COMMERICAL ITEM DESCRIPTION

RESISTORS, VARIABLE, NONWIRE WOUND, WIRE WOUND, PRECISION, NONPRECISION, GENERAL REQIUIREMENTS FOR

The General Services Administration has authorized the use of this Commercial Item Description (CID) for all federal agencies.

1. SCOPE. This CID covers the general requirements for wire wound, nonwire wound, precision, nonprecision variable resistors. The individual requirements for specific resistors are covered in the individual CID sheets. For technical assistance when utilizing parts for parameters not specifically detailed, contact the manufacturers listed on applicable CID sheets. The resistors covered by this CID are intended for commercial/industrial applications.

* 2. CLASSIFICATION/PART OR IDENTIFICATION NUMBER (PIN). This CID uses a classification system which is included in the PIN as shown in the following example (see 7.1)

A59497	01	***	*	*	*	*
Abbreviated CID number	Applicable CID sheet (two digits)	Resistance (see 3.2)	Resistance tolerance (see 3.3)	Physical parameters (see 3.4)	Operating shaft (see 3.5)	Electrical rotation and linearity (see 3.6)

3. SALIENT CHARTACTERISTICS

3.1 Interface and physical dimensions. The resistors supplied to this CID shall be as specified on the applicable CID sheet.

3.2 Resistance. The nominal resistance value expressed in ohms is identified by a three-digit number; the first two digits represent significant figures and the last digit specifies the number of zeros to follow. Resistance values for specific resistors are covered in the individual CID sheets.

3.3 Resistance tolerance. The resistance tolerance shall be as specified on the applicable CID sheet.

Comments, suggestions, or questions on this document should be addressed to Defense Supply Center Columbus, ATTN: DSCC-VAT, Post Office Box 3990, Columbus, OH 43218-3990, or emailed to Resistor@dla.mil. Since contact information can change, you may want to verify the currency of this address information using the ASSIST Online database at https://assist.daps.dla.mil.

3.4 Physical parameters. The physical parameters shall be as specified on the applicable CID sheet.

3.5 Operating shaft. The operating shaft style and length shall be as specified on the applicable CID sheet.

3.6 Electrical rotation and linearity. The electrical rotation and linearity shall be as specified on the applicable CID sheet

3.7 Power rating. The power rating shall be as specified on the applicable CID sheet.

3.8 Operating ambient temperature. The operating ambient temperature shall be as specified on the applicable CID sheet.

3.9 Marking. Resistors supplied to this CID shall be marked with the manufacturer's (MFR's) standard commercial PIN.

* 3.10 Recycled, recovered, or environmentally preferable materials. Recycled, recovered, or environmentally preferable materials should be used to the maximum extent possible provided that the material meets or exceeds the operational and maintenance requirements, and promotes economically advantageous life cycle costs.

* 3.11 Workmanship. Resistor shall be processed in such a manner as to be uniform in quality and shall be free from other defects that will affect life, serviceability, or appearance.

4. REGULATORY REQUIREMENTS. The offeror/contractor is encouraged to use recovered materials to the maximum extent practicable, in accordance with 23.403 of the Federal Acquisition Regulation (FAR).

5. PRODUCT CONFORMANCE PROVISIONS.

5.1 Product conformance. The products provided shall meet the salient characteristics of this CID, conform to the producer's own drawings, specifications, standards, and quality assurance practices, and is the same product offered for sale in the commercial market. The Government reserves the right to require proof of such conformance.

6. PACKAGING. Preservation, packing, and marking shall be as specified in the contract or order.

7. NOTES

7.1 PIN. The PIN should be used for Government purposes to buy commercial products to this CID. See section 2 for PIN format example.

* 7.2 Environmentally preferable material. Environmentally preferable materials should be used to the maximum extent possible to meet the requirements of this specification. As of the dating of this document, the U.S. Environmental Protection Agency (EPA) is focusing efforts on reducing 31 priority chemicals. The list of chemicals and additional information is available on their website at http://www.epa.gov/osw/hazard/wastemin/priority.htm. Included in the EPA list of 31 priority chemicals are cadmium, lead, and mercury. Use of these materials should be minimized or eliminated unless needed to meet the requirements specified herein (see Section 3)."

7.3 Commercial and Government Entity (CAGE) code. For ordering purposes, inventory control, and submission of these resistors to DSCC under the Military Parts Control Advisory Group (MPCAG) evaluation program, CAGE Code 58536 should be used.

* 7.4 Source of documents.

FEDERAL REGULATIONS

FAR 23.403 - Federal Acquisition Regulations (FAR) – Use of Recovered Materials.

(Copies of these documents are available online at www.acquisition.gov/comp/far/index.html or from the U. S. Government Printing Office, 732 North Capital Street, NW Washington D.C. 20401.)

7.5 Ordering data. The contract or order should specify the following:

a. CID document number, revision, and CID PIN.

b. Product conformance provisions.

c. Packaging requirements.

7.6 Government users. To acquire information on obtaining these resistors from the Government inventory system, contact Defense Supply Center, Columbus, ATTN: DSCC-CPB, Post Office Box 3990, Columbus, OH 43218-3990, or telephone (614) 692-7678.

* 7.7 Changes from previous issue. The margins of this CID are marked with an asterisk to indicate where changes from the previous issue were made. This was done as a convenience only and the Government assumes no liability whatsoever for any inaccuracies in these notations. Bidders and contractors are cautioned to evaluate the requirements of this document based on the entire content irrespective of the marginal notations and relationship to the last previous issue.
