TIER II ADOPTION NOTICE

SISO-STD-001.1, "Standard for Real-time Platform Reference Federation Object Model (RPR FOM)" was adopted for use by the Department of Defense (DoD) on 01 SEP 2016. Proposed changes by DoD activities must be submitted to the DoD Adopting Activity: Defense Modeling and Simulation Coordination Office, Attn: Standards, 4800 Mark Center Drive, Suite 16E08-08, Alexandria, VA 22350-3600 or via email at osd.mssc.secretariat@mail.mil. Copies may be obtained from the Simulation Interoperability Standards Organization at Simulation Interoperability Standards Organization, Inc., P.O. Box 781238, Orlando, FL 32878-1238, U.S.A. or via the web at http://www.sisostds.org.

This standard should be used with SISO-STD-001, "Standard for Guidance, Rationale, and Interoperability Modalities (GRIM) for the Real-time Platform Reference Federation Object Model (RPR FOM)." SISO-STD-001.1 defines a hierarchy of object and interaction classes for the High Level Architecture (HLA), IEEE Standard 1516™ specifications, that provides the capabilities defined in IEEE Standard 1278.1™, IEEE Standard for Distributed Interactive Simulation — Application Protocols. RPR FOM is designed to link simulations of discrete physical entities into complex virtual worlds. The data files associated with SISO-STD-001.1 may be downloaded from the SISO website.
