COMMERCIAL ITEM DESCRIPTION

SPOON, FOOD SERVICE (Basting, Straining, and Mixing)

The General Services Administration has authorized the use of this commercial item description for all Federal agencies.

1. SCOPE

1.1 Scope. This commercial item description (cid) covers stainless steel food service spoons.

2. CLASSIFICATION

2.1 Classification. The spoons shall be of the following types and sizes, as specified (see 7.2).

Type I - Basting	Size 1 - 13 inch (33.0 cm)
Type II - Straining	Size 2 - 15 inch (38.1 cm)
Type III - Mixing	

3. SALIENT CHARACTERISTICS

3.1 Material. The spoons shall be formed from a single piece of corrosion-resisting steel conforming to a type 300 series in accordance with ASTM A 167.

3.2 Construction. The type I, II, and III spoons shall be in general conformance with figures 1, 2, and 3, respectively. The minimum thickness of the spoons shall be 0.056 inch (1.4 mm). The spoons shall have a stiffening rib which runs the length of the handle leading into the bowl. The size 1 and 2 spoons shall have an overall length of 13 inches (33.0 cm) and 15 inches (38.1 cm), respectively (± 1/2 inch). The spoons shall have a hole in the end of the handle for hanging.

3.2.1 Bowl. The bowl of the spoon shall have a minimum length, width, and depth of 3-1/2 inches (8.9 cm), 2-1/2 inches (6.4 cm), and 9/16 inch (1.4 cm), respectively. The type I basting spoon shall have a solid bowl. The type II straining spoon shall have 17 to 24 holes in the bowl. The type III mixing spoon shall have 6 to 10 slots.

3.3 Finish. The spoons shall be cleaned and polished to a No. 2B or better finish as defined by the American Iron and Steel Institute's Handbook, "Finishes for Stainless Steel".

3.4 Marking. The spoons shall be marked with the manufacturer's name, trade name, or trademark of such known character that the source may be readily determined.

Beneficial comments, recommendations, additions, deletions, clarifications, etc. and any data which may improve this document should be sent to: General Services Administration, Engineering Group (7FXEE), 819 Taylor St., Fort Worth, TX 76102

3.5 Workmanship. The spoons shall be clean and free from dirt, rough or sharp edges, slivers, burrs, deep scratches, tool marks, or other defects which may affect appearance or serviceability. All outside edges of the spoons shall be rounded. Holes and slots in the spoons shall be cleanly punched.

3.6 Metric products. Products manufactured to metric dimensions will be considered on an equal basis with those manufactured using inch-pound units, providing they fall within tolerances specified and all other requirements of this document are met. If a product is manufactured to metric dimensions and those dimensions exceed the tolerances specified in the inch-pound units, a request should be made to the contracting officer to determine if the product is acceptable.

3.7 Standard commercial product. The spoons shall, as a minimum, be in accordance with the requirements of this CID and shall be the manufacturer's standard commercial product. A standard commercial product is a product which has been sold or is currently offered for sale on the commercial market through advertisements, manufacturer's catalogs, or brochures, and represents the latest production model.

4. REGULATORY REQUIREMENTS

4.1 Recovered materials. The offeror/contractor is encouraged to use recovered materials to the maximum extent practicable, in accordance with paragraph 23.403 of the Federal Acquisition Regulation (FAR).

5. QUALITY ASSURANCE PROVISIONS

5.1 Product conformance. The products provided shall meet the salient characteristics of this commercial item description, conform to the producer's own drawings, specifications, standards, and quality assurance practices and be the same product offered for sale in the commercial market. The Government reserves the right to require proof of such conformance.

6. PACKAGING

6.1 Preservation, packing, and marking. Preservation, packing, and marking shall be as specified in the contract or order.

7. NOTES

7.1 Sources of non-Government association documents.

American Iron and Steel Institute handbooks are available from the Committee of Stainless Steel Producers, American Iron and Steel Institute, 1000 16th Street, N.W., Washington, DC 20036.

ASTM standards are available from the American Society for Testing and Materials (ASTM), 100 Barr Harbor Drive, West Conshohocken, PA 19428-2959.

7.2 Ordering data. Purchasers should select the preferred options permitted herein and include the following information in procurement documents (if applicable).

a. Title, number and date of this commercial item description.
b. Type and size required.
c. Preservation, packing, and marking desired.

7.3 Part Numbering. The following part identification numbering procedure is for government purposes and does not constitute a requirement for the contractor.
