MIL-F-2312E
AMENDMENT-1
17 December 1986

MILITARY SPECIFICATION

FELT, HAIR OR WOOL: MILDEW RESISTANT AND MOISTURE RESISTANT TREATMENT FOR

This amendment forms a part of Military Specification MIL-F-2312E, dated 28 September 1984, and is approved for use by all Departments and Agencies of the Department of Defense.

PAGE 3

3.1.1.1, for "Type I": Delete "5 percent maximum" and substitute "15 percent maximum".

3.2.1: Delete in entirety and substitute:

"3.2.1 Type I - mildew resistant. Unless otherwise specified (see 6.2), the felt shall be treated with copper-8-quinolinolate which has been solubilized for solvent application. Alternatively, when specified, the felt may be treated with either 2,2 methylene bis-(4-chlorophenol) or salicylanilide. The materials shall be dispersed and so formulated as to effect uniform penetration into the felt when applied."

3.2.1.2.1, line 2: Delete "an no" and substitute "and no".

Add the following new paragraph:

"3.2.1.2.3 Copper-8-quinolinolate. The finished felt shall contain not less than 1.0 percent and not more than 1.5 percent of copper-8-quinolinolate when tested as specified in 4.2.3."

PAGE 4

Add the following:

"4.1.2 Responsibility for compliance. All items must meet all requirements of sections 3 and 5. The inspection set forth in this document shall become a part of the contractor's overall inspection system or quality program. The absence of any inspection requirement in the document shall not relieve the contractor of the responsibility of assuring that all products or supplies submitted to the Government for acceptance comply with all requirements of the contract. Sampling in quality conformance does not authorize submission of known defective material, either indicated or actual, nor does it commit the Government to acceptance of defective material."

DISTRIBUTION STATEMENT A. Approved for public release; distribution is unlimited.
