MIL-F-43883A
AMENDMENT-1

28 January 1981

MILITARY SPECIFICATION

FOOD WARMER, INFRA-RED, ELECTRIC

This amendment forms a part of Military Specification MIL-F-43883A, dated 8 December 1975, and is approved for use by all Departments and Agencies of the Department of Defense.

PAGE 1

1.2 Add the following in proper sequence:

"Type III - Two infra-red elements with overhead adjustable hood
Size 1 - 36 inches long
Size 2 - 48 inches long"

PAGE 2

2.1, under "STANDARDS MILITARY": Add the following "MIL-STD-1188 - Commercial Packaging of Supplies and Equipment".

PAGE 3

2.2, under "Underwriters Laboratories Inc.": Delete addresses and substitute:

"(Application for copies should be addressed to Underwriters Laboratories Inc., 333 Pfingsten Road, Northbrook, IL 60062.)"

Delete all references to:

"National Motor Freight Traffic Association, Inc., Agent and Uniform Classification Committee, Agent".

PAGE 4

3.2.1.2(1), line 1: Delete first "or" and substitute "and".

PAGE 5

3.4, end of paragraph: Add "Type III food warmers shall be of the overhead hood type design with two infra-red heating elements and adjustable vertical rigid supports."

PAGE 7

3.4.3, end of paragraph: Add "The minimum wattage for the type III, size 1 and size 2 food warmers shall be 675 W and 900 W, respectively."

Add the following paragraphs:

"3.4.4 Type III. The type III food warmers shall consist of a hood assembly, overhead suspension assembly, "ON-OFF" switch, two infra-red heating elements (quartz or metal sheathed), receptacle box and cover, and electrical wiring. The heating elements shall operate whenever the switch is placed in the "ON" position. All ungrounded lines shall be deactivated when the switch is placed in the "OFF" position. Heating elements and switch shall be easily accessible for service or replacement.

3.4.4.1 Hood assembly. The hood assembly shall consist of the hood exterior, double reflector, wire way and cover, receptacle box and cover, and top angles. The reflector shall be formed from 0.032 inch (minimum) anodized aluminum and all other items of the hood assembly shall be fabricated from 0.063 inch (minimum) aluminum.

3.4.4.2 Supports. The food warmers shall be provided with angles mounted on the top ends of the hood exterior. The angle brackets shall be provided with means to attach the rigid overhead suspension supports. The overhead suspension supports shall be adjustable and fabricated from 1-inch square by 0.032 inch wall thickness chrome plated steel tubing.

3.4.4.3 Dimensions. The type III, size 1 food warmer shall be 36 inches long (minimum) by 11 inches wide by 3 inches deep. The type III, size 2 food warmer shall be 48 inches long (minimum) by 11 inches wide by 3 inches deep. For food warmers with end mounted electrical outlet box increase overall length by 2-1/2 inches."

PAGE 7 (cont'd)

3.5, line 1: Delete "and type II" and substitute ", type II and type III".

3.7, line 2: Delete "amrked" and substitute "marked".

PAGE 8

3.8, end of paragraph: Add "The type III, sizes 1 and 2 food warmer exterior surface shall have a satin finish and the dual reflector shall have a bright polished finish."

4.2.1, line 2: Delete "and tested".

4.2.2.1, line 2: Delete "and type II" and substitute ", type II and type III".

PAGE 10

Add the following defects tc table I:

"Table I. Classification of defects (cont'd)

Examine	Defect	Classificatio Major	Mino
Heating elements	Not easily accessible for service or replacement	X	
	Not wattage specified	X	
Type III, size 1 and size 2 units	Not hood type	X	
	Not provided with two infra-red heating elements	X	
	Not provided with angle brackets (for rigid adjustable vertical supports)	X"	

4.2.2.2, line 2, after "3.4.2.4.": Delete period and add "and 3.4.4.3.".

PAGE 10 (cont'd)

4.2.3 Delete and substitute:

"4.2.3 Packaging inspection. An examination shall be made to determine that preservation, packing and marking complies with the section 5 requirements. Defec shall be as indicated in table II. The sample unit shall be one shipping containe fully packaged except that it need not be closed. Examination for closure defects listed below shall be made on shipping containers fully packaged. The lot shall be the number of containers in the end item inspection lot. The inspection level shall be S-2 with an AQL of 2.5 defects, expressed in terms of defects per hundred units."

PAGE 11

TABLE II: Delete title and substitute "Packaging inspection".

4.2.3.1 Delete.

4.4.1 Delete and substitute:

"4.4.1 Functional test. Connect the food warmer to an appropriate power source. Place "ON-OFF" switch in the "ON" position. Check to assure infra-red bulbs or heating elements are operating, and serving temperature in 3.5 is maintained. Check for frame adjustment requirements specified in 3.4.1 and 3.4.4.2. Check that provisions have been made to hold frame at any intermediate height within the adjustment range. Check wattage rating of infra-red bulbs. Check to assure that ungrounded lines are deactivated when the "ON-OFF" switch is in the "OFF" position. For types I and II food warmers, check for pan accessibility requirements specified in 3.4.1 by using a 12 inch by 20 inch by 2-1/2 inch pan. Non-conformance with any requirements of 3.4.1, 3.4.2, 3.4.4 and 3.5 shall constitute failure of this test."

PAGE 12

4.4.2 Delete and substitute:

"4.4.2 Operational test. Connect the type I, type II or type III food warmer to an appropriate power source. Place "ON-OFF" switch in the "ON" position and check for infra-red bulb or heating element operation requirements specified in 3.4.1, 3.4.2.4 and 3.4.4. Check type I food warmers for holding feature at five increments of height adjustment within the adjustment range. Failure of the infra-red bulb or heating element to operate or failure of holding feature for frame adjustment shall constitute failure of this test."
