(Copies of specifications, standards, drawings, and publications required by contractors in connection with specific procurement functions should be obtained from the procuring agency or as directed by the contracting officer.)

3. REQUIREMENTS

3.1 Material.-Materials and parts shall be in accordance with applicable drawings and specifications.

3.2 The metal parts assemblies shall comply with all requirements specified on Drawing P-81949, and all drawings referenced thereon, and with all requirements specified in applicable specifications.

3.3 The interior and exterior coatings, specified on the drawing shall be applied in such a manner as to insure an even distribution and thorough coating.

3.4 Workmanship

3.4.1 All parts shall be free of chips, dirt, grease, rust, and other foreign material. The cleaning method used shall not be injurious to any of the parts, nor shall the parts be contaminated by the cleaning agents used.

3.4.2 The inside of each metal parts assembly shall be free of lumps of brazing material.

4. QUALITY ASSURANCE PROVISIONS

4.1 Lot.-A lot shall consist of all metal parts assemblies manufactured by one manufacturer under one contract, in one unchanged process in accordance with the same drawing, same drawing revision, same specification, and same specification revision.

4.2 Sampling.-Number of samples, acceptance, and rejection criteria used for determination of lot acceptance for the tests specified in 4.4 and 4.5, shall be in accordance with Standard Inspection Procedure ORD-SIP-M6-503.

4.3 Inspection.-Inspection shall be as specified in Specifications QQ-M-151 and MIL-G-2550.

4.4 Test of cubes.-Sample cubes shall be ground on two opposite sides to a depth of .010 inch, minimum. Each sample cube shall be checked on the ground surface for Rockwell "C" scale hardness to comply with the requirement specified on the drawing.

4.5 Internal air pressure test.-Sample metal parts assemblies shall be placed in a satisfactory fixture, and subjected to the internal air pressure specified on the drawing. The gage used shall be capable of determining a pressure drop of .06 psi.

5. PREPARATION FOR DELIVERY

5.1 Packaging, packing, labeling, and marking.-Packaging, packing, labeling, and marking shall be as specified in Specification MIL-P-10025.

5.2 Data cards.-Data card information shall be as specified in Specification MIL-G-2550.
