MILITARY SPECIFICATION

PRIMER, PERCUSSION, M1A2 LOADING, ASSEMBLING AND PACKING

This Amendment forms a part of Military Specification MIL-P-60053 (MU), 11 September 1964.

Paragraph 2.1, SPECIFICATIONS, MILITARY: Delete reference to MIL-I-45208.

Paragraph 2.1, STANDARDS, MILITARY: Add "MIL-STD-1168 — Lot Numbering of Ammunition."

Paragraph 4.1.1: Delete in its entirety.

Paragraph 4.2.1: Delete this paragraph in its entirety and substitute:

"4.2.1 *Lot formation.* The term 'lot' as used throughout this specification refers to an inspection lot, which is defined as an essentially homogeneous collection of units of product from which a representative sample is drawn and inspected to determine conformance of the lot with applicable requirements. The sample selected shall represent only that quantity of units from which the sample was drawn and shall not be construed to represent any prior or subsequent quantities presented for inspection. Homogeneity shall be considered to exist provided the lot has been produced by one manufacturer, in one unchanged process, in accordance with the same drawing, same drawing revision, same specification and same specification revision. Changes to the process, specification or drawing not affecting safety, performance, interchangeability, or storage, as determined by the Government, shall not be deemed to alter the homogeneity of the lot. Inspection lots shall comply with MIL-STD-105 and shall be numbered in accordance with MIL-STD-1168. Unless otherwise approved by the contracting officer, the inspection lot size of end items deliverable under the contract shall be not less than the smallest weekly estimate of quantities contractually scheduled for production during the contract period nor more than the largest monthly quantity contractually scheduled for delivery during the contract period. Inspection lots for components or subassemblies, other than the items of delivery, shall be homogeneous and of a size mutually convenient to both the contractor and the Government inspector. Each lot shall contain —

(a) Metal parts of one lot interfix number from one manufacturer.

(b) Black powder of one lot number from one manufacturer.

(c) Percussion primers of one lot interfix number from one manufacturer."

Paragraph 6.3.7: Delete and substitute:

"6.3.7 *Submission of contractor designs.* Unless otherwise specified on the EL, all designs of equipment for inspection of defects classified as critical and major shall be submitted for approval to the Commanding Officer Picatinny Arsenal, ATTN: SMUPA-ND. All other designs of inspection equipment shall be approved by the inspection element of the agency administering the contract; submission shall be as directed by the contracting officer. Partial submission of inspection equipment designs is permissible and encouraged. However, the Arsenal completion date for design review will be based on the date of the final submission of designs. Picatinny Arsenal design review will be accomplished normally within one month after receipt."

Paragraph 6.6, 6.6.1 and 6.6.2: Delete these paragraphs in their entirety.
