AA-C-293
AMENDMENT—1
MAY 2, 1957

FEDERAL SPECIFICATION

CHAIRS, STEEL, GENERAL OFFICE

This amendment, which forms a part of Federal Specification AA-C-293, dated October 17, 1951, was approved by the Commissioner, Federal Supply Service, General Services Administration for the use of all Federal agencies.

Page 2, paragraph 3.1.2: Last line, following "thickness" insert "and grade".

Page 2, paragraph 3.1.5.1: Next to last line, change "R–32" to "R–23".

Page 4, at end of paragraph 3.1.9.4.2: Add "The steel spring to control the back tilt of type II, class 2, style B chairs may be a single tempered steel spring not less than 2 5/16 inches long by 1 5/16 inches outside diameter and wire thickness of 0.281 (–0.005) inch".

Page 4, paragraph 3.2.1: Delete the last sentence and substitute: "Dimensions of seats, backs, bases and overall height are minimum but may have a plus tolerance of 2 inches. Seat height of chairs may have a tolerance of plus or minus 1/8 inch."

Page 5, paragraph 3.2.2.2, 8th line: from bottom of page, following the word "front" add "before compressing"; 18th line, delete "steel".

Page 7, paragraph 3.3.3.4, 5th line from top of page second column, place a period after "leg" and delete the rest of the line, and insert "The tube shall be welded or brazed to the leg at the top and".

Page 8, paragraph 3.3.5.2, at end of paragraph add: "When the back rest is adjusted to its full height, the top of the rest shall be not less than 15¼ inches or more than 17 inches above the seat".

Page 8, add new paragraph 3.4.3: *Finish of Plywood.*—When plywood seat and back pans are used, they shall be well sanded having smooth edges, then given a coat of primer followed by not less than one coat of aluminum paint. Care shall be taken to have all edges well coated to prevent moisture absorption.
