COMMERCIAL ITEM DESCRIPTION
SPECIFICATION SHEET

HOLDER, ELECTRICAL CARD, WEDGE RETAINERS, 5 PIECE, FOR COLD PLATE APPLICATIONS, .375 X .375 INCH BODY SIZE, WITH TWO MOUNTING HOLES AND SCREW RETENTION, SCREW ACTUATED

The General Services Administration has authorized the use of this commercial item description for all federal agencies.

The complete requirements for procuring 5 piece card holders described herein shall consist of this document and the latest issue in effect of A–A–59789.

CLASSIFICATION/PART IDENTIFICATION NUMBER (PIN). This commercial item description (CID) specification sheet uses a classification system which is included in the Part Identification Number (PIN) as shown in the following example (see notes herein).

Example: AA59789/13NR55R is the PIN for a clear chemical film finished, 5.5 inch (139.7 mm) long card holder with a retained actuating screw. The card holder also features two counterbored holes for use with rivets and a lockwasher and flat washer under the screw head for added resistance to loosening.

SALIENT CHARACTERISTICS.

Performance. Card holders shall hold the circuit card firmly in place providing high resistance to shock and vibration while providing maximum thermal transfer.

Interface and physical dimensions. The card holders supplied to this CID specification sheet shall be as specified herein and meet the general requirements specified in CID A–A–59789. Card holders shall also have a screw retention feature to prevent unintentional disassembly of the card holder.

Material. Unless otherwise specified herein, the card holder materials shall be as specified in A–A–59789.

Actuating screw hex drive socket. The across flats dimension for hex drive socket shall be .140 inch (3.60 mm) for mounting options "R", "S" and "V" and .118 inch (3.0 mm) for mounting option "Y".

Cold plate slot width. The recommended cold plate slot width to accommodate the circuit card assembly with attached card holder is .425 inch (10.80 mm) plus the thickness of the printed board of the circuit card assembly (see A–A–59789).

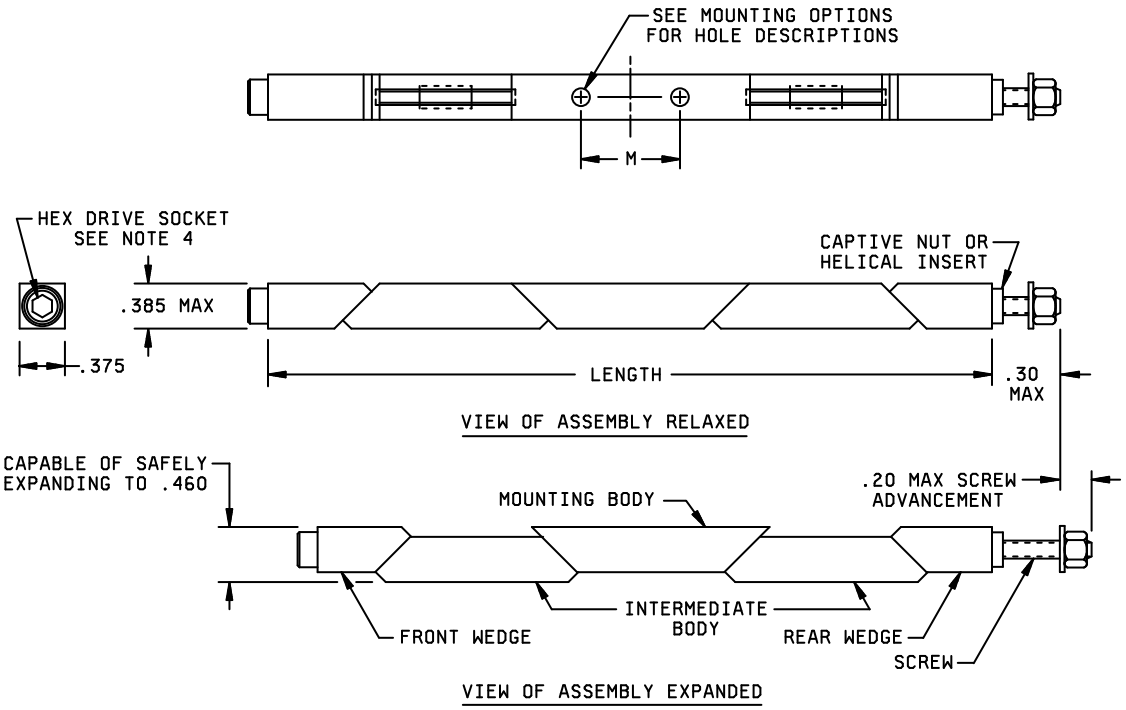

Installation torque. The recommended nominal installation torque is as follows: 20 inch-pounds (2.3 N-m) for assemblies of configuration "A" and "F" and 23 inch-pounds (2.6 N-m) for assemblies of configurations "J" and "N".

Configuration. The configuration of card holders shall be as specified in table I. The details of a particular configuration consist of those on figures 1 and 2; and may include those on figures 3 or 4.

Check the source to verify that this is the current version before use.

TABLE I. Configuration.

Configuration	Applicable figures	Hardware options
A	1 and 2	No added hardware
F	1, 2, and 3	Lockwasher and flat washer
N	1, 2, and 4	Screw self-locking element
J	1, 2, 3 and 4	Lockwasher, flat washer, and screw self-locking element

Inches	mm	Inches	mm	Inches	mm	Inches	mm	Inches	mm
.140	3.56	.30	7.6	.375	9.53	.380	9.65	.470	11.94

NOTES:
1. Dimensions are in inches. Millimeters are given for general information only.
2. Unless otherwise specified, tolerances are ±.02 inch (0.51 mm) for two place decimals and ±.010 inch (0.25 mm) for three place decimals.
3. Tolerance for the mounting hole spacing is ±.005 inch (0.13 mm).
4. The across flats dimension for actuating screw hex drive socket shall be .140 inch (3.60 mm) or .118 (3.0 mm) for the corresponding mounting option (see hex drive socket details).
5. Configuration shown uses captive nut on rear wedge. Alternate design using threaded insert shall be acceptable.

FIGURE 1. Relaxed and expanded dimensions.

Source: https://assist.dla.mil -- Downloaded: 2026-10-26T10:27Z
Check the source to verify that this is the current version before use.

Screw retention locknut (see figure 2). Card holders shall have a screw retention locknut intended to prevent unintentional disassembly of the card holder. The locknut shall be fabricated of a corrosion resistant material.

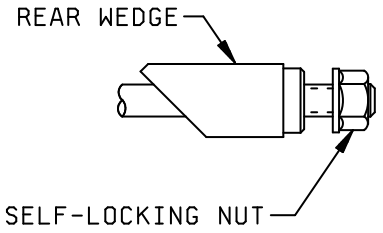

FIGURE 2. Screw retaining self-locking nut (corrosion resistant) details.

Finish. The wedge body finish designator shall be as specified in A–A–59789. The finishes available for this CID specification sheet are as follows: "B" (black anodize), "E" (electroless nickel), "H" (hard black anodize), or "R" (clear chemical film). When present, flat washers, lockwashers, and retention nuts shall be compatible with the specified finish.

Length, expanded, and relaxed dimensions. The length designator shall be as specified in A–A–59789. The lengths available for this CID specification sheet are listed in table II. The length, expanded, and relaxed dimensions shall be as specified on figure 1.

TABLE II. Additional assembly dimensions (see figure 1). 1/

PIN length designator	Dimension "Length" ±.02 (0.5)	Dimension "M" ±.01 (0.3)
50	4.80 (121.9)	1.00 (25.4)
55	5.30 (134.6)	1.00 (25.4)
60	5.80 (147.3)	1.00 (25.4)
65	6.30 (160.0)	1.00 (25.4)

1/ Dimensions are in inches. Millimeters, in parenthesis, are given for general information only.

Mounting. The mounting designators shall be as specified in A–A–59789. The mounting options available for this CID specification sheet are as follows: "R" (rivet mount holes with counterbore and countersink), "S" (tapped 2–56 holes), "V" (tapped 4–40 holes), or "Y" (tapped metric M3 x 0.5 holes) shall be as specified in A–A–59789. See figure 1 and table I for mounting hole spacing requirements. Card holders using mounting option "R" may be shipped unassembled.

Indexing pins. The two pins supplied for indexing pin mounting shall be Ø.062 x .040 inch (1.57 x 1.01 mm).

Rivet mount holes. The holes used for rivet mounting shall be .134/.139 inch (3.40/3.53 mm) diameter, countersunk 100 degrees by .190/.200 inch (4.83/5.08 mm) diameter through holes with an access/clearance counterbore of .190/.200 inch (4.83/5.08 mm) diameter by .300 inch (7.62 mm) deep.

Rivets. This card holder uses rivet style B as specified in A–A–59789 when rivet mounting is used.

Check the source to verify that this is the current version before use.

Configuration hardware options. Card holders can have the following hardware options: no added hardware, lockwasher and flat washer, screw self-locking element, or a combination of both lockwasher and flat washer and screw self-locking element. See table I for the correct PIN configuration identifier. Card holders requiring no added hardware options shall include configuration identifier "A" in the PIN (see table I, classification and notes section herein).

Lockwasher and flat washer (see figure 3). A lockwasher and flat washer located under the screw head will provide for additional resistance to loosening from shock and vibration. Card holders requiring a lockwasher and flat washer shall include configuration identifier "F" in the PIN (see table I, classification and notes section herein).

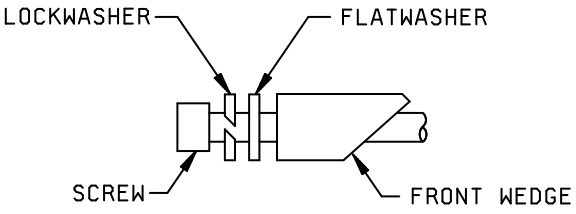

FIGURE 3. Lockwasher and flat washer details.

Screw self-locking element (see figure 4). The use of a screw self-locking element will provide prevailing torque for resistance to loosening from shock vibration. Card holders requiring a screw self-locking element shall include configuration identifier "N" in the PIN (see table I, classification and notes section herein).

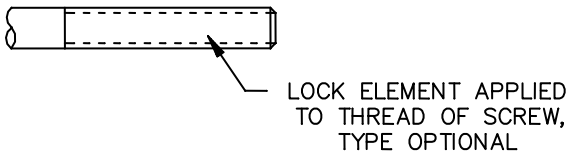

FIGURE 4. Screw self-locking element details.

Lockwasher, flat washer, and screw self-locking element. Card holders requiring a lockwasher, flat washer, and screw self-locking element option shall include configuration identifier "J" in the PIN (see table I, classification and notes section herein).

NOTES.

PIN. The PIN should be used for Government purposes to buy commercial products to this CID specification sheet. See the classification section for PIN format example.

Ordering data. Ordering data shall be as specified in A–A–59789.

Commercial products. As part of the market analysis and research effort, this CID specification sheet was coordinated with the following manufacturers of commercial products. At the time of CID specification sheet preparation and coordination, these manufacturers were known to have commercial products that would meet the requirements of this CID specification sheet. (NOTE: This information should not be considered as a list of approved manufacturers or be used to restrict procurement to only the manufacturers shown.)

Part number supersession data. These CID specification sheet PINs supersede the following manufacturer's part numbers as shown in table III. The CID PINs listed in table III are only for length designator "50". See table IV for CID PIN construction using other available lengths for this CID specification sheet. This information is being provided to assist in reducing proliferation in the Government inventory system.
