COMMERCIAL ITEM DESCRIPTION

TYPE CLEANER

The General Services Administration, Office Supplies & Paper Products Commodity Center, New York, NY 10278, has approved this Commercial Item Description for use by all federal agencies.

This commercial item description covers liquid type cleaner in aerosol cans used to remove ink, dirt, eraser dust from typewriters and similar printing equipment.

I. Salient characteristics.

A. Solvent. The liquid of the type cleaner provided in an aerosol can shall remove ink, dirt, eraser dust from typewriters and similar printing equipment so as to leave no residue.

B. Container. The type cleaner shall be furnished in a pressurized container in the size indicated in Notes (see section IX).

C. Vehicle. The vehicle shall be such as to produce a type cleaner conforming to the requirements of this commercial item description.

D. Effect on typewriters. The type cleaner shall contain no ingredients which have a deleterious effect upon the equipment used in its normal application.

E. Effect on aerosol can. The type cleaner shall not react with nor be reacted upon by the interior surfaces of the spray can or any of the spray can components.

F. Propellant. The propellant shall be environmentally safe.

G. Container. See section VII under "Unit Packaging".

DISTRIBUTION STATEMENT A: Approved for public release; distribution is unlimited.

FSC 7510

Check the source to verify that this is the current version before use.

H. Dispensing valve. The valve shall have a spray head which shall be removed without releasing pressure from the aerosol. The removable spray head shall contain an orifice of such dimensions to produce desirable spraying properties.

I. Cover cap. A full cover cap is required.

J. Workmanship. The type cleaner shall be in a homogeneous state and free from foreign matter and shall conform to the levels of quality established herein. The aerosol cans shall be in accordance with the manufacturers best commercial practice and shall have no defects that affect serviceability or appearance. The required labeling information shall be printed legibly directly on the container or on a label. If printed on a label, the label shall be neatly, securely and permanently affixed around the circumference of each container.

II. Regulatory requirements.

The offerer/contractor is encouraged to use recovered materials in accordance with Public Law 94-580 to the maximum extent practicable.

III. Test requirements.

The applicators for the test shall be a pressurized spray can.

A. Performance test - Effect on metal. Apply a liberal coat of type cleaner to a 5 x 5 cm brass panel which has been brightly polished and cleaned with solvent. Allow the cleaner to remain on the panel. Examine the metal for etching, corrosion, staining, and discoloration after 2 hours of standing.

V. Hazardous Material requirements.

A. Toxicity. The use of straight benzene is prohibited. Trace amounts of benzene derivatives present in commercial grades of acceptable aromatics are permissible. Type cleaners shall contain no chlorinated compounds or other toxic hydrolyzable chlorine derivatives. Use of any toxic or carcinogenic substance must be in accordance with all applicable federal statutes.

B. Labeling. Containers shall be labeled to comply with the "Federal Hazardous Substances Act Regulations", 16 Code of Federal Regulations, Part 1500

C. Material safety data sheets. Safety data shall be furnished in accordance with FED-STD-313. The pertinent government mailing addresses for submission of data are listed in appendix B of FED-STD-313. Unless indicated otherwise, and in addition to any other required distribution, a copy of the Material Safety Data Sheet (MSDS) shall be provided prior to the first shipment and prior to the shipment of material whose

formulation or known hazards have changed, to the applicable government mailing address.

VI. QUALITY ASSURANCE REQUIREMENTS.

A. Responsibility for inspection. Unless otherwise specified in the contract or purchase order (see section IX), the supplier is responsible for the performance of all inspection requirements as specified herein. Except as otherwise specified, the supplier shall utilize his own facilities or any commercial laboratory acceptable to the Government. The Government reserves the right to perform any of the inspections set forth in the specification where such inspections are deemed necessary to assure that supplies and services conform to prescribed requirements.

B. Lot definition. Each lot of type cleaner shall be inspected for conformance to the requirements herein. Inspection shall be in accordance with MIL-STD-105 using the sampling plans specified below. The lot shall be expressed in type cleaner manufactured from the same materials, at essentially the same time.

C. Examination of the end item for visual defects. The sample unit for this examination shall be one container of type cleaner. A random sample shall be taken from each lot in accordance with Inspection Level S-3. The AQL shall be 2.5 percent defective. Samples shall be examined for defects listed below. Any container of type cleaner containing one or more defects shall be rejected.

Examine	Defects
Workmanship	See Workmanship paragraph
Material	Not as specified
Appearance	Spillage of cleaner or leakage on outside of the container.
	Container not clean.
Design	Container not as specified.

D. Examination of the end item for dimensional defects. The sample unit for this examination shall be one container of type cleaner. A random sample shall be taken from each lot in accordance with Inspection Level S-2. The AQL shall be 4.0 percent defective. Samples shall be examined for defects listed below. Any type cleaner containing one or more defects shall be rejected.

Examine	Defects
Quantity	Not as specified
Fill of containers	Empty or broken containers; fill not as specified.

E. Sampling of end items for performance tests. Sampling for performance testing shall be performed in accordance with MIL-STD-105. The sample unit shall be one container of type cleaner. A random sample from each lot in accordance with Inspection Level S-1. The AQL shall be 4.0 percent defective.

Examine	Defects
Performance Testing	Does not conform.

1. Initial Performance Testing. The type cleaner shall be performance tested for each lot delivered.

F. Packaging, Packing, and Marking. Inspection Level S-2 with an AQL of 4.0 percent defective. The sample unit shall be one fully prepared shipping container inspected for conformance with the requirements of section VII.

VII. Preparation for delivery. Packaging, packing, and marking. Packaging, packing, and marking shall be as indicated below, unless specified otherwise in the contract or purchase order (see ordering information).

A. Packaging. The type cleaners shall be packaged in accordance with normal commercial practice and packed in fiberboard boxes that shall assure acceptance by common carrier and provide product protection against loss and damage during multiple shipments, handling, and storage. The quantities per unit, intermediate, and shipping containers shall be as indicated below or in section IX, if required.

B. Unit packaging. The type cleaner shall be furnished in a round container, compound lined, double seamed end cans with pressure activated spray orifice type dispensers of the type normally used for this product, providing that there shall be no interaction chemically or physically with the contents so as to damage the container or alter the strength, quality or purity of the contents. Each can shall be provided with a removable and replaceable plastic or metal cap to protect the dispenser in accordance with normal commercial practice. The filled cans shall be closed in a manner that shall insure that the contents shall not spill or leak from the container during shipment, handling, storage and redistribution.

C. Packing. In accordance with normal commercial practice cans of type cleaner packaged as specified above shall be packed in a close-fitting fiberboard box (see section IX).

D. The completed packs. The complete pack shall be in compliance with Rule 41 of the Uniform Freight Classification and Item 222 of the National Motor Freight Classification. Closure of the boxes shall be in accordance with Section 7 of Rule 41 of the Uniform Freight Classification. The boxes shall be fitted with

full height partitions, or other suitable means to insure that the cans are not damaged during shipment, handling, storage and redistribution.

E. Marking.

1. Civil agencies. In addition to any special marking required by the contract or order, interior packages and exterior shipping containers shall be marked in accordance with FED-STD-123. Bar code marking is required, unless specified otherwise (See ordering information).

2. Military activities. In addition to any special marking required by the contract or order, interior packages and exterior shipping containers shall be marked in accordance with MIL-STD-129. Bar code marking is required, unless specified otherwise (See ordering information)

3. Additional marking. The shipping containers shall include the date of manufacture and the date of reinspection (12 months after the date of manufacture) and shall include any precautionary marking required by the National Motor Freight Classification, Uniform Freight Classification, US Postal Service and Department of Transportation regulations.

VIII. Applicable documents. The following documents, of the issues in effect on the date of invitation for bids or request for proposal, form a part of this document to the extent specified herein.

A. Public Law and Code of Federal Regulations: Code of Federal Regulations and Federal Acquisition Regulations are for sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

Public Law 94-580 - Use of Recovered Materials
16 CFR Part 1500 - Federal Hazardous Substances Labeling Act.

B. National Motor Freight Traffic Association, Inc. Agent: Application for copies shall be addressed to the American Trucking Associations, Inc., 2200 Mil Rd., Alexandria, VA 22314.

National Motor Freight Classification

C. Uniform Classification Committee Agent: Application for copies shall be addressed to the National Railroad Freight Committee, Suite 1120, 222 South Riverside Plaza, Chicago, Illinois 60606.

FED-STD-313 Material Safety Data, Transportation Data and Disposal Data for Hazardous Materials Furnished to Government Activities.

E. Military Standards: Military Standards are available from the Standardization Documents Order Desk; Bldg. 4D; 700 Robbins Avenue; Philadelphia, PA 19111-5094.

MIL-STD-105 Sampling Procedures and Tables for Inspection by Attributes.
MIL-STD-129 Marking for Shipment and Storage.

IX. Notes.

A. Ordering information. Purchasers shall select the preferred options permitted herein, and include the following information in procurement documents:

(1) Title, number, and date of this commercial item description.
(2) Purchasers shall specify the flash point of type cleaner.
(3) Purchasers shall specify the size of container.
(4) Purchasers shall specify arrangement for inspection and inspection facilities, if other than specified (see tests and quality assurance requirements.)
(5) Purchasers shall specify packaging and packing, any special marking for shipment required, if other than specified (see preparation for delivery).
(6) Identification marking, if other than above.
(7) If bar code marking is not required.
(8) Special marking requirements.
(9) MSDS's required, in addition to those required by FED-STD-313.
(10) Purchasers shall specify palletization , if required.

MILITARY INTERESTS:

NONE: DOD has determined that no military activity has an official interest in this commercial item description.
