MIL-T-44064A
AMENDMENT-1
7 December 1984

MILITARY SPECIFICATION

TURKEY, DICED, WITH GRAVY, THERMOSTABILIZED,
FOR MEAL, READY-TO-EAT

This amendment forms a part of Military Specification MIL-T-44064A, dated 30 September 1983, and is approved for use by all Departments and Agencies of the Department of Defense.

PAGE 3

3.2.1: Delete and substitute the following paragraphs:

"3.2.1 Turkey. Turkey shall be prepared from chilled or frozen Grade B or better ready-to-cook yearling turkeys or young tom turkeys or a combination of classes. The wing tips, drumsticks, giblets, necks, backs and boney material shall be excluded. Turkey shall not show evidence of thawing or refreezing. The turkey shall be made into a roll, dices, or precooked dices provided they comply with the requirements for type III, condition B, class 1 of PP-T-1823 (except that items 11, 12 and 13 of table IV do not apply and up to 1.0 percent salt may be used). The turkey roll or dices can be made either in-house or purchased from a commercial deboning operation. Time from slaughter to incorporation into the final product shall not exceed 120 days. Turkey shipped between plants shall be accompanied by a USDA Poultry Grading Branch Certificate.

3.2.1.1 Chilled turkey. Turkey received in the chilled state shall not have been previously frozen and shall have been held at the temperature not to exceed 40°F for a period of time not to exceed 4 days from initial chilling to further processing."

PAGE 4

3.3.1a: Delete.

3.3.1b, lines 1-3: Delete first sentence and substitute "The deboned turkey meat shall consist of not less than 50 percent or more than 60 percent white meat (obtained from the breast and wings) with the remaining percentage dark meat. The turkey shall be water cooked, roasted, or steamed."

3.3.1c: Delete and substitute:

"c. The turkey meat shall be mechanically diced with dice settings at approximately 3/4 by 3/4 by 3/4 inch."

3.3.1d: Delete.

3.3.1.1a, line 3: Delete "8" and substitute "24".

3.3.1.1a, end of line 4: Add the following new sentences:

"Alternatively, the cooked meat may be held in the frozen state for not more than 30 days provided that the meat is vacuum packaged into gas and moisture impermeable bags or mechanically stuffed (to exclude air pockets) into impermeable casings and secured at both ends with metal clips or by heat sealing. The packaging shall be of flexible material impermeable to water and have an oxygen permeability of not more than 10cc of oxygen per 24 hours per mil thickness at 72°F and 0 percent relative humidity. The oxygen and moisture permeability factors shall be certified by the packaging material manufacturer and such certification shall be supplied to the responsible USDA-AMS inspection agent for each shipment."

PAGE 10 (cont'd)

4.5.6.1 Fat content testing. The product shall be tested for fat content in accordance with the Fosslet Method or the Crude Fat or Ether Extract Method (using petroleum ether) in the Meat and Meat Products chapter of the Official Methods of Analysis of the Association of Analytical Chemists. The results shall be reported to the nearest 0.1 percent. Any result failing to conform to the fat content requirement in 3.4 shall be classified as a major defect. The lot size shall be expressed in pouches. The sample unit shall be the contents of one filled and sealed pouch. The inspection level shall be S-2 and the AQL, expressed in terms of defects per hundred units, shall be 4.0.

4.5.6.2 Salt content testing. The product shall be tested for salt content in accordance with the Meat Section in the Meat Products chapter of the Official Methods of Analysis of the Association of Analytical Chemists. The results shall be reported to the nearest 0.1 percent. Any result failing to conform to the salt content requirement in 3.4 shall be classified as a major defect. The lot size shall be expressed in pouches. The sample unit shall be the contents of one filled and sealed pouch. The inspection level shall be S-2 and the AQL, expressed in terms of defects per hundred units, shall be 4.0."
