COMMERCIAL ITEM DESCRIPTION

CLEANER, ULTRASONIC, NINE GALLON CAPACITY, AEROSPACE MAINTENANCE

The General Services Administration has authorized the use of this Commercial Item Description.

Abstract. This Commercial Item Description covers a nine gallon nominal capacity ultrasonic cleaner for general purpose aerospace cleaning.

Salient characteristics. The cleaner shall ultrasonically machine elements in aerospace maintenance shops. The cleaner shall ultrasonically remove soils that vary from fingerprints and light dust on nuclear ordnance components such as timers, small motors and relays to cutting oils containing grinding particles and machining chips from work pieces and tooling component such as the internal workings of air driven grinders, drills and reamers. The cleaner shall ultrasonically clean fluid filters such as F-16 series fuel filters and machine tool hydraulic oil filters. The cleaner shall ultrasonically remove oxide film from aluminum alloy components in prepration for welding.

1. Cleaning tank. Shall have minimum internal dimensions of either 12 inches by 18 inches by 10 inches deep or 12 inches by 16 inches by 12 inches deep. It shall have a heater controlled by an adjustable thermostat. Heating element may protrude into the tank. The cleaning tank shall be fitted with drain connection. Also it shall be supplied with its customary lift-off cover.

2. Generator chassis. May be either integral with the tank or it may be a separate unit that is cable connected to the tank.

3. Cleaner. Shall be suitable for either placement on a shop bench or mounting of the tank in an opening cut in the bench top or both. It shall be supplied with its customary 8 x 8 mesh, stainless steel parts basket. The cleaner shall be suitable for connection to a source of 120 volts 1 phase 50/60 hertz electric power. Also it shall be Federal Communication Commission type approved under FCC Regulations Part 18. The cleaner shall be furnished complete and ready to use after connection of required utility services.

4. Ultrasonic cleaning medium. Shall be water with readily available appropriate cleaning agents (such as soaps, detergents, wetting agents) added.

Beneficial comments, recommendations, additions, deletions, clarifications, etc. and any data which may improve this document should be sent to: Support Division, SA-ALC/MMDEMM, Kelly AFB TX 78241-5000.

Contractor certification. The contractor shall certify and maintain substantiating evidence that the product offered meets the salient characteristics of this Commercial Item Description, and that the product conforms to the producer's own drawings, specifications, standards and quality assurance practices. The Government reserves the rights to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

Metric products. Products manufactured to metric dimensions will be considered on an equal basis with those manufactured using inch-pound units, provided they fall within the tolerances specified in the inch/pound units, a request should be made to the contracting officer to determine if the product is acceptable. The contracting officer has the option of accepting or rejecting the product.

If a product is manufactured to metric dimensions and those dimensions exceed the tolerances specified in the inch/pound units, a request should be made to the contracting officer to determine if the product is acceptable.

The contracting officer has the option of accepting or rejecting the product.

Regulatory requirements. In accordance with section 23.403 of the Federal Acquisition Regulations, the Government's policy is to acquire items composed of the highest percentage of recovered materials practicable, consistent with maintaining a satisfactory level of competition without adversely affecting performance requirements of exposing the supplier's employees to undue hazards from the recovered materials.

Preservation, packaging, packing, labeling, and marking. The preservation, packaging, packing, labeling, and marking shall be as specified in the contract or order.
