# COMMERCIAL ITEM DESCRIPTION

## LAMP, INCANDESCENT

The General Services Administration has authorized the use of this commercial item description.

This commercial item description covers a 6 volt, 30 watt incandescent lamp for use in Zeiss operation microscope illuminators.

Salient characteristics:

Shall be a 6 volt, 30 watt, tungsten filament, clear lamp for replacement in the Zeiss oblique homogeneous illuminator and the Zeiss coaxial illuminators for the OPMI 1, OPMI 6, and OPMI 9 operation microscope systems.

Shall be capable of producing coaxial illumination with the optical axis of the operation microscope systems. The resultant illumination shall be consistently in focus with the focal point of an operation microscope system regardless of its working distance.

The dimensions and base configuration shall allow for ready insertion into and ready removal from OPMI snap-in mounts for the illuminator housing, without the use of adapters.

Workmanship. The lamp shall be free from defects which detract from its appearance or impair its serviceability.

Unit. Each (EA). One incandescent lamp, as specified, constitutes one unit.

Quality Assurance Provisions.

Responsibility for inspection. Unless otherwise specified in the contract or purchase order, the contractor is responsible for the performance of all inspection requirements as specified herein. Except as otherwise specified in the contract or purchase order, the contractor may use his own or any facilities suitable for the performance of the inspection requirements specified herein, unless disapproved by the Government. The Government reserves the right to perform any of the inspections set forth in the specification where such inspections are deemed necessary to assure supplies and services conform to prescribed requirements.

AMSC N/A FSC 6240

DISTRIBUTION STATEMENT A. Approved for public release; distribution is unlimited.

Inspection. Inspection, as used herein, is defined as both examination (such as visual or auditory investigation without the use of special laboratory appliances or procedures) and testing (determination by technical means of physical and chemical properties) of the item.

Inspections and tests. Inspections and tests shall be conducted in accordance with commercial practice to determine compliance with specification requirements. Where feasible, the same sample shall be used for the determination of two or more test characteristics.

Sampling for inspections. Sampling for inspection and tests shall be conducted in accordance with commercial practice.

Contractor certification. The contractor shall certify that the product offered meets the salient characteristics of this description and conforms to the producers' own drawings, specifications, standards, and quality assurance practices. The Government reserves the right to require proof of such conformance prior to first delivery and thereafter as may be otherwise provided for under the provisions of the contract.

Regulatory requirements.

Federal Food, Drug and Cosmetic Act. If the product covered by this document has been determined by the U.S. Food and Drug Administration to be under its jurisdiction, the offeror/contractor shall comply, and be responsible for compliance by its subcontractors/suppliers, with the requirements of the Federal Food, Drug and Cosmetic Act, as amended, and regulations promulgated thereunder. In addition, the offeror/contractor shall comply, and be responsible for compliance by its subcontractors/suppliers, with the requirements of all other applicable Federal, State, and local statutes, ordinances, and regulations.

Recovered materials. The offeror/contractor is encouraged to use recovered material in accordance with Public Law 94-580 to the maximum extent practical.

Preservation, packaging, packing, labeling, and marking. Unless otherwise specified, preservation, packaging, and packing shall be to a degree of protection to preclude damage to containers and/or contents thereof under normal shipping conditions, handling, etc., involving shipment from the supply source to the receiving activity, plus reshipment from receiving activity, and shall conform to applicable carrier's rules and regulations.
