5 January 1967

MILITARY SPECIFICATION

COLLECTION PLATE

This specification is mandatory for use by all Departments and Agencies of the Department of Defense.

1. SCOPE

1.1 Scope.- This specification covers one type and size collection plate.

1.2 Classification.- The collection plate shall have one of the following finishes, as specified (see 6.2).

Finish 1 - Polished Brass
Finish 2 - Chromium Plated

2. APPLICABLE DOCUMENTS

2.1 The following documents, of the issue in effect on date of invitation for bids or request for proposal, form a part of this specification to the extent specified herein:

SPECIFICATIONS

FEDERAL

QQ-C-320	-	Chromium Plating (Electrodeposited)
PPP-B-566	-	Boxes, Folding, Paperboard
PPP-B-601	-	Box, Wood, Cleated-Plywood
PPP-B-621	-	Box, Wood, Nailed and Lock-Cornered
PPP-B-636	-	Box, Fiberboard
PPP-B-676	-	Box, Setup

MILITARY

MIL-L-10547	-	Liners, Case and Sheet, Overwrap, Water-Vaporproof or Waterproof, Flexible

STANDARDS

MILITARY

MIL-STD-105 - Sampling Procedures and Tables for Inspection By Attributes
MIL-STD-129 - Marking for Shipment and Storage

DRAWING

ARMY NATICK LABORATORIES

14-1-47 - Chapel Collection Plate; Assembly and Details

(Miniature copy of Drawing 14-1-47, identified as figure 1, is attached for information purposes only).

(Copies of specifications, standards and drawing required by suppliers in connection with specific procurement functions should be obtained from the procuring activity or as directed by the contracting officer.)

3. REQUIREMENTS

3.1 Preproduction sample.- When specified (see 6.2), before production is commenced, a sample collection plate covered by this specification shall be submitted or made available to the contracting officer or his authorized representative for approval in accordance with 4.2. The approval of the preproduction sample authorizes the commencement of production, but does not relieve the supplier of responsibility for compliance with all applicable provisions of this specification. The preproduction sample shall be manufactured in the same facilities to be used for the manufacture of the production items.

3.2 Materials.- Materials specified shall conform to the applicable specifications, drawing, standards and requirements specified herein. Materials not definitely specified shall be of the quality normally used for the purpose in commercial practice.

3.2.1 Brass.- The brass shall be commercial yellow brass.

3.2.2 Cotton velour.- The cotton velour shall be dyed Garnet, or Ultra-Marine Blue, as specified hereinafter, as furnished in the suppliers' commercial practice.

3.3 Construction.- The collection plate shall be fabricated of the brass specified in 3.2.1 and shall conform to Drawing 14-1-47. The mat shall be made of velour reinforced by cardboard.

Source: https://assist.dla.mil -- Downloaded: 2026-10-21T21:30Z
Check the source to verify that this is the current version before use.

The mat shall be glued to the plate. Mats for finish 1 collection plates shall be made of the Garnet velour specified in 3.2.2. Mats for finish 2 collection plates shall be made of the Ultra-Marine Blue velour specified in 3.2.2.

3.4 Finish.-

3.4.1 Finish 1, polished brass.- The area marked "polished" on Drawing 14-1-47 shall be highly polished and all other surfaces shall have a compound satin finish in accordance with the manufacturer's commercial practice. The collection plate shall then be given a clear organic coating in accordance with the manufacturer's commercial practice.

3.4.2 Finish 2, chromium plated.- Chromium plate finish shall conform to class 1, type I of QQ-C-320.

3.5 Workmanship.- The collection plate shall be free from defects such as fractures, tool marks, splits, punctures, dents, creases, or malformation. The collection plate shall be free from areas of poor or no finish. The mat shall be clean and free of wrinkles.

4. QUALITY ASSURANCE PROVISIONS

4.1 Responsibility for inspection.- Unless otherwise specified in the contract or purchase order, the supplier is responsible for the performance of all inspection requirements as specified herein. Except as otherwise specified, the supplier may utilize his own facilities or any commercial laboratory acceptable to the Government. The Government reserves the right to perform any of the inspections set forth in the specification where such inspections are deemed necessary to assure supplies and services conform to prescribed requirements.

4.2 Preproduction sample inspection.- When a preproduction sample is required, it shall be examined for the defects in table I, and specified dimensions.

4.3 Sampling for inspection.- Sampling for inspection shall be in accordance with the provisions set forth in MIL-STD-105, except where otherwise indicated hereinafter.

4.3.1 Component and material inspection.- In accordance with 4.1 above, components and materials shall be inspected and tested in accordance with all the requirements of referenced specifications, drawings and standards unless otherwise excluded, amended, modified or qualified in this specification, or applicable purchase document.

Source: https://assist.dla.mil -- Downloaded: 2026-10-21T21:30Z
Check the source to verify that this is the current version before use.

4.3.2 End product inspection.- A lot shall consist of all collection plates of one finish offered for inspection at one time. The sample unit for this inspection shall be one completely fabricated collection plate.

4.3.2.1 Visual examination.- Examination shall be made of the end item for defects in table I. The inspection level shall be level III with an acceptable quality level of 2.5 for major defects and 6.5 for total defects, expressed in terms of defects per hundred units.

TABLE I.- Classification of defects

Examine	Defect	Classification Major	Minor
Finish (as applicable)	Not finish required	X	
Construction and workmanship	Mat not color specified		X
	Tool mark, fracture, split, puncture, dent, crease or malformation		X
	Edge not rolled		X
Plating	Area of no coverage	X	
Mat	Glue, grease or oil stains		X
	Wrinkled		X
	Mat does not adhere to plate	X	

4.3.2.2 Dimensional examination.- Inspection shall be made of the end item for compliance with dimensions specified. Any deviation from specified requirements shall constitute a defect. The inspection level shall be S-2 and the AQL shall be 4.0, expressed in terms of defects per hundred units.

4.3.3 Examination of preparation for delivery.- An examination shall be made to determine that packaging, packing and marking are in accordance with Section 5 of this specification. The sample unit shall be one shipping container fully prepared for delivery except it need not be sealed. The lot shall be the number of containers offered for inspection at one time. The inspection level shall be S-2 and the AQL shall be 4.0, expressed in terms of defects per hundred units. Defects shall be scored as specified in table II.

Check the source to verify that this is the current version before use.

TABLE II.- Examination of preparation for delivery

Examine	Defect
Marking	Omitted; incorrect; illegible; of improper size, location, sequence, or method of application.
Materials	Component missing or damaged.
Workmanship	Inadequate application of components such as incomplete closure of container flaps; strapping or sealing, improper or missing; closures improperly affixed; inadequate stapling; bulging or distortion of containers.

5. PREPARATION FOR DELIVERY

5.1 Packaging.- Packaging shall be level A or C as specified (see 6.2).

5.1.1 Level A.- Each plate shall be completely wrapped in two thicknesses of tissue paper. Two wrapped plates shall be nested one within the other and then packaged in a snug-fitting folding or setup paperboard box conforming to variety plain, style III or VIII, type B, class a of PPP-B-566, or type I, variety plain, class A, style 3 or 4 of PPP-B-676, respectively. Closure shall be in accordance with the appendix of the applicable box specification (see 6.3).

5.1.2 Level C.- Plates shall be packaged to afford adequate protection against damage during shipment from the supply source to the first receiving activity. The supplier may use his standard practice when it meets this requirement.

5.2 Packing.- Packing shall be level A, B, or C as specified (see 6.2).

5.2.1 Level A.- Forty-eight plates, packaged as specified in 5.1, shall be packed in a snug-fitting fiberboard shipping container conforming to style RSC, V2s of PPP-B-636. Each fiberboard shipping container shall be waterproofed by means of tape in accordance with the appendix of the container specification. Alternatively, shipping containers may be used that conform to overseas type of PPP-B-601, or class 2, style 2 or 4 of PPP-B-621. Each alternative shipping container shall be provided with a type I or II, grade C case liner conforming to MIL-L-10547. Each shipping container shall be closed and reinforced with flat strapping or tape banding in accordance with the appendix of the applicable container specification.

Check the source to verify that this is the current version before use.

5.2.2 Level B.- Unless otherwise specified (see 5.2.2.1), forty-eight plates, packaged as specified in 5.1, shall be packed in a snug-fitting fiberboard shipping container conforming to style RSC, type CF, variety SW, or type SF, class domestic of PPP-B-636. Closure shall be in accordance with method II of the appendix of the container specification. Alternatively, shipping containers may be used that conform to domestic type, style A or B of PPP-B-601, or class 1, style 2 or 4 of PPP-B-621.

5.2.2.1 When specified (see 6.2), fiberboard shipping containers shall be made from weather-resistant fiberboard conforming to V3c or V3s of PPP-B-636.

5.2.3 Level C.- Plates, packaged as specified in 5.1, shall be packed in a manner to insure carrier acceptance and safe delivery at destination at the lowest transportation rate for such supplies. Containers shall be in accordance with rules or regulations of carriers applicable to the mode of transportation.

5.3 Marking.- In addition to any special marking required by the contract or order, interior packages and shipping containers shall be marked in accordance with MIL-STD-129.

6. NOTES

6.1 Intended use.- The collection plate covered by this specification is intended to receive offerings at religious services in military chapels.

6.2 Ordering data.- Procurement documents should specify the following:

(a) Title, number and date of this specification.
(b) Finish required (see 1.2).
(c) When preproduction sample is required (see 3.2).
(d) Selection of applicable levels of packaging and packing (see 5.1 and 5.2).
(e) When weather-resistant class fiberboard shipping containers are required for level B shipment (see 5.2.2.1).

6.3 Packaging.- The method of packaging referenced in 5.1.1 is similar to method III of MIL-P-116.
