MS36155-1 MS36155-2 MS36155-3

MATERIAL: The evaporator shall be made of borosilicate glass and tetrafluoroethylene parts that can be sterilized and mounted on a steel laboratory stand. All other parts shall be as specified in the design portion of this MS or as required to meet satisfactory operation of the equipment.

DESIGN: MS36155-1 evaporator shall consist of a corrosion-resistant monel ȝ 24/40 shaft/spindle which rotates on oilite bronze bearings within a monel housing and which has a ȝ 12/30 tubulature/side arm for connecting to a vacuum pump. An induction drive motor is used to rotate a flask, sizes 100 to 1000 mL, for rapid evaporation of liquids and solvents. The approximate dimensions are 27 cm long; side arm, 15 mm. Power requirements 115 volt, 60 Hz, 10W.

MS36155-2 evaporator, supported on a V or H type laboratory stand and 650 mm stainless steel rod, has a sparkless induction motor drive unit, with variable speed from 30-240 rpm. A 1000 ml receiving flask, for collecting the condensed vapors, is clamped to the bottom of the condenser. A feeding tube attached to a stopcock at the upper end of the condenser permits continuous feeding of solution into the 1000 mL evaporating flask, which has a 35/20 ball joint. Power requirements 115 volts, 60 Hz.

MS36155-3 evaporator is the same as MS36155-2, but equipped with temperature controlled water bath consisting of condensing pan bracket assembly and 500 watt heater and automatic thermoregulator. Power requirements 115 volts, 60 Hz.

All electrical components shall conform to the standards of Underwriters Laboratories, Incorporated.

NOTE: Items differing from this Military Standard by minor variations in design or dimensions are considered standard under this document, provided such variations do not affect performance and are not in conflict with the material requirements specified herein.

USER ACTIVITIES: ARMY - MD, DM
NAVY - MS

REVIEWER ACTIVITIES: ARMY - ME
NAVY - OS
AIR FORCE - 82

APPROVED 20 JUN 1983 REVISED

This military standard is approved for use by all Departments and Agencies of the Department of Defense. Selection for all new engineering and design applications and for repetitive use shall be made from this document.
