ADOPTION NOTICE

ISO/IEC 18023-3, “Information Technology-Computer Graphics and Image Processing, SEDRIS Part 3: Transmittal Format Binary Encoding,” was adopted on August 25, 2006, for use by the Department of Defense (DoD). Proposed changes by DoD activities must be submitted to the DoD Adopting Activity: Defense Modeling and Simulation Office, Attn: Standards, 1901 N. Beauregard Street, Alexandria, VA 22311-1705.

Electronic versions of the document may be downloaded from the SEDRIS Organization at http://www.sedris.org/ or the ISO/IEC Information Technology Task Force (ITTF) at http://isotc.iso.org/livelink/livelink/fetch/2000/2489/Ittf_Home/ITTF.htm. Copies may also be purchased from the International Organization for Standardization at http://www.iso.org or from the InterNational Committee for Information Technology Standards (INCITS) at http://www.incits.org/ or by contacting the INCITS Secretariat, c/o Information Technology Industry Council, 1250 Eye Street NW, Suite 200, Washington, DC 20005, Phone 202-737-8888, Fax 202-638-4922, and Email incits@itic.org.

ISO/IEC 18023-3 is part of the Synthetic Environmental Data Representation and Interchange Specification (SEDRIS) suite of international standards. ISO/IEC 18023-3 specifies a binary encoding format for SEDRIS transmittals. This format conforms to parts 1 and 2 of ISO/IEC 18023. ISO/IEC 18023 in its entirety specifies a Data Representation Model (DRM), an abstract transmittal format (ATF), the SEDRIS transmittal format binary encoding (STF), and an application program interface (API) that supports both the DRM and the transmittal formats in creating and accessing SEDRIS transmittals as components of a data interchange mechanism for environmental representations. Other components of the SEDRIS interchange mechanism required to describe environmental data are described in two other international standards are ISO/IEC 18025—Environmental data coding specification (EDCS) and the ISO/IEC 18026—Spatial reference model (SRM)
