15A, Military Standard for Electrical and Electronic Symbols.

4. *Sectioning conventions.*—For sectioning conventions used on architectural drawings for indicating materials, see JAN-STD-1, National Military Establishment Standard for General Drawing Practice.
