MIL-R-13742
AMENDMENT I
28 April 1972

MILITARY SPECIFICATION
RDX, DESENSITIZED

This Amendment forms a part of Military Specification MIL-R-13742, dated 3 November 1954, and is mandatory for use by all Departments and Agencies of the Department of Defense.

Paragraph 2.1: Delete: "MIL-L-2104" in its entirety, and substitute "MIL-P-14796 (MU) Process Oil (For Use With Ammunition)".

Change: "MIL-R-398" to read "MIL-R-00398 (ORD)".

Paragraph 3: Change: "MIL-R-398, Type II, Class II," to read "MIL-R-00398 (ORD), Type B, Class A,".

Delete: "MIL-L-2104" and substitute "MIL-P-14796".

Add the following to the end of this paragraph: "If the incorporation of RDX with Process Oil is made prior to granulation analysis of the RDX, and analysis indicates failure of the RDX to meet Class A Granulation requirements, this composition may be blended with acceptable Desensitized RDX and then tested to meet Class A RDX requirements as specified in 4.8."

Paragraph 4.4.2.3: Delete "carbon tetrachloride" and substitute "benzene".

Paragraph 4.5.1: Delete "carbon tetrachloride" wherever it appears and substitute "aliphatic naphtha".

Paragraph 4.5.2: Delete "Engine Oil Content" and substitute "Oil Content".

Paragraph 4.6: Delete "carbon tetrachloride" and substitute "benzene".

Paragraph 4.7: Delete "carbon tetrachloride" and substitute "benzene".

Add the following new paragraphs:

"4.8 Determination of granulation.-(Applicable only if the RDX incorporated with Process Oil did not meet Class A Granulation). A sufficient representative sample of Desensitized RDX shall be sampled to yield a dry weight of approximately 50 gm. of RDX. The sample shall be placed into a medium porosity filter funnel and washed thoroughly with Aliphatic Naphtha until all traces of oil are removed. The remaining RDX shall be dried in an oven maintained at 105°C and tested for granulation as specified in 4.3.6 of MIL-R-398C."
