INCH-POUND
MIL-S-10058H (AR)
AMENDMENT 4
04 March 1996
SUPERSEDING
AMENDMENT 3
12 February 1993

MILITARY SPECIFICATION

SIMULATOR, PROJECTILE, GROUND BURST, M115A2 PARTS FOR AND LOADING, ASSEMBLING AND PACKING

This Amendment forms a part of Military Specification MIL-S-10058H (AR), dated 3 February 1982, and is approved for use within the U.S. Army Armament, Research, Development and Engineering Center and is available for use by all Departments and Agencies of the Department of Defense.

* 4.4.3.1: Table II. Delete "Flash Charge or ingredients" and substitute "Flash Composition or ingredients".

4.4.3.2: Determination of granulation and composition.

Delete drawing number: "/9345136" (two places).

* Delete"Photoflash Charge" substitute "Flash Composition".

* Table III. Delete "(see dwg. 8865588)" and substitute "(see Dwg. 1272326)", twice.

Page 26

4.4.3.3.1:

Line 3: Delete "eighty (80)" substitute "fifty (50)".

Line 4: Delete "From each lot" and substitute "For this test and every fourth (4th) lot thereafter."

4.4.3.2: Delete in its entirety.

PAGE 29

* 4.5.1.2 Delete in its entirety and substitute:

"4.5.1.2 Flash Composition. Determination of moisture content of the flash composition shall be performed by transferring a 5 gram sample to a tared weighing dish. Weigh the dish and the contents and then place in an oven maintained at a 100 degrees Centigrade for three (3) hours. Cool in a desiccator and weigh. Calculate the loss in weight of the dish and contents as percentage of moisture in the sample."

Note: Moisture content shall be controlled as specified in 4.4.3.1. For verification, a sample shall be taken from the contents of a "dummy" body used in conjunction with the loading of the simulators. Moisture content shall be determined as specified above.

* Add new para. 4.5.1.4:

"4.5.1.4 Alternate Method (for flash composition and felt, paper produces and carton packing material). The moisture content shall be determined in

accordance with Method T101.4 of MIL-STD-286. Timer shall be set to the minimum time required to obtain constant readings. Temperature settings shall be 100 +/- 5 degrees Centigrade."

* 4.5.2.1:

Delete "and with the requirements ... MIL-P-48239."

Add: "Note: In order to avoid the dangerous operation of screening the flash composition, the contractor may perform this test by screening the individual ingredients prior to blending."

4.5.2.2 Composition of pyrotechnic powder. Delete drawing number: "/9345136".

PAGE 32

6.5 Add: "Outer tube wrinkles. Wrinkles in the outer tube within one-half (.5) inch of the crimp shall be acceptable provided there is no damage to the tube, i.e., (cuts, holes or tears)."

6.6 Functioning test summary.

	First Three Consecutive Acceptable Samples	Reduce Samples
Test jumble	Delete "80" substitute "50"	Delete "32"

The margins ot this amendment are marked with an asterisk or vertical line to indicate where changes (additions, modifications., corrections, deletions) from the previous amendment were made. This was done as a convenience only and the Government assumes no liability whatsoever for any inaccuracies in these notations. Bidders and contractors are cautioned to evaluate the requirements of this document based on the entire content irrespective of the marginal notations and relationship to the last previous amendment.
