INCH-POUND

MIL-I-85760(OS)
AMENDMENT 1
18 JULY 1996

MILITARY SPECIFICATION

IGNITER, MK 304 MOD 0

This amendment forms a part of MIL-I-85760(OS) dated 1 August 1986, and is approved for use by the Naval Sea Systems Command, Department of the Navy, and is available for use by all departments and agencies of the Department of Defense.

PAGE 2

3.3: Delete and substitute:

"**3.3 Radiographic examination (M101).** All igniters for the first article test shall be radiograhically examined to determine the presence, location, and condition of components (see 4.6.2)."

Table I: Delete and substitute

Characteristics[1/]	Specification limit	
	Lower (L)	Upper (U)
Ignition delay (ms)[2/]	-	15
Maximum pressure (psig)[2/]	265	470
Rise time to 140 psig (ms)[2/]	-	25
Pressure-time-interval area (psig-ms)	1240	-

[1/]See 6.4 for definitions
[2/]These characteristics are classified as minor

PAGE 4

Table III: Delete "Radiographic 3.3 4.6.2"

Paragraph 4.5.1: Detete and substitute the following:

" **4.5.1 Inspection lot.** An inspection lot shall consist of an ignitier lot with no more than one lot of magnesium-fluorocarbon and one lot of initiators."

DISTRIBUTION STATEMENT A: Approved for public release, distribution is unlimited.

PAGE 5

Paragraph 4.5.2.2, second line: Delete "in accordance with MIL-STD-414, inspection level III," and substitute "at each temperature limit in accordance with MIL-STD-414, Inspection Level II,".

PAGE 7

Paragraph 6.4.3, first line: Delete "first indication of pressure" and substitute "the application of the firing current".

Add new paragraph 6.4.4 as follows:

" **6.4.4 Pressure-time-interval area.** The pressure-time-interval area is the sum of the average pressure multiplied by the time interval for each time increment from 0 to 25 milliseconds on the pressure time trace:

$$pressure\text{-}time\text{-}interval\ area = \sum_{0}^{25} (P_{ave} * dt)$$

where: P_{ave} is the average pressure for the given time interval, and dt is the length of the time interval and cannot be greater than 1 millisecond."
