MIL-B-44056A
AMENDMENT-1
26 September 1984

MILITARY SPECIFICATION

BEEF, GROUND, WITH SPICED SAUCE, THERMOSTABILIZED,

FOR MEAL, READY-TO-EAT

This amendment forms a part of Military Specification MIL-B-44056A, dated 30 September 1983, and is approved for use by all Departments and Agencies of the Department of Defense.

PAGE 5

3.3.1.1a, line 3: Delete "8 hours" and substitute "24 hours".

3.3.1.1a, end of line 3: Add the following new sentences:

"Holding the cooked meat in the frozen state for not more than 30 days is permitted provided the meat is vacuum packaged into gas and moisture impermeable bags or mechanically stuffed (to exclude air pockets) into impermeable casings and secured at both ends with metal clips or by heat sealing. The packaging shall be of flexible material impermeable to water and have an oxygen permeability of not more than 10cc of oxygen per 24 hours per mil thickness at 73°F and 0 percent relative humidity. The oxygen and moisture permeability factors shall be certified by the packaging material manufacturer and such certification shall be supplied to the responsible USDA-AMS inspection agent for each shipment."

PAGE 6

3.3.3d, line 1: Delete "combined".
line 2: Delete "50°F" and substitute "40°F".

3.3.3e, line 2: Delete "50°F" and substitute "40°F".

PAGES 13 AND 14

4.5.6, 4.5.6.1 and 4.5.6.2: Delete and substitute:

"4.5.6 Product testing.

4.5.6.1 Fat content testing. The product shall be tested for fat content in accordance with the Fosslet Method or the Crude Fat or Ether Extract Method (using petroleum ether) in the Meat and Meat Products chapter of the Official Methods of Analysis of the Association of Analytical Chemists. The results shall be reported to the nearest 0.1 percent. Any result failing to conform to the fat content requirement in 3.4 shall be classified as a major defect. The lot size shall be expressed in pouches. The sample unit shall be the contents of one filled and sealed pouch. The inspection level shall be S-2 and the AQL, expressed in terms of defects per hundred units, shall be 4.0.

4.5.6.2 Salt content testing. The product shall be tested for salt content in accordance with the Meat Section in the Meat Products chapter of the Official Methods of Analysis of the Association of Analytical Chemists. The results shall be reported to the nearest 0.1 percent. Any result failing to conform to the fat content requirement in 3.4 shall be classified as a major defect. The lot size shall be expressed in pouches. The sample unit shall be the contents of one filled and sealed pouch. The inspection level shall be S-2 and the AQL, expressed in terms of defects per hundred units, shall be 4.0."
