COMMERCIAL ITEM DESCRIPTION

DISPENSER, GUMMED TAPE, ELECTRICALLY OPERATED (SINGLE LENGTH)

The General Services Administration has authorized the use of this commercial item description in lieu of Federal Specification GG-D-1958.

This commercial item description covers the requirements for an electrically operated tape dispenser that is suitable for dispensing reinforced or gummed paper tape that requires water activation for adhesion. The dispenser shall be equipped with a printing mechanism if specified in the contract or order.

Salient characteristics:

Operation. The selection of a single tape length to be dispensed automatically activates the dispenser. It then measures, feeds, moistens, dispenses, and cuts the selected length.

Capacity. The dispenser shall accommodate, at a minimum, all-1/2 inch to 3 inch wide tape roll with an outer tape roll diameter of 7-1/2 inches. The core size may vary depending on the tape type.

Tape dispensing. The tape shall dispense at a speed of at least 2.5 feet/second. The dispenser shall be capable of dispensing, at a minimum, tape lengths between 6 and 36 inches. Over this range, there shall be at least 11 length selection settings at equally spaced intervals; additional settings within or outside this interval are permitted. The selection of a tape length setting shall automatically activate the dispenser and dispense the tape. The tape length dispensed shall be within 1/2 inch of the length selected.

Tape moistening. The tape shall be moistened by brush or brushes using water that is stored in a nonshatterable, refillable plastic container of at least 16 ounces capacity. The water shall be maintained at a needed temperature by a built-in or top heater and thermostat; the amount of water applied to the tape shall be regulated.

Printing mechanism. The printing mechanism shall be easily accessible for cleaning, maintenance, and replacement and shall be provided with ink that is fast-drying and nonsmearing. The ink shall be provided in a replaceable bottle lot less than 4.0 fluid ounces capacity.

Instructions. Included with the dispenser shall be operating and servicing instructions.

Workmanship. The dispenser shall be sturdily constructed and free from any defects that may affect its serviceability or appearance. The dispenser shall have feet or a base to protect work surfaces and provide lateral stability. Component parts shall be easily accessible; those contacting water shall be corrosion resistant. The dispenser shall meet the applicable requirements or UL 114.

The following products meet the minimum criterion of acceptability.

(a) Marsh Stencil Machine Company - Model 3D Dial Taper.
(b) Better Packages, Incorporated - Model Better Pack 555-L-36.
(c) Ideal Stencil Machine Company - Model Idealogic/3.

Certification. The contractor shall certify that the product offered meets the salient characteristics of this description and that the product conforms to the producer's own drawings, specifications, standards, and quality assurance practices and is the same product offered for sale in the commercial marketplace. The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

Recovered materials. The manufacturer shall utilize recovered materials to the maximum extent practicable.

Packaging, packing, and marking. The dispensers shall be packaged in accordance with normal commercial practice and packed to assure acceptance by common carrier and provide product protection against loss and damage during multiple shipments, handling, and storage. The shipping containers shall be in compliance with the National Motor Freight Classification and Uniform Freight Classification. Marking shall be as specified in the contract or order.

Notes. The purchaser shall specify in the contract or order whether a printing mechanism is required.

UL Standard 114 - Office Appliances and Business Equipment, is available from Underwriters Laboratories, (UL) Inc., 333 Pfingsten Road, Northbrook, IL 60062. Underwriters Laboratories, (UL) Inc., 333 Pfingsten Road, Northbrook, IL 60062.

Instructions. Included with the dispenser shall be operating and servicing instructions.

Indentification marking. Each dispenser shall be marked in a legible and permanent manner with the manufacturer's name or trademark.

Workmanship. The dispenser shall be sturdily constructed and free from any defects that may affect its serviceability or appearance. The dispenser shall have feet or a base to protect work surfaces and provide lateral stability. Component parts shall be easily accessible; those contacting water shall be corrosion resistant. The dispenser shall meet the applicable requirements or UL 114.

The following products meet the minimum criterion of acceptability.

(a) Marsh Stencil Machine Company - Model 3D Dial Taper.
(b) Better Packages - Model Better Pack 555.
(c) Ideal Stencil Machine Company - Model Idealogic/3.

Sampling. A random sample shall be taken from each lot in accordance with MIL-STD-105 at inspection Level I and Acceptance Quality Level 4.0 percent defective.

Visual Examination for Major Defects

Material not as specified
Construction not as specified
Capactiy not as specified
Identification illegible or missing
Workmanship

Performance test. A full roll of tape with the maximum width shall be dispensed at the maximum length setting. The dispenser shall be operated at a minimum rate of 30.0 inches per second for 5.0 seconds.

Length selection test. The dispenser shall be set for a measured length at which two lengths of tape shall be dispensed. For four different settings, the second length at each setting shall be within ± 3/4 inch of the specified setting.

Failure of the performance and length selection tests shall be cause for rejection.

Regulatory requirements. The offeror/contractor is encouraged to use recovered materials in accordance with Public Law 94-580 to the maximum extent practicable.
