MIL-B-43909(GL)
AMENDMENT-1
3 March 1975

MILITARY SPECIFICATION

BELLOWS, EXPANDABLE SHELTER (MUST)

This amendment forms a part of Military Specification MIL-B-43909(GL), dated 26 December 1974, and is approved for use by all Departments and Agencies of the Department of Defense.

PAGES 1 AND 2

2.1, under listing of Federal Specifications. Insert in proper sequence:

"L-P-390 - Plastic, Molding and Extrusion Material, Polyethylene and Copolymers (Low, Medium, and High Density)".

Under listing of Military Specifications. Delete "MIL-H-639" in its entirety. Add the following in proper sequence: "MIL-W-83343 - Wire Rope, Steel (Corrosion-Resisting) Nylon Coated".

Under listing of Military Standards. Insert in proper sequence: "MS-87006 - Hook, Chain - S".

PAGE 3

3.2 Delete in its entirety and substitute:

"3.2 Samples.

3.2.1 First article. When specified (see 6.2), the supplier shall furnish a sample of the item to be procured under this specification for first article inspection and approval (see 4.2.1 and 6.4).

3.2.2 Initial production testing. When specified (see 6.2), the supplier shall furnish a sample for initial production inspection and approval (see 4.2.2 and 6.5).

3.2.3 Inspection comparison testing. When specified (see 6.2), the supplier shall furnish a sample for comparison inspection and approval (see 4.2.3 and 6.6)."

PAGE 4

3.4.1.1 Delete and substitute:

"3.4.1.1 Thread breaks. Thread breaks shall be overstitched not less than 1 inch at each break. Any thread breaks noted during inspection shall be repaired by overstitching the existing stitching for a distance of one inch before the break, across the defective area, to a distance of one inch beyond the break. Bartacks shall be free of thread breaks."

3.4.1.3 Delete and substitute:

"3.4.1.3 Skipped stitches and run-offs. Two or more consecutively skipped stitches or run-offs shall be overstitched. Overstitching shall be accomplished as specified for thread breaks."

3.4.1.4 Add the following to the end of paragraph: "Water or air spraying for needle cooling is permissable."

Add the following new paragraphs in proper sequence:

"3.4.4 Wire rope loops. The nylon coating shall be stripped from the ends of the wire rope forming the loops in the strap and cable assemblies. The strength of the formed loop shall equal the minimum breaking strength of the wire rope."

"3.4.5 Stiffeners. Edges of the polyethylene stiffeners shall be stitched against the wire rope welt as specified on the drawings."

PAGE 5

4.2 and 4.3 Delete in their entirety and substitute:

"4.2 Classification of inspection. The inspection requirements specified herein are classified as follows:

a. First article inspection (see 4.2.1).

b. Initial production inspection (see 4.2.2).

c. Initial inspection comparison (see 4.2.3).

d. Quality conformance inspection (see 4.3).

PAGE 5 (cont'd)

4.2.1 First article inspection. When a first article is required, the complete bellows shall be examined for defects listed in tables I and II. The presence of any visual defect or any dimension not within the specified requirement shall be cause for rejection of the preproduction sample.

4.2.2 Initial production sample inspection. When an initial production sample is required, the complete bellows shall be examined for defects as specified in tables I and II. The presence of any visual defect or any dimensions not within the specified requirements shall be cause for rejection of the initial production sample.

4.2.3 Comparison sample inspection. When a comparison sample is required, the complete bellows shall be examined for defects as specified in tables I and II. The presence of any visual defects or any dimension not within the specified requirements shall be cause for rejection of the comparison sample.

4.3 Quality conformance inspection. Except as otherwise specified herein, sampling for inspection shall be performed in accordance with the provisions set forth in MIL-STD-105."

PAGE 7

Table I, under classification, sixth Minor B defect. Delete in its entirety and substitute the following Minor B defect:

"Skipped stitches or run-offs overstitched less than specified (where 2 or more consecutively skipped stitches or run-offs occur)

NOTE: Skipped stitches or run-offs not overstitched shall be classified as open seams."

PAGE 9

TABLE II. Delete in its entirety and substitute:

"TABLE II. Classification of defects for dimensional characteristics

Examine	Defect	Classification Major	Minor
Frame flap assemblies	Length of assembled flap section and corners pieces not within specified limits	X	
Component and location dimensions	Not as specified		X"

6.2, subparagraphs (b), (c), and (d). Delete and substitute:

"(b) When a first article is required (see 3.2.1, 4.2.1 and 6.4).

(c) When an initial production testing sample is required (see 3.2.2, 4.2.2 and 6.5).

(d) When an initial comparison testing sample is required (see 3.2.3, 4.2.3 and 6.6).

(e) Selection of applicable levels of packaging and packing (see 5.1 and 5.2).

(f) When fiberboard shipping containers for level B packing shall be required to be weather-resistant grade (see 5.2.2.1)."

Add the following new paragraphs in proper sequence:

"6.5 Initial production test. When an initial production test sample is required, the contracting officer should include specific instructions in all procurement instruments regarding arrangements for inspection and approval of the initial production test sample.

6.6 Inspection comparison test. When a comparison test sample is required, the contracting officer should include specific instructions in all procurement instruments regarding arrangements for inspection and approval of the comparison test sample."
