COMMERCIAL ITEM DESCRIPTION

MARKING MACHINE, ELECTRICAL WIRE-FLEXIBLE INSULATING SLEEVING

The General Services Administration has authorized the use of this commercial item description as a replacement for Military specification MIL-M-4528A(ASG) which is canceled.

Scope. This commercial item Description covers an electrically driven marking machine used to mark electrical wire and sleeving for identification purposes.

Salient Characteristics

Shall mark wire with O.D. of .25 inch for maximum length of marking of 1-1/2 inch.

Shall mark vinyl, nylon, kynar, teflon and conventional insulations with heated type of roll leaf foil.

Shall mark flexible insulating sleeving in lengths, in a flattened position.

Shall have the following adjustments for spacing of marking on wire and sleeving.

1. 3/8" min, 2-1/8" max center to center.
2. 1-1/2" min, 6" max center to center.
3. 2-1/2" min, 8" max center to center.

May have air operated marking mechanism.

Electric motor must operate on 115 volt, single phase, 00 cycle current with thermal overload protector.

Control panel must have an accurate means of temperature control within + or - 5 degrees.
