FEDERAL SPECIFICATION

FEED, DRY, FOR DOGS

This specification was approved on the above date by the Commissioner, Federal Supply Service, General Services Administration, for the use of all Federal agencies.

1. CLASSIFICATION

1.1 Types and classes.—Dry feeds for dogs shall be of the following types and classes, as specified:

Type I.—Dog feed with raw cereals.
Type II.—Dog feed with cooked cereals.
Class 1.—Low fat.
Class 2.—High fat.

1.2 Forms.—Dry feed of all types and classes under this specification shall be of the following forms as specified:

Form A.—Meal.
Form B.—Pellets.

2. APPLICABLE SPECIFICATIONS AND OTHER PUBLICATIONS

2.1 Specifications.—The following Federal Specifications of the issues in effect on date of invitation for bids, form a part of this specification:

N–F–212—Feedstuffs, Concentrated.
RR–S–366—Sieves; Standard, Testing.
SS–S–31—Salt; Table and Tablets.

2.2 Other publications.—The following publications, of the issues in effect on date of invitation for bids, form a part of this specification:

Governmental:

Federal Food, Drug, and Cosmetic Act and General Regulations for its Enforcement.

Handbook of Official Grain Standards of the United States.

Regulations Governing Meat Inspection of the United States Department of Agriculture.

Nongovernmental:

Official Methods of Analysis of the Association of Official Agricultural Chemists.

Pharmacopoeia of the United States.

(Copies of Federal specifications, the Federal Specifications Index, and the governmental publications referenced above may be obtained upon application, accompanied by money order, coupon, or cash to the Superintendent of Documents, Government Printing Office, Washington 25, D. C. Prices may be obtained from the Superintendent of Documents.

(Official Methods of Analysis of the Association of Official Agricultural Chemists is published by the Association of Official Agricultural Chemists, P. O. Box 540, Benjamin Franklin Station, Washington 4, D. C. The Pharmacopoeia of the United States is distributed by The Mack Publishing Company, Easton, Pa.

(Regulations Governing Meat Inspection of the United States Department of Agriculture may be obtained without charge from U. S. Department of Agriculture, Information Branch, Washington 25, D. C.)

2.3 Specifications applicable only to individual departments are listed in section 7.

3. REQUIREMENTS

3.1 Materials.

3.1.1 *Type I*—Dry feed with raw cereals shall be prepared according to the formula in table I.

Check the source to verify that this is the current version before use.

TABLE I.—*Composition of type I*

Ingredient	Applicable Fed. Spec. or grade	Percent by weight
Meat meal, 55 percent, minimum protein	N-F-212	8.00
Fish meal, 60 percent, minimum protein	N-F-212	5.00
Skimmed milk, dried	N-F-212	4.00
Soybean oil meal	N-F-212	12.00
Wheat germ oil meal	N-F-212	8.00
Wheat bran	N-F-212	4.00
Dried yeast, brewers'	N-F-212	2.00
Dried fermentation solubles	N-F-212	1.00
Steamed bone meal	N-F-212	2.00
Vitamin A and D feeding oil	N-F-212	.25
Salt, iodized	SS-S-31	.50
Iron oxide (ferric oxide)		.02
Fat	Edible grade having an iodine value within the range of 48 to 60 and containing one of the antioxidants permitted by regulations of the Bureau of Animal Industry and used in accordance with their regulations for its use with lard.	2.00
Cereals:		Balance of formula shall consist of at least 2 of these listed, no one being present in an amount greater than 30 percent of total.
Wheat	No. 2 or better of the classes hard red winter or hard red spring.	
Corn, dent	No. 2 yellow.	
Oat groats	N-F-212	
Barley, hulled	N-F-212	

3.1.2 *Type II, class* 1.—Dry feed with cooked cereals, low fat shall be prepared according to the formula in table II. The cereal ingredients, wheat and/or corn, and/or oats, and/or barley, shall be processed either by grinding, cooked until there is no raw starch remaining and dried before being incorporated in the feed, or they may consist of flaked cereals which have been heat-treated, without scorching, until there is no raw starch remaining. The other ingredients shall not be cooked.

TABLE II.—*Composition of type II, class* 1

Ingredient	Applicable Fed. Spec. or grade	Percent by weight
Meat meal, 55 percent, minimum protein	N-F-212	8.00
Fish meal, 60 percent, minimum protein	N-F-212	5.00
Skimmed milk, dried	N-F-212	4.00
Soybean oil meal	N-F-212	12.00
Wheat germ oil meal	N-F-212	8.00
Wheat bran	N-F-212	4.00
Dried yeast, brewers'	N-F-212	2.00
Dried fermentation solubles	N-F-212	1.00
Steamed bone meal	N-F-212	2.00
Vitamin A and D feeding oil	N-F-212	.25
Salt, iodized	SS-S-31	.50
Iron oxide (ferric oxide)		.02
Fat	Edible grade having an iodine value within the range of 48 to 60 and containing one of the antioxidants permitted by regulations of the Bureau of Animal Industry and used in accordance with their regulations for its use with lard.	2.00
Cereals, processed:		
Wheat	No. 2 or better of the classes hard red winter or hard red spring.	Balance of formula shall consist of at least 2 of these listed, no one being present in an amount greater than 30 percent of total.
Corn, dent	No. 2 yellow.	
Oat groats	N-F-212	
Barley, hulled	N-F-212	

3.1.3 *Type II, class* 2.—Dry feed with cooked cereals, high fat, shall be prepared according to the formula in table III. The cereal ingredients shall be as specified for type II, class 1 in 3.1.2.

TABLE III.—*Composition of type II, class 2*

Ingredient	Applicable Fed. Spec. or grade	Percent by weight
Meat meal, 55 percent, minimum protein	N-F-212	8.00
Fish meal, 60 percent, minimum protein	N-F-212	5.00
Skimmed milk, dried	N-F-212	4.00
Soybean oil meal	N-F-212	12.00
Wheat germ oil meal	N-F-212	8.00
Wheat bran	N-F-212	4.00
Dried yeast, brewers'	N-F-212	2.00
Dried fermentation solubles	N-F-212	1.00
Steamed bone meal	N-F-212	2.00
Vitamin A and D feeding oil	N-F-212	.25
Salt, iodized	SS-S-31	.50
Iron oxide (ferric oxide)	----------	.02
Fat	Edible grade having an iodine value within the range of 48 to 60 and containing one of the antioxidants permitted by regulations of the Bureau of Animal Industry and used in accordance with their regulations for its use with lard.	8.00
Cereals, processed:		Balance of formula shall consist of at least 2 of these listed, no one being present in an amount greater than 30 percent of total.
Wheat	No. 2 or better of the classes hard red winter or hard red spring.	
Corn, dent	No. 2 yellow.	
Oat groats	N-F-212	
Barley, hulled	N-F-212	

3.2 **Nutrients.**—The feeds shall contain nutrients as indicated in table IV.

TABLE IV.—*Nutrients*

Nutrients	Minimum value	Maximum value
Proximate analysis:		
Crude protein	22 percent	----------
Crude fat:		
Type I	5 percent	----------
Type II, class 1	5 percent	----------
Type II, class 2	11 percent	----------
Crude fiber	----------	5 percent
Ash	----------	9 percent
Minerals and vitamins:		
Calcium	1.5 percent	----------
Phosphorus	1.0 percent	----------
Vitamin A	2000 U.S.P. units per pound	----------
Vitamin D	175 U.S.P. units per pound	----------
Thiamine	2.0 mg. per pound	----------
Riboflavin	1.3 mg. per pound	----------
Niacin	18.0 mg. per pound	----------
Pantothenic acid	4.5 mg. per pound	----------

3.3 Forms (A and B).

3.3.1 *Form A, type I, meal.*—The feed shall be ground and the degree of grinding shall be determined by the use of U. S. standard woven-wire-cloth sieves described in Federal Specification RR–S–366. Not more than 15.0 percent, by weight, shall remain on a No. 20 sieve, and not more than 50.0 percent shall pass through a No. 40 sieve.

3.3.2 *Form A, type II, meal.*—The degree of grinding of the finished meal shall be determined by the use of U. S. standard woven-wire-cloth sieves described in Federal Specification RR–S–366. Not more than 5.0 percent, by weight, shall remain on a No. 4 sieve, and not more than 15.0 percent shall pass through a No. 40 sieve.

3.3.3 *Form B, types I and II, pellets.*—Dry, pelleted feed for dogs shall be ground and formed into firm pellets, oval in shape, cross-sectional dimensions approximately ½ x 1 inch. The length shall be approximately 1 inch. The pellets shall be sufficiently soft for ready consumption by the animals and sufficiently hard so that there are no more than 7.5 percent siftings when tested in accordance with 4.3.2.

3.4 Federal Food, Drug, and Cosmetic Act.—All deliveries shall conform to applicable provisions of the Federal Food, Drug, and Cosmetic Act.

3.5 Workmanship.—Dry feed, for dogs shall be processed and stored under sanitary conditions in accordance with good commercial practice. Particular care should be taken to keep the ingredients or the feed away from insecticides or from other materials which will leave residues in, or affect the flavor of the ingredients or the feed.

3.6 Age of ingredients and storage of the feed.—The ingredients, except for the iron oxide, shall not be more than 18 months old at the time of manufacture of the feed, and in accordance with good commercial practice shall be as fresh as possible without payment of premium. The feed shall not be stored for more than 60 days before shipment to the purchasing agency.

3.7 Limitation on quantity in a single lot.—The purchasing agency shall be permitted to receive deliveries of the mixed feed in such quantity that it may be fed in a limited time to insure freshness. The minimum size lot shall be 100 pounds.

4. SAMPLING, INSPECTION, AND TEST PROCEDURES

4.1 Sampling.—Samples of the finished product under this specification and samples of ingredients entering into the manufacture of the feed shall be taken by the Government inspector at any time to determine compliance with the requirements.

4.2 Inspection.

4.2.1 *General.*—Inspection shall be made by the purchasing agency or a duly authorized representative, at the time and place designated by the purchasing agency. It may be made at the site of manufacture, both during and after processing, at any suitable point in transit, and/or after delivery to the point of destination.

4.2.2 *Factory inspection.*—If inspection is made during processing at the factory, the passing as satisfactory of any detail of processing or materials shall not relieve the contractor of responsibility for faulty workmanship or materials which may be discovered any time prior to final inspection.

4.2.3 *Final inspection.*—Unless otherwise specified, final inspection shall be made after delivery to the point of destination. (See 6.2 and 6.3).

4.3 Tests.

4.3.1 *Chemical and biological tests.*—Unless otherwise specified, tests shall be made

Check the source to verify that this is the current version before use.

in accordance with the applicable method promulgated by either the Pharmacopoeia of the United States or the Association of Official Agricultural Chemists.

4.3.2 *Physical test for siftings.*—The siftings (see 3.3.3) shall be determined by shaking a uniform sample of at least 20 pounds of the feed for 2 minutes on a sieve with openings of a size equivalent to that of openings in a U. S. standard No. 8 woven-wire-cloth sieve. The screen should be of sufficient size so the feed will be in a single layer of pellets.

5. PREPARATION FOR DELIVERY

5.1 Packaging.—Unless otherwise specified, commercial packaging is acceptable under this specification.

5.2 Marking.

5.2.1 *General.*—Any labeling that complies with the Federal Food, Drug, and Cosmetic Act, and regulations promulgated thereunder is acceptable under this specification. The crude protein, fat, and fiber content of the manufactured feed shall be stated, either on the container or on a suitable tag attached thereto.

5.2.2 *Shipping containers.*—Unless otherwise specified, shipping containers shall be marked with the name of product, net contents in pounds, the name of contractor, and other pertinent information as specified by the purchasing agency (6.1).

5.3 Packing.—The feed shall be prepared for shipment to permit acceptance by carrier for transportation at the lowest applicable rate, and to afford maximum protection from normal hazards of transportation.

6. NOTES

6.1 Invitation for bids should state the type, class, and form of feed, the size and kind of package, additional labeling, or other option desired by the purchasing agency.

6.2 Contractor's inspection.—The contractor should be required in the invitation for bids to assure that the product conforms to the specification prior to submission to the Government for final inspection.

6.3 Destination inspection.—When the finished product has been inspected and passed at point other than destination, the contract should require that the product be inspected at destination for condition and quantity only.

Patent notice.—When Government drawings, specifications, or other data are used for any purpose other than in connection with a definitely related Government procurement operation, the United States Government thereby incurs no responsibility nor any obligation whatsoever; and the fact that the Government may have formulated, furnished, or in any way supplied the said drawings, specifications, or other data, is not to be regarded by implication or otherwise as in any manner licensing the holder or any other person or corporation, or conveying any rights or permission to manufacture, use, or sell any patented invention that may in any way be related thereto.

7. DEPARTMENTAL REQUIREMENTS

7.1 The following departmental specifications of the issues in effect on date of invitation for bids, and special requirements, shall form a part of this specification, and shall be applicable to purchases made under this specification by the different departments.

7.2 Army and Air Force.

7.2.1 *Applicable specifications.*

Military Specification:

JAN–P–118—Packaging and Packing for Overseas Shipment — Sacks, Paper, Shipping, Multiwall.

Source: https://assist.dla.mil -- Downloaded: 2026-10-26T11:12Z
Check the source to verify that this is the current version before use.

U. S. Army Specifications:

94–46045—Marking; Exterior, Domestic and Export Shipment, by Contractors.[1]

100-2 —Standard Specification for Marking Shipments by Contractors.[2]

[1]Applicable to Air Force purchases only.
[2]Applicable to Army purchases only.

(Copies of specifications required for Army purchases may be obtained upon application to the procuring agency. Both the title and identifying symbol or number should be stipulated when requesting copies.

(Copies of specifications required for Air Force purchases may be obtained from the Commanding General, Air Matériel Command, Wright-Patterson Air Force Base, Dayton 1, Ohio. Both the title and identifying symbol or number should be stipulated when requesting copies.)

7.2.2 *Packing for Overseas Shipment.*—Not more than 50 pounds of the product shall be packed in a style 2-X or 4-X multiwall paper shipping sack constructed in accordance with Specification JAN–P–118.

7.2.3 *Marking.*—Each shipping container for the Army shall be marked in accordance with U. S. Army Specification 100–2; and for the Air Force in accordance with U. S. Army Specification 94–40645.

This specification is a part of Section IV, Part 5, of the Federal Standard Stock Catalog.

For sale by the Superintendent of Documents, Washington 25, D. C. Price ents.
