INTERIM AMENDMENT

TO

FEDERAL SPECIFICATION

VALVE, ANGLE, CHECK, AND GLOBE, BRONZE (125, 150, AND 200 POUND, THREADED END, FLANGE ENDS, SOLDER ENDS, AND BRAZED END, FOR LAND USE)

This interim amendment was developed by the General Services Administration, Federal Supply Service, Washington, DC 20406, based upon currently available technical information. It is recommended that Federal agencies use it in procurement and forward recommendations for changes to the preparing activity at the address shown above.

The General Services Administration has authorized the use of this interim amendment as a valid exception to Federal Specification WW-V-51E, dated November 30, 1973.

PAGE 4

3.1.4.2, delete and substitute the following:

3.1.4.2 Classes A, B, and C with metallic disc. Stems shall be any of the following alloys and shall meet the chemical requirements of the following ASTM designations for all valve sizes (see 4.5.1):

Copper Alloy	ASTM	Copper Alloy	ASTM
642	B124 or B150	874	B198
651	B98 or B99	875	B198
694	B371	876	B198
697	B371	922	B61
		956	B148

3.1.4.3, delete and substitute the following:

3.1.4.3 Classes A and B with metallic discs, valve sizes 1/2 inch (12.7 mm) and smaller. Copper alloy meeting the chemical requirements of ASTM B61, except for phosphorous which may be greater than 0.05 percent by weight (see 4.5.1), may be used for stems of valves 1/2 inch (12.7 mm) and smaller in size.

PAGE 9

Add paragraph 3.4.5 as follows:

3.4.5 Steam test. Nonmetallic discs shall not disintegrate or blister when tested in accordance with 4.5.2.3.3.

PAGE 12

Add paragraph 4.5.2.3.3 as follows:

4.5.2.3.3 Steam test. Expose one half of a disc to saturated steam at 400° ± 5°F for 60 ± 5 minutes (see 3.4.5).
