Check the source to verify that this is the current version before use.

2. When a prong with pick and flat ball type clutch is specified, the prong shall be centered on the reverse side and fused or soldered to the lapel button. When a pin and catch is specified, the pin shall be mounted on the vertical center line with the catch on the bottom of the lapel button.

PACKAGING: For packaging, each finished lapel button shall be mounted and centered on a sulfite board with a minimum thickness of 0.030 inch and approximately 3-3/4 inches in length by 2-1/4 inches wide. The face of the sulfite board shall be covered with cobalt blue flock. The mounted sulfite board shall be placed in a rigid hinged plastic box having a transparent lid and opaque white bottom section. The box shall have two plastic hinges and catches and shall be approximately 3 inches in length and 1-1/4 inches wide and 3/4 inch in overall depth.

NOTE:
The term (REF) refers to the measurements taken from the obverse Government furnished hub or die.

CHANGES FROM PREVIOUS ISSUE: Marginal notations are not used in this revision to identify changes with respect to the previous issue due to the extent of the changes.
