"2.2 Government documents.

2.2.1 Specifications. The following specifications form a part of this document to the extent specified herein. Unless otherwise specified, the issues of these documents are those listed in the issue of the Department of Defense Index of Specifications and Standards (DoDISS) and supplement thereto, cited in the solicitation (see 6.2).

SPECIFICATIONS

DEPARTMENT OF DEFENSE

MIL-P-53022 - Primer, Epoxy Coating, Corrosion Inhibiting, Lead and Chromate Free

MIL-C-53072 - Chemical Agent Resistant Coating (CARC) System Application Procedures and Quality Control Inspection

(Unless otherwise indicated, copies of the above specifications are available from the Defense Automated Printing Service, Bldg 4D (DPM-DODSSP), 700 Robbins Avenue, Philadelphia, PA 19111-5094.)"

PAGE 3

* Add the following new paragraph:

3.2.1.1 Surface finish and painting. When specified (see 6.2), the exterior surfaces of the heater tank assembly, shroud, base rack, and burner rack shall be cleaned and conditioned in accordance with best commercial practice. After the surfaces are thoroughly dried from cleaning and conditioning,

a coat of primer shall be applied per MIL-P-53022 to all items, excluding the shroud. After the primer has thoroughly dried, the heater tank assembly, base rack, and burner rack shall be given a finish coat of color green 383 paint in accordance with MIL-C-53072. The shroud of the cook pot cradle shall have a finish coat of heat-resistant green paint to match color green 383 (see 6.11.1). The paint shall not contain lead or chromate. Rough or sharp edges and corners, burrs and slivers shall be removed prior to any painting. The paint shall be applied so that it is continuous, smooth and adherent, without runs, drops, streaks, pinholes, cheeks, cracks, chips, or voids. The coating shall be free from imbedded foreign matter and shall not show peeling, flaking or blistering. Name plates shall remain free of paint, but over spray on inside surfaces is permissible. The griddle shall be anodized (see 6.11.2).

PAGE 6

* 4.3, line 3, after "properties analysis,: Add: "certification,".

PAGE 7

* TABLE III, add the following under "OPERATING REQUIREMENTS" following the first entry, in their respective columns:

"Surface finish and painting 3.2.1.1 4.3.2.1.1"

PAGE 8

* Add the following new paragraph:

"4.3.2.1.1 Surface finish and painting certification. The contractor shall certify that the exterior surfaces of the heater tank assembly, shroud, base rack, and burner rack were cleaned and conditioned in accordance with best commercial practice. Priming and painting practices used on the exterior surfaces of the above mentioned items shall be certified as conforming to MIL-P-53022, MIL-C-53072, or heat-resistant green paint as specified, and that the paint contains no lead or chromate. The contractor shall certify that all rough or sharp edges or corners, burrs, or slivers were removed prior to painting, and that the paint was applied so as to be continuous, smooth and adherent, containing no runs, drops, streaks, pin holes, cheeks, cracks, chips, or voids. The contractor shall also certify that the coating is free of imbedded foreign matter and will not peel, flake, or blister, and that the name plates are free of paint. The contractor shall certify that the griddle was anodized."

PAGE 11

* 6.2.c., line 2, delete "(see 2.3)", and substitute: "(see 2.2.1 and 2.3)."

* 6.2, Add the following new sub-letter "h.":

"h. When the exterior surfaces of the heater tank assembly, shroud, base rack, burner rack, and griddle base have to be painted (see 3.2.1.1)."

6.7.2, Delete and substitute:

"6.7.2 KCLFF-E, type II. Each complete KCLFF-E, type II, includes the equipment listed below in addition to the equipment listed in 6.7.1.

Item No.		Description	National Stock Number	Quantity
1	*	Chest, ice storage	4110-01-452-7317	1
2	*	Food container, insulated with inserts	7360-01-419-8500	12
3	*	Griddle assembly	7310-01-391-3065	1
4		Range outfit	7360-01-479-0344	1"

* Add the following new paragraphs:

6.11 Surface finishing.

6.11.1 Painting. Painting of the shroud, burner rack, and heater tank assembly in accordance with MIL-P-14105, has been known to satisfy this requirement.

6.11.2 Anodizing. For the griddle, a finish in accordance with type III, class 1 of MIL-A-8625 with a minimum thickness of 2.0 mils, unsealed, using the Sanford process, or equal, has been known to satisfy this requirement (see 3.2.1.1).

NOTE: The margins of this amendment are marked with asterisks(*) to indicate where changes from the previous amendment were made. This was done as a convenience only and the Government assumes no liability whatsoever for any inaccuracies in these notations. Bidders and contractors are cautioned to evaluate the requirements of this document based on the entire content irrespective of the marginal notations and relationship to the last previous amendment.
