ADOPTION NOTICE

ISO/IEC 18023-2, “Information Technology-Computer Graphics and Image Processing, SEDRIS Part 2: Abstract Transmittal Format,” was adopted on August 25, 2006, for use by the Department of Defense (DoD). Proposed changes by DoD activities must be submitted to the DoD Adopting Activity: Defense Modeling and Simulation Office, Attn: Standards, 1901 N. Beauregard Street, Alexandria, VA 22311-1705.

Electronic versions of the document may be downloaded from the SEDRIS Organization at http://www.sedris.org/ or the ISO/IEC Information Technology Task Force (ITTF) at http://isotc.iso.org/livelink/livelink/fetch/2000/2489/Ittf_Home/ITTF.htm. Copies may also be purchased from the International Organization for Standardization at http://www.iso.org or from the InterNational Committee for Information Technology Standards (INCITS) at http://www.incits.org/ or by contacting the INCITS Secretariat, c/o Information Technology Industry Council, 1250 Eye Street NW, Suite 200, Washington, DC 20005, Phone 202-737-8888, Fax 202-638-4922, and Email incits@itic.org.

ISO/IEC 18023-2 is part of the Synthetic Environmental Data Representation and Interchange Specification (SEDRIS) suite of international standards. ISO/IEC 18023-2 defines the abstract semantics and abstract structure used to encode SEDRIS transmittals. It defines how concrete encodings are developed so that conversion can be performed between all concrete encodings with a minimum of effort. This also ensures that SEDRIS application program interface (API) implementations will behave consistently regardless of the encoding in which the SEDRIS transmittal is encoded.

Custodians:
Army – AC
Navy – EC
Air Force – 05
DISA – DC2

Adopting Activity:
OSD – DMS
