COMMERCIAL ITEM DESCRIPTION

Breathing Appartus, Self-Contained,
(30 Minute)

The General Services Administration has authorized the use of this commercial item description in preference to Federal Specification GG-B-675.

1. Scope. This commercial item description (CID) is for the standardization of the 30 Minute Self-Contained Breathing Apparatus. This CID is limited to two qualified sources, Mine Safety Appliances Inc. and Scott Aviation Company, and covers respiratory protection in oxygen-deficient or toxic atmosphere containing vapors or gases. Protection is not provided against poisoning by skin absorption.

2. Applicable Documents. The following documents form a part of this commercial item description to the extent specified herein:

MIL-STD-1805A - Breathing Apparatus, Self-Contained, 30 Minute

(Copies of the standard required by manufacturers in connection with specific acquisition functions should be obtained from the contracting activity as directed by the contracting officer).

30 CFR 11 - Respiratory Protection Devices; Tests for Permissibility; Fees (25 Mar 72).

(The Code of Federal Regulations (CFR) and the Federal Register (FR) are for sale on a subscription basis from the Superintendent of Documents, U.S. Government Printing Office, Washington DC 20402. When indicated, reprints of certain regulations may be obtained from the Federal agency responsible for issuance therof.)

3. Salient Characteristics.

3.1 Type. Compressed Air, one-half (1/2) hour duration, open circuit design.

3.2 Design. The apparatus shall be an individual respiratory protective device designed to provide the user with a respirable atmosphere from a compressed gas cylinder. The apparatus shall consist of six major groups: (1) The facepiece group, (2) The chest mounted positive pressure regulator assembly, (3) The backpack and harness assembly, (4) The alarm system, (5) The suitcase type carrying case, and (6) The respirator tester (if required as the designated base location).

Beneficial comments, recommendations,additions,deletions,.clarifications, etc., and any other data which may improve this document should be sent to: WR-ALC /TILBA, Robins AFB, GA. 31098-5609
