COMMERCIAL ITEM DESCRIPTION

WRENCH, AUTO, ADJUSTABLE

The General Services Administration has authorized the use of this commercial item description in preference to Type II of Federal Specification GGG-W-631.

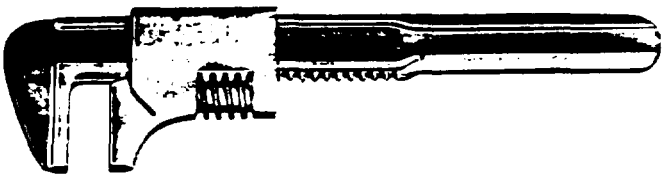

This commercial item description covers adjustable wrenches used in automotive maintenance.

Salient characteristics:

Shall be adjustable and consist of the following components:
- Frame (fixed jaw and handle)
  - Steel or malleable iron, integrally formed and include a suitable means for guiding and maintaining rigidity and alignment of the adjustable jaw.
  - Shall have a hardened machined worm rack.
  - Handle shaped for convenient handgripping.
- Adjustable jaw
  - Malleable iron or drop-forged steel.
  - Shall not bind on the handle.
  - Free from excessive side play.
  - Held parallel with the fixed jaw at all openings within the wrench capacity.
- Adjustable worm
  - Steel, knurled or serrated surface.
- Worm holding screw
  - Steel, properly hardened.
  - Shall properly fit and hold the adjusting worm in position.
  - Assembled in the wrench to prevent loosening or unscrewing.

Shall be capable of being used on both hexagonal and square head bolts and nuts.
Jaw working surface machined smooth.
Maximum surface roughness 63 microinches A.A. for ground or buffed non-utile surfaces.
Coating in accordance with manufacturer's standard practice.
