MILITARY SPECIFICATION

CABLE ASSEMBLY, SPECIAL PURPOSE, ELECTRICAL

This specification is mandatory for use by all Departments and Agencies of the Department of Defense.

1. SCOPE

1.1 This specification covers special purpose cable assemblies for use with cautery handles.

2. APPLICABLE DOCUMENTS

2.1 The following documents of the issue in effect on date of invitation for bids or request for proposal, form a part of the specification to the extent specified herein:

SPECIFICATIONS

Federal

MMM-A-250	Adhesive, Water-Resistant (For Sealing Fiberboard Boxes).
PPP-B-566	Boxes, Folding, Paperboard.
PPP-B-585	Boxes, Wood, Wirebound.
PPP-B-601	Boxes, Wood, Cleated-Plywood.
PPP-B-621	Boxes, Wood, Nailed and Lock-Corner.
PPP-B-636	Box, Fiberboard.
PPP-B-676	Box, Setup.
PPP-T-76	Tape, Pressure-Sensitive Adhesive Paper, (for Carton Sealing).

Military

MIL-P-116	Preservation Methods of.

STANDARDS

Military

MIL-STD-105 Sampling Procedures and Tables for Inspection by Attributes.
MIL-STD-129 Marking for Shipment and Storage.

(Copies of specifications, standards, and drawings required by suppliers in connection with specific procurement functions should be obtained from the procuring activity or as directed by the contracting officer.)

2.2 Other publication. The following documents form a part of this specification to the extent specified herein. Unless otherwise indicated, the issue in effect on date of invitation for bids or request for proposal shall apply.

Underwriters Laboratories, Inc. (UL)

UL 62 Flexible Cord and Fixture Wire.

(Application for copies should be addressed to the Underwriters' Laboratories, Inc., 161 Sixth Avenue, New York 13, N.Y., 207 East Ohio Street, Chicago 11, Ill., and 1655 Scott Boulevard, Santa Clara, Calif.)

3. REQUIREMENTS.

3.1 Materials. Except as herein specified, materials shall conform to the applicable portions of the specifications and standards, listed in section 2 and be subjected to the tests and requirements specified therein. In addition the metals shall conform to the chemical requirements of their applicable specifications when tested as specified. When materials to be used are not specifically designated, those used shall be entirely suitable for the purpose intended. Insulation shall be adequate to insure safety of operation and shall conform to Underwriters Laboratory (UL) Standard UL 62.

3.2 Construction. The Cable Assembly, Special Purpose, Electrical, shall be a suitably insulated, double cord, flexible, 5 feet long, with No. 18 Washburn and Moen (WM) gage, copper stranded wire, having Pin Jacks with insulated finger grips. Shall have a capacity sufficient to prevent overheating of cord when used with operating current up to 40 amperes, and voltage of 1.5 to 2.0. Male Pin Jacks on cables shall be of dimensions

as shown in Figure 1 and shall fit female Pin Jacks on Cautery Handles and Supply Transformers as described in MIL-C-2592A and W-P-001251 respectively. The construction of the component parts and their assembly to form the finished product shall be in accordance with the best commercial practices.

3.2.1 Male Pin Jacks. Male Pin Jack tips shall be 0.084 inch in diameter and 11/16 inch long. Finger grips shall be 13/16 inch long and 1/4 inch in diameter.

3.2.2 Fittings. The connecting end of the wire shall be tinned and secured to the Pin Jack by through screws placed at right angles to the long axis, with the head of screw flush with or below the surface of the Jack. See Figure 1. The finger grips shall have a suitable insulation to prevent accidental short circuiting.

3.3 Identification marking. Each cable assembly shall be legibly and permanently marked with the name or trademark of the manufacturer.

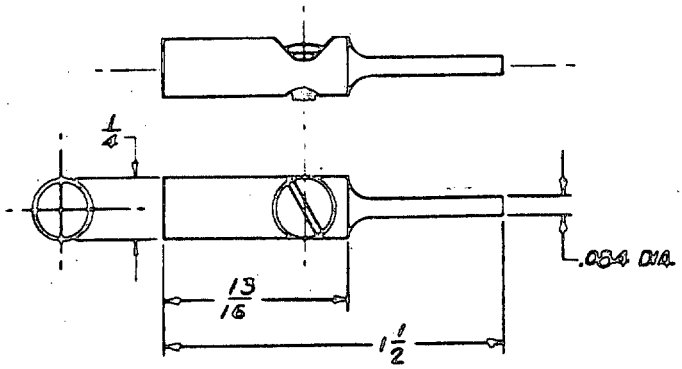

3.4 Workmanship. Workmanship shall be first class throughout. The Cable Assembly shall be free from defects which detract from its appearance or impairs its serviceability.

4. QUALITY ASSURANCE PROVISIONS

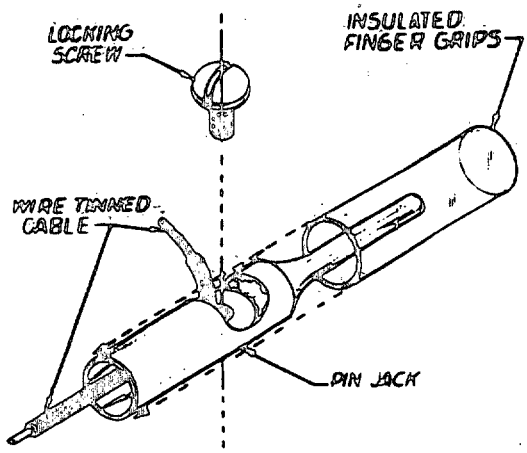

4.1 Responsibility for inspection. Unless otherwise specified in the contract or purchase order, the supplier is responsible for the performance of all inspection requirements as specified herein. Except as otherwise specified, the supplier may utilize his own facilities or any commercial laboratory acceptable to the Government. The Government reserves the right to perform any of the inspections set forth in the specification where such inspections are deemed necessary to assure supplies and services conform to prescribed requirements.

4.1.1 Inspection. Inspection, as used in this specification, is defined as both examination (such as visual or auditory investigation without the use of special laboratory appliances or procedures) and testing (determination by technical means of physical and chemical properties).

4.1.2 Certificates of quality. When available, certificates of quality, supplied by the manufacturer of the component or material, listing the specified test method and test results obtained, may be furnished in lieu of actual performance of such testing by the contractor.

4.2 Sampling.

4.2.1 For examination. Sampling for examination shall be conducted in accordance with MIL-STD-105.

4.2.2 For tests. Sampling for tests shall be conducted in accordance with MIL-STD-105.

4.3 Examination. The cable assembly shall be examined to determine compliance with all requirements contained in this specification.

4.4 Tests. Tests shall be conducted, as necessary, to determine compliance with specification requirements.

5. PREPARATION FOR DELIVERY

5.1 Packaging.

5.1.1 Unit of issue. Each cable assembly, as specified, constitutes one unit of issue.

5.1.2 Packaging quantities. The number of units of issue indicated in the following table shall be packaged in each unit, intermediate, and exterior container, as applicable, for the required level of protection specified in the procurement document.

Table — Packaging Quantities

Unit package	Intermediate package	Exterior container
1 unit	12 units	144 units

Check the source to verify that this is the current version before use.

5.1.2.1 Packing variation permitted. If the required number of units in the entire shipment is less than the number of units specified to be overpacked in an exterior container, such units shall be packed in an exterior container of suitable size and design, acceptable to a common carrier, which shall insure safe delivery to destination.

5.1.3 Level A.

5.1.3.1 Cleaning and drying. Each unit shall be thoroughly cleaned and dried in accordance with the applicable method as outlined in MIL-P-116.

5.1.3.2 Preservative. Not required.

5.1.3.3 Intimate wrap. Each unit shall be wrapped in neutral tissue or other suitable anticorrosive materials.

5.1.3.4 Unit package. Each unit shall be packaged in a carton of appropriate size and design constructed in accordance with PPP-B-566, or PPP-B-676, except that commercial colors are acceptable. Closure of carton shall be adequate to prevent spilling of contents under normal handling.

5.1.3.5 Intermediate package. Intermediate package shall be a box of appropriate size and design constructed in accordance with PPP-B-636, type CF, class weather-resistant. Boxes shall be closed by taping the top and bottom flaps with 2 inch wide tape conforming to PPP-T-76. Closing of bottom flaps with adhesive conforming to MMM-A-250 or metal stitches is permitted.

5.1.4 Level C. Units shall be packaged in standard commercial containers of the size and kind commonly used, which will afford the degree of protection required for shipment and use of the product for its intended purpose.

5.2 Packing.

5.2.1 Level A.

5.2.1.1 Exterior container. Exterior container shall be designed for type 2 load, and constructed in accordance with PPP-B-585, style 3, for class 3 use; PPP-B-601, table II, using type I, class 1 plywood; PPP-B-621, table III; or PPP-B-636, type CF, class weather-resistant. Closure and strapping shall be in accordance with appendix of applicable box specification.

Check the source to verify that this is the current version before use.

5.2.2 Level B.

5.2.2.1 Exterior container. Exterior container shall conform to PPP-B-601, table I, using type III, class 1 plywood; or shall be designed for type 2 load and constructed in accordance with PPP-B-585, style 3, for class 2 use; PPP-B-621, table I; or PPP-B-636, type CF, class domestic. Closure shall be in accordance with appendix of applicable box specification.

5.2.3 Level C. The subject commodity shall be packed in substantial commercial containers of the type, size, and kind commonly used for the purpose, so constructed as to insure acceptance and safe delivery by common or other carriers, at the lowest rate, to point of delivery called for in the contract or purchase order.

5.3 Marking.

5.3.1 Interior packages. Each unit package and each intermediate package shall be marked in accordance with MIL-STD-129. When labels are utilized, waterproofing shall be required only when applicable carton is fabricated of water-resistant material. Contract or purchase order number and name of contractor shall be shown.

5.3.2 Exterior container. Exterior container shall be marked in accordance with MIL-STD-129.

6. NOTES

6.1 Ordering data. Procurement documents should specify the following:

(a) Number and date of this specification.
(b) Selection of applicable levels of packing (see 5.1 and 5.2).

6.2 This specification does not cover all types, classes, grades, or sizes of the commodity indicated by the title of this specification, or those which are commercially available, but is intended to cover the types which are normally procured to meet Military requirements.
