QUALIFIED PRODUCTS LIST
OF
PRODUCTS QUALIFIED UNDER MILITARY SPECIFICATION
MIL-B-81820
BEARINGS, PLAIN, SELF-ALIGNING, SELF-LUBRICATING, LOW SPEED OSCILLATION

This list has been prepared for use by or for the Government in the acquisition of products covered by the subject specification and such listing of a product is not intended to and does not connote endorsement of the product by the Department of Defense. All products listed herein have been qualified under the requirements for the product as specified in the latest effective issue of the applicable specification. This list is subject to change without notice; revision or amendment of this list will be issued as necessary. The listing of a product does not release the supplier from compliance with the specification requirements.

THE ACTIVITY RESPONSIBLE FOR THIS QUALIFIED PRODUCTS LIST IS THE NAVAL AIR SYSTEMS COMMAND (ATTENTION: COMMANDING OFFICER, NAVAL AIR WARFARE CENTER, AIRCRAFT DIVISION WARMINSTER (435200R08), WARMINSTER, PA 18974)

NOTE: Each bearing manufacturer listed in this Qualified Products List is approved to supply its approved unplated bearings (listed herein) with the outside diameter zinc-nickel plated according to AMS 2417, Type 2 or cadmium plated according to QQ-P-416, Type II, Class 2 when plating is specified by the purchaser. The designation for plated parts is characterized by addition of the letter "P" to the Government designation for the unplated parts. For existing inventories, cadmium plated parts are acceptable.

Each bearing manufacturer listed in this Qualified Products List is approved to supply its approved bearings (listed herein) with low-torque bearings when a low-torque bearing is specified by the purchaser. The designation for low-torque parts is characterized by the addition of the letter "K" to the Government designation for the parts.

Each bearing manufacturer listed in this Qualified Products List is approved to supply its approved bearings (listed herein) with oversize outside diameters when an oversize bearing is specified by the purchaser. There are two permissible oversize diameter increments (0.010 and 0.020 inch oversize). The designation for an oversize part is characterized by the addition of the letters "T" or "U" to the Government designation for the parts ("T" for 0.010 inch oversize, "U" for 0.020 inch oversize).

The addition of the letters "PKT" to the Government designation indicates a plated low-torque oversize bearing.

AMSC N/A
FSC 3120
DISTRIBUTION STATEMENT A. Approved for public release; distribution is unlimited.
