Status Notes for Use on Military Sheet Form Standards
MIL–STD–32

1. This standard has been approved by the Department of Defense and is mandatory for use by the Departments of the Army, the Navy, and the Air Force, effective 1 June 1960.

2. Recommended corrections, additions, or deletions should be addressed to the Standardization Division, Armed Forces Supply Support Center, Washington 25, D.C.

STATUS NOTES FOR USE ON MILITARY SHEET FORM STANDARDS

1. GENERAL

1.1 SCOPE. This standard establishes uniform status criteria and status notes to be used on Military Sheet (MS) form standards of items used in military equipment, and to define the meaning and effect of these notes.

1.2 FORM OF NOTES. Notes with supplementary interchangeability and usage information, patterned to the notes contained in the paragraph titled "Status notes" will, when applicable, be placed on standards to restrict procurement, usage, or incorporation of the items in designs of military equipment.

1.3 APPLICATION. Each note under the paragraph titled "Status notes" is presented as a guide only. It is incumbent upon all concerned (engineering and supply personnel) to formulate more specific notes as required for inclusion on the activated, cancelled, and superseding standards and to initiate any necessary contractual and inventory management action caused by the inactivation or cancellation of such items.

2. REFERENCED DOCUMENTS

Not applicable.

3. DEFINITIONS

3.1 STATUS NOTES (DEFINED). As used herein, "Status notes" reflect the condition relative to the latest configuration, obsoletion, and interchangeability relationship of items listed on Military Sheet form standards for feature and use of items in new design.

4. GENERAL REQUIREMENTS

4.1 STATUS CRITERIA.

4.1.1 Inactive with a superseding standard. This status is assigned to standard items not desired for use in future design, but suitable for current design contracts and to support existing military equipment, and for which a superseding standard has been developed. (See (a) under paragraph titled "Notes for inactivated or cancelled standards.")

4.1.2 Inactive with no superseding standard. This status is assigned to standard items suitable only for use in current design contracts and to support existing military equipment when no superseding standard has been developed. (See (b) under paragraph titled "Notes for inactivated or cancelled standards.")

4.1.3 Cancelled with a superseding standard.

4.1.3.1 Condition 1.

This status is assigned to standard items not considered suitable for use in any application because of unsatisfactory or hazardous characteristics and a suitable superseding standard item has been developed. Proper disposition of all such items shall be accomplished. (See (c) under paragraph titled "Notes for inactivated or cancelled standards.")

4.1.3.2 Condition 2.

This status is assigned to standard items considered suitable for use only for support of existing military equipment until existing stock of items is depleted. The superseding standard item is considered to be sufficiently better to warrant procurement and use in lieu of the cancelled item for current and new design contracts and to support existing military equipment. (See (d) under paragraph titled "Notes for inactivated or cancelled standards.")

4.1.4 Cancelled with no superseding standard.

4.1.4.1 Condition 1.

This status is assigned to standard items that, because of unsatisfactory or hazardous characteristics, are not considered suitable for use in any application. Proper disposition of all such items shall be accomplished. No suitable superseding standard item has been developed. (See (e) under paragraph titled "Notes for inactivated or cancelled standards.")

Check the source to verify that this is the current version before use.

4.1.4.2 Condition 2.

This status is assigned to standard items originally used in military equipment no longer in service and not suitable for use in any other applications. Proper disposition of all such items shall be accomplished. (See (f) under paragraph titled "Notes for inactivated or cancelled standards.")

5. DETAIL REQUIREMENTS

5.1 STATUS NOTES. Status notes, patterned to the following, shall be added to the inactivated or cancelled standard and to the superseding standard, when applicable, to provide the essential interchangeability or substitutability information for use by the design and maintenance activities. These notes are specifically related to the status conditions outlined in the paragraph titled "Status criteria."

5.1.1 Notes for inactivated or cancelled standards.

(a) INACTIVE FOR DESIGN AFTER (DATE). USE MS _____.
INTERCHANGEABILITY RELATIONSHIP— _____ and MS _____ parts identified by the same (dash number, size, duty cycle, or other pertinent identifying or descriptive details), are universally, functionally, and dimensionally interchangeable.

OR

INACTIVE FOR DESIGN AFTER (DATE). USE MS _____.
INTERCHANGEABILITY RELATIONSHIP—MS _____ parts can universally replace the inactivated _____ parts identified by the same dash numbers; but the inactivated _____ parts cannot always replace the superseding MS _____ parts.

(b) INACTIVE FOR DESIGN AFTER (DATE). NO SUPERSEDING STANDARD.
Use only in design for contracts in effect on date prior to above date and for replacement of identical items in existing military equipment.

(c) CANCELLED AFTER (DATE). USE MS _____.
The cancelled _____ parts are not suitable for use in any application. Use MS _____ identified by the same dash number in all design and for replacement of cancelled _____ in all existing military equipment. PERSONNEL SAFETY MAY BE INVOLVED.

(d) CANCELLED AFTER (DATE). USE MS _____.
INTERCHANGEABILITY RELATIONSHIP—MS _____ parts can replace the cancelled _____ parts identified by the same dash numbers. The cancelled _____ parts cannot always replace the MS _____ parts and should be used until existing stock is depleted. Use only the superseding MS parts of the same dash numbers for design and replacement.

(e) CANCELLED AFTER (DATE). NO SUPERSEDING STANDARD.
The cancelled _____ parts are not suitable for use in any application. PERSONNEL SAFETY MAY BE INVOLVED.

(f) CANCELLED AFTER (DATE). NO SUPERSEDING STANDARD.
The applications for which the cancelled _____ parts were originally designed no longer exist. These parts are not suitable for use in any other application.

5.2 NOTES FOR SUPERSEDING STANDARDS

5.2.1 Interchangeability relationship. The format for MS standards provides for reference to superseded standards. In addition notes pertaining to the interchangeability relationship between the superseding and superseded parts should be included and should be patterned to the notes outlined herein, as applicable.

5.3 SPECIAL STATUS NOTES. Special forms of status notes may be used when specific application to portions of a standard drawing is desired. For such notes, the basic forms given in the paragraph titled "Status notes" shall be retained and any additional explanatory information as required shall follow.

Notice: When Government drawings, specifications, or other data are used for any purpose other than in connection with a definitely related Government procurement operation, the United States Government thereby incurs no responsibility nor any obligation whatsoever; and the fact that the Government may have formulated, furnished, or in any way supplied the said drawings, specifications, or other data is not to be regarded by implication or otherwise as in any manner licensing the holder or any other person or corporation, or conveying any rights or permission to manufacture, use, or sell any patented invention that may in any way be related thereto.

Copies of specifications, standards, drawings, and publications required by contractors in connection with specific procurement functions should be obtained from the procuring activity or as directed by the contracting officer.

Copies of this standard for military use may be obtained as indicated in the foreword to, or the general provisions of, the Index of Military Specifications and Standards.

The title and identifying symbol should be stipulated when requesting copies of military standards.
