MIL-P-60314 (MU)
Amendment 1
20 November 1973

MILITARY SPECIFICATION

PRIMER, PERCUSSION, M32, PARTS FOR:

This Amendment forms a part of Military Specification MIL-P-60314 (MU) dated 29 January 1965.

In Paragraph 2.1 under Specifications: Delete "MIL-I-45607-Inspection Equipment, Supply and Maintenance of." Delete "MIL-I-45208-Inspection Requirements, General Specifications for."

Add the Following:

"MIL-C-45662 -Calibration System Requirements"

Paragraph 2.1, under standards, add the following:
"MIL-STD-1168 -Lot Numbering of Ammunition."
"MIL-STD-1169 -Packaging, Packing and Marking for Shipment of Inert Ammunition Components."

Paragraph 2.1 under Drawings, delete "Ordnance Corps" and substitute "Army"

Paragraph 2.1 under Publications, delete the following: "Ordnance Corps". "IEL-6112755 - Index of Inspection Equipment Lists."

Paragraph 3.3 -Add the following sentence at end of the paragraph: "All required markings shall be neat and sharply defined."

Add the following paragraph:

3.4 First article inspection. -This specification makes provisions for first article inspection. Requirements for the submission of first article samples by the contractor shall be as specified in the contract.

Delete Paragraph 4.1.1 in its entirety and substitute the following:

FSC: 1375

Check the source to verify that this is the current version before use.

4.1.1 Submission of product. - At the time each completed lot of items deliverable under the contract is submitted to the Government for acceptance, the contrator shall supply the following information accompanied by a certificate which attests that the information provided is correct and applicable to the product being submitted:

a. A statement that the lot complies with all of the quality assurance provisions specified in this specification.

b. Drawing and specification number and date, together with identification and date of changes thereto.

c. A statement that all material purchased by the contractor meets requirements, when such material is controlled by Government or commercial specifications referenced in any of the contractual documents, and the certificates of conformance are on file and available for review.

d. Number of items in the lot.

e. Date Submitted.

The certificate shall be signed by a responsible agent of the certifying organization. The initial certificate submitted shall be substantiated by evidence of the agent's authority to bind his principal. Substantiation of the agent's authority will not be required with subsequent certificates unless, during the course of the contract, this authority is vested in another agent of the certifying organization.

Delete Paragraphs 4.1.2 and 4.1.3 in their entireties.

Delete Paragraphs 4.2, 4.2.1, 4.2.2 and 4.2.3 in their entireties and substitute the following:

"4.2 First Article inspection

4.2.1 Submission. - The contractor shall submit a first article sample as designated by the contracting officer for evaluation in accordance with the provisions of 4.2.2. The first article sample shall consist of 25 assemblies and 25 complete sets of parts (i.e. 25 each of every component and every subassembly) which have been produced by the contractor or furnished by a supplier and which have been manufactured using the same production processes, procedures and equipment which will be used in fulfilling the contract. All parts and materials, including packaging and packing, shall be obtained from the same source of supply as will be used in regular production. Prior to submission, the contractor shall inspect the sample to the degree necessary to assure that it conforms to the

Check the source to verify that this is the current version before use.

requirements of the contract and submit a record of this inspection with the sample, including statements of findings for materials, processes and tests. A sample containing known defects will not be submitted unless specifically authorized by the Contracting Officer. A first article sample, or portion thereof, as directed by the contracting officer, shall also be submitted whenever there is a lapse in production for a period in excess of 90 days or whenever a change occurs in manufacturing process, material used, drawing or specification such as to significantly affect product uniformity as determined by the Government.

4.2.2 Inspections to be performed.-Assemblies and components will be subjected by the Government to any or all the examinations or tests specified in 4.3.2 of this specification and any or all requirements of the applicable specifications."

"4.2.3 Rejection.-If any assembly or component fails to comply with any of the applicable requirements, the first article sample shall be rejected. The Government reserves the right to terminate its inspection upon any failure of an assembly or component to comply with any of the stated requirements."

Delete Paragraph 4.3.1 in its entirety and substitute the following:

"4.3.1 Lot Formation.-The term "inspection lot", as used in this specification, is defined as an essentially homogeneous collection of units of product from which a representative sample is drawn and inspected to determine conformance with applicable requirements. The sample selected shall represent only that quantity of units from which the sample was drawn and shall not be construed to represent any prior or subsequent quantities presented for inspection. Homogeneity shall be considered to exist provided the inspection lot has been produced by one manufacturer, in one unchanged process, using the same materials and methods, in accordance with the same drawing, same drawing revisions, same specifications and same specification revisions, and complies with

the provisions for submission of product as specified in Standard MIL-STD-105. Changes to the process, specifications or drawings, not affecting safety, performance, interchangeability or storage, as determined by the Government, shall not be deemed to alter the homogeneity of an inspection lot. All material submitted for inspection in accordance with this specification shall comply with the homogeneity criteria specified herein, regardless of the type of sampling procedure which is being applied to determine conformance with requirements. Lot numbering, as required, shall be in accordance with MIL-STD-1168."

In the sub-sections under 4.3.2 make the following changes:

Delete "Code No. (see 6.2)" and the code numbers "01001" through and including "03011" wherever they appear.

Add "CD" after the word Gage wherever it appears.

Delete paragraphs 4.3.3, 4.3.3.1, 4.3.3.2, and 4.3.3.3 in their entireties and substitute the following:

" 4.3.3 Inspection Equipment. - The inspection equipment required to perform the examinations and tests prescribed in this section is identified under the "Method of Inspection" headings in 4.3.2"

"4.3.3.1 - Inspection Equipment Capability and Accuracy. - All inspection equipment and facilities shall be of adequate quality and quantity to perform properly and accurately all the required inspections, measurements and tests. The inspection equipment shall be maintained in satisfactory condition for the continued proper performance of these functions and shall be calibrated in accordance with the provisions of MIL-C-45662."

"4.3.3.2 Government Rights to Documentation. - Inspection equipment drawings and lists provided and revised in accordance with the requirements may be used by DOD activities for design, procurement, manufacture, testing, evaluation, production and receiving inspection, overhaul, shipping, storage, identification of stock, maintenance of equipment, construction, survey and whenever

inspection equipment drawings are needed."

In Paragraph 5.1.1 delete "Specification MIL-P-10025" and substitute "MIL-STD-1169"

In Section 6, delete Paragraphs 6.2, 6.3, 6.3.1, 6.3.2,, 6.3.3, 6.3.4, 6.3.5, 6.3.6, 6.3.7, 6.4, 6.5, 6.5.1, and 6.5.2, and substitute the following:

"6.2 Inspection Equipment Designs. - Inspection equipment designs are of two types-Government Special Inspection Equipment (SIE) designs and Contractor Designs. SIE designs, if available are designated by drawing numbers (on the Equipment Lists referenced on the Equipment Tabulation) or (under the "Method of Inspection" headings in Section 4). Design responsibility for all other inspection equipment is assigned to the Contractor. Equipment to be designed by the Contractor is designated "CD". The Contractor need not furnish any design when a complete Government SIE design is provided. Unless other wise specified, however, the contractor may submit alternate or modified contractor designs of SIE in accordance with 6.2.2 and 6.2.3, should he elect to do so."

6.2.1 SIE Designs. - SIE designs may consist of any of the following:

a. Detailed drawings which completely depict all information necessary for the fabrication and use of the item of inspection equipment.

b. A source control drawing or a specification control drawing as defined in MIL-STD-100.

c. An envelope drawing, as defined in MIL-STD-100, which establishes the criteria which a detail design shall meet. When envelope drawings are specified, the Contractor shall prepare designs which comply with the criteria therein.

6.2.2 Contractor Designs. - Contractor designs are required for all inspection equipment for which SIE designs are not specified, and may include commercial equipment which the Contractor proposes to use. (Commercial equipment is defined as unmodified equipment which is cataloged and available for purchase by the general public). Contractor designs shall include appropriate operating instructions, calibration procedures and maintenance procedures. Commercial equipment shall be fully described by catalog listings or other means which provide sufficient information to

permit identification and evalution by the Government and may include illustrations and engineering data. Designs shall be prepared for any special fixture (s) required to be used with commercial equipment, or with SIE designs, if not otherwise covered thereby; (see 6.2.1 c). Designs shall be of the category and form (per MIL-D-1000) specified in the Contract Data Requirements Lists (DDForm 1423). The Contractor is referred to MIL-HDBK-204, "Inspection Equipment Design" for guidance. The specification number, paragraph number and defect number (or other specific identifying information) from Section 4 of this specification shall be referenced on each Contractor design, together with the component or assembly drawing number and revision letter to which the specific design applies."

"6.2.3. Submission of Designs for Approval. - Contractor designs shall be approved by the Government prior to fabricating or procuring the equipment. Designs shall be submitted for approval in accordance with the stipulations, time frame and distribution specified in the Contract Data Requirements List (DD Form 1423) or in the contract. Partial submission of inspection equipment is permissible and encouraged. However, the completion date for design review will be based on the date of final submission of designs. Picatinny Arsenal design review will normally be accomplished within one month after receipt."

"6.3 New Material Test Sample Requirements. - All requests for permission to use materials other than those specified on applicable drawings or specifications should be accompanied by a sample of the proposed substitute material to permit evaluation by Picatinny Arsenal. Prior to approval, all substitute materials must be tested for compatibility with Black Powder, M9 Propellant and with the M35 Primer charge mixture, in addition to any testing required to evaluate the performance of the proposed substitute."
